Chryssides, 2006-04-17 Alongside the older and more established religions there are hundreds indeed thousands more which have recently emerged These new religious movements or NRMs for lack of a better name are not only numerous they are also extremely varied and stem from a wide array of sources They run the gamut from small to large and all possess a tendency to constantly expand And while their potential for good is considerable more often than not it is their abuses that

are noticed Still writing them off as sects is too easy especially when they are as poorly understood as they often are The A to Z of New Religious Movements is a major contribution to understanding these new and formative religions While leaving any evaluation to the reader it offers brief descriptions of well over a hundred NRMs in the dictionary section along with information on the founders and leaders and also their roots in Christianity Buddhism Hinduism Islam and other more traditional religions The impact of modern philosophy and science are also weighed Since their roots often lay further back the chronology starts in the 18th century and continues to the present and the introduction attempts the arduous task of defining and categorizing the NRMs The extensive bibliography provides further reading

The Reenchantment of the World Morris Berman,1981 Morris Berman s book addresses what I consider to be the most important topic at our present moment in history He is searching for the underpinnings of a new world view that can give rise to a culture capable of relating gently and self sustainingly to the earth Frederick Ferr The Reenchantment of the World is a perceptive study of our scientific consciousness and a cogent and forceful challenge to its supremacy Focusing on the rise of the mechanistic idea that we can know the natural world only by distancing ourselves from it Berman shows how science acquired its controlling position in the consciousness of the West He analyzes the holistic animistic tradition destroyed in the wake of Scientific Revolution of the sixteenth and seventeenth centuries which viewed man as a participant in the cosmos not as an isolated observer Arguing that the holistic world view must be revived in some credible form before we destroy our society and our environment he explores the possibilities for a consciousness appropriate to the modern era Ecological rather than animistic this new world view would be grounded in the real and intimate connection between man and nature

Saliba, 2016-10-06 This book provides a dispassionate analysis of new religious movements charting their growth and examining them from a variety of perspectives sociological psychological legal and theological Saliba then questions whether or not membership harms those who join these new movements and assesses the charge that they brainwash their adherents
