Social Construction Of International Politics Identities Foreign Policies Moscow 1955 And 1999:

Social Construction of International Politics Ted Hopf, 2002 In this deeply researched book Ted Hopf challenges contemporary theorizing about international relations He advances what he believes is a commonsensical notion a state's domestic identity has an enormous effect on its international policies Hopf argues that foreign policy elites are inextricably bound to their own societies in order to understand other states they must first understand themselves To comprehend Russian and Soviet foreign policy it is just as important to read what is being consumed on the Moscow subway as it is to conduct research in the Foreign Ministry archives the author says Hopf recreates the major currents in Russian Soviet identity reconstructing the identity topographies of two profoundly important years 1955 and 1999 To provide insights about how Russians made sense of themselves in the post Stalinist and late Yeltsin periods he not only uses daily newspapers and official discourse but also delves into works intended for mass consumption popular novels film reviews ethnographic journals high school textbooks and memoirs He explains how the different identities expressed in these varied materials shaped the worldviews of Soviet and Russian decisionmakers Hopf finds that continuous renegotiations and clashes among competing domestic visions of national identity had a profound effect on Soviet and Russian foreign policy Broadly speaking Hopf shows that all international politics begins at home

International Institutions and Socialization in Europe Jeffrey T. Checkel, 2007-02-19

Since the path breaking work of Karl Deutsch on security communities and Ernst Haas on European integration it has been clear that international institutions may create senses of community and belonging beyond the nation state Put differently they can socialize Yet the mechanisms underlying such dynamics have been unclear This volume explores these mechanisms of international community building from a resolutely eclectic standpoint Rationalism is thus the social theory of choice for some contributors while others are more comfortable with social constructivism This problem driven perspective and the theoretical bridge building it are the cutting edge in international relations theory By providing more finely grained arguments on precisely how international institutions matter such an approach sheds crucial light on the complex relationship between states and institutions between rational choice and social constructivism and in our case between Europe and the nation state

Trust and Mistrust in International Relations Andrew H. Kydd, 2018-06-05 The difference between war and peace can be a matter of trust States that trust each other can cooperate and remain at peace States that mistrust each other enough can wage preventive wars attacking now in fear that the other side will attack in the future In this groundbreaking book Andrew Kydd develops a theory of trust in international relations and applies it to the Cold War Grounded in a realist tradition but arriving at conclusions very different from current realist approaches this theory is the first systematic game theoretic approach to trust in international relations and is also the first to explicitly consider how we as external observers should make inferences about the trustworthiness of states Kydd makes three major claims First while trustworthy states may enter conflict when we see conflict we should become more convinced that the states involved are untrustworthy Second strong states traditionally thought to promote cooperation can do so only if they are relatively trustworthy Third even states that strongly mistrust each other can reassure each other and cooperate provided they are trustworthy The book's historical chapters focus on the growing mistrust at the beginning of the Cold War Contrary to the common view that both sides were willing to compromise but failed because of mistrust Kydd argues that most of the mistrust in the Cold War was justified because the Soviets were not trustworthy
