Wenceslao J. González, 2006 Nowadays philosophy and methodology of science appear as a combination of novelty and continuity This blend is clear both in the general approaches to science those thought of as any science and in the specific perspectives on every science either formal or empirical There are new topics for philosophical reflection such as key issues in philosophy of medicine and central problems raised by neuroscience Thus new contents have brought attention to aspects that previously went almost unnoticed In addition there are new angles for philosophical study such as the repercussion of society on scientific activity in aims processes and results But the background of the main philosophical and methodological trends of the twentieth century is in many ways still in place *Morality and Spirituality in the Contemporary World* Chandana Chakrabarti, 2012-12-07 The contemporary world faces a number of problems that are both deep seated and interrelated since they arise from the very nature of technological society The environment upon which all life depends is seriously threatened by climate change rising sea levels pollution overpopulation resource depletion and increased risks of droughts forest fires floods and other extreme weather events Environmental degradation is intimately connected to the consumer lifestyle of developed countries This lifestyle promotes materialism entertainment and hedonistic superficiality that ultimately lead to moral corruption Our insensitive and destructive attitude towards nature is not isolated or unrelated to other problems of social justice The environmental crisis reflects human structures of domination that include political and economic exploitation racism sexism and ageism These challenges are immense and solutions to them will require a renewed dedication to moral reflection and a commitment to social justice This book discusses the challenges in connection with topics such as human rights economic exploitation and inequality environmental protection globalization global food justice technology gender equality and ageism It provides a plurality of moral and spiritual perspectives including Hinduism Buddhism Daoism and Christianity that offer guidance in finding responses that are both possible and reasonable

Justice and Desert-Based Emotions Kristján Kristjánsson, 2017-03-02 The clear message proposed in this book is that justice matters for morality and desert matters for justice and that emotions matter for desert justice and morality Moreover and no less importantly justice education needs to take all those facts into consideration Kristján Kristjánsson's new book falls on the cutting edge of the latest developments in justice discourse both in philosophy and in the social sciences Written from a philosophical perspective it gives an accessible but penetrating exploration of various interlocking and interdisciplinary themes relating to justice Kristjánsson justifies the necessary interplay between philosophers and social scientists dealing with justice probes the role of desert in justice and explains the rising interest in the emotionality of justice He then analyses the main desert based emotions connects his discussion to recent trends in developmental and social psychology offers a moral justification of desert and desert based emotions and concludes by applying all those ideas in a close study of how justice and desert should be handled in moral education at school Kristjánsson deftly weaves together insights from disparate academic areas relevant for justice in general and desert in particular This is an engaging eye opening and provocative book that should excite anyone interested in justice discourse and help generate debate in different areas related to justice philosophical psychological and educational

their very own *A Just Society* Michael Boylan, 2004-07-13 *A Just Society* represents a complete account of Boylan's original worldview theory of ethics and social philosophy. The author sets out the foundation and application of the personal worldview imperative for ethics and the shared community worldview imperative for social philosophy. These form the structure for a rights-based deontological theory that is holistic and underscored by an understanding of the good will that incorporates novel depictions of the sincere and authentic agent who displays sympathy, care, openness, and love. In the end, *A Just Society* strikes a balance between extreme liberalism, libertarianism, and those advocating the rule of the general will, utilitarianism. As such, the book makes an important contribution to ethical and political theory as well as grounding an original approach to public philosophy.
