Mortimer, Monica Kirkpatrick Johnson**

Social Change And The Life Course:

Social Structures and Human Lives Matilda White Riley, Bettina J. Huber, Beth B. Hess, 1988-09 *Social Structures and Human Lives* consists of papers from the 1986 American Sociological Association annual meeting selected to reflect the rich and diverse array of conceptual methodological and substantive reports presented there. Leading academics and researchers in the field offer information about aging over the life course, the relationship between aging and the changing structure of families, firms, state and society as a whole, and implications for equality of opportunity for people of differing age, gender, race, and socioeconomic status. A final chapter links selected topics from previous chapters to established sociological concerns and clarifies the broad scope of the book's central theme. *Social Change and the Life Course* Matilda W. Riley, 1988-06

Families, History And Social Change Tamara K. Hareven, Barbara Trepagnier, 2018-03-05 One of the prevailing myths about the American family is that there once existed a harmonious family with three generations living together and that this ideal family broke down under the impact of urbanization and industrialization. The essays in this volume challenge this myth and provide dramatic revisions of simplistic notions about change in the American family. Based on detailed research in a variety of sources, including extensive oral history interviews of ordinary people, these essays examine major changes in family life, dispel myths about the past, and offer new directions in research and interpretation. The essays cover a wide spectrum of issues and topics, ranging from the organization of the family and household to the networks available to children as they grow up, to the role of the family in the process of industrialization, to the division of labor in the family along gender lines, and to the relations between the generations in the later years of life. While discussing family relations in the past and revising prevailing notions of social change, these interdisciplinary essays also provide important perspectives on the present.

Social Change and the Life Course Matilda White Riley, 1988 *Social Change and the Life Course: Sociological lives* American Sociological Association. Meeting, 1988 **Handbook of the Life Course** Jeylan T. Mortimer, Michael J. Shanahan, 2007-12-14 This comprehensive handbook provides an overview of key theoretical perspectives, concepts, and methodological approaches that, while applied to diverse phenomena, are united in their general approach to the study of lives across age phases. In surveying the wide terrain of life course studies with dual emphases on theory and empirical research, this important reference work presents probative concepts and methods and identifies promising avenues for future research.

Social Dynamics of the Life Course Walter R. Heinz, Victor W. Marshall, In the last two decades, research on the life course has successfully combined and integrated different and rather isolated fields of social concerns, such as the labor market, family, solidarity, education, employment, retirement, and social policy. It has also developed a special focus on crucial problems of sociological research, which includes the understanding of micro-macro phenomena, the dynamics of social change, and international comparisons. Contributors to this volume take an international comparative approach in applying the life course theoretical framework to issues of work and career. Life course research focuses on the relationship between

institutions and individuals across the life span and illuminates the impact of modernization on the shaping of biographies. Industrial service societies are characterized by historically new contingencies of living arrangements and biographies. These contingencies differ according to the extent to which life course patterns are regulated by social institutions. In the continental European context, institutional frameworks continue to define the timing and sequencing of transitions across the life course. In less regulated market societies like the United States and Great Britain, biographies and living arrangements are shaped more by the interaction of markets, social networks, and individual decisions. In active welfare states, institutional resources and rules continue to mediate the effects of social change on the life course. What the editors and contributors to this fine compendium anticipate is a change on the cultural level toward more equality. This trend supports young people and women in particular in their expectations concerning an egalitarian relationship. This expectation is not taken for granted from the point of view of the male partner but has to be negotiated in decisionmaking processes as an issue that concerns the couple as a unit. Thus the way in which people interact is profoundly impacted by the values and goals of equity demands.

Walter R. Heinz is professor of sociology and social psychology and director, Graduate School of Social Sciences, University of Bremen. Victor W. Marshall is professor of sociology and director of the Institute on Aging, University of North Carolina at Chapel Hill, Carolina.

Social Change and Human Development Rainer K. Silbereisen, Xinyin Chen, 2010-05-26. Today's world is characterized by a set of overarching trends that often come under the rubric of social change. In this innovative volume, Rainer K. Silbereisen and Xinyin Chen bring together for the first time international experts in the field to examine how changes in our social world impact on our individual development. Divided into four parts, the book explores the major socio-political and technological changes that have taken place around the world from post-war to the rapid upheavals in the 1990s. Europe to the gradual changes in parts of East Asia and explains how these developments interplay with human development across the lifespan. Human Development and Social Change is a useful resource for students and researchers involved in all areas of human development including developmental psychology, sociology, and education.

Aging, Society and the Life Course Leslie A. Morgan, 2007. As our aging population grows ever larger, it is increasingly important to understand how adults age and what we can do to provide up-to-date care to ensure their well-being as an integral part of society. Leslie Morgan and Suzanne Kunkel understand that this phenomenon is about much more than just the physical or biological aspects of growing older and have put together a comprehensive text on the impact of society and sociology on the aging process. Use this text to explore the diversity of the aging population and dispel the major stereotypes surrounding the elderly. Learn about aging through all the layers of social context, from family life to politics and economics. And through this approach, come to see how aging is more than just an individual process; it is a process that effects the direction of our society as a whole. For the Student: Web sites of interest and key terms defined at the end of each chapter. Real life stories and essays on love, sex, music, medicine, and crime. For the Professor: Assignment ready reading in a One Chapter a Week format.
