Jaswal, Desiree Forsythe, 2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion particularly for students with marginalized identities This poses problems particularly when science permeates every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital We must create a STEM environment in which students with marginalized identities feel respected listened to and valued We must assist students in understanding how their positionality privilege and power both historically and currently impacts their meaning making and understanding of STEM *Folk Visions and Voices* Art Rosenbaum, 2013-10 Sampling virtually all of the old time styles within the musical traditions still extant in north Georgia *Folk Visions and Voices* is a collection of eighty two songs and instrumentals enhanced by photographs illustrations biographical sketches of performers and examples of their narratives sermons tales and reminiscences *Coaching College Students with Executive Function Problems* Mary R.
