Dynamic Knowledge Representation in Scientific Domains Pshenichny, Cyril, Diviacco, Paolo, Mouromtsev, Dmitry, 2018-03-16 The main approach to understanding and creating knowledge engineering concepts is static knowledge. Currently, there is a need to approach knowledge through a dynamic lens and address changing relations on an elaborated syntactic and semantic basis. Dynamic Knowledge Representation in Scientific Domains provides emerging research on the internal and external changes in knowledge within various subject areas and their visual representations. While highlighting topics such as behavior diagrams, distribution analysis, and qualitative modeling, this publication explores the structural development and assessment of knowledge models. This book is an important resource for academicians, researchers, students, and practitioners seeking current research on information visualization in order to foster research and collaboration.

Depicting the bustling crowds of humanity from magisterial heights was once a popular visual genre among artists and the public, regularly appearing in mass market newspapers and magazines, carnivals and circuses, cookouts and baseball games, bustling city streets and train stations or parades, and epic battle scenes. Artists depicted the everyday life of urban and country settings where communities gathered for fun and revelry. Adults and children alike could spend hours delighting in the details of these marvelously orchestrated scenes of human bustle. This coffee table collection showcases the remarkable beauty and breadth of these forgotten American classics.
