Visualizing Africa in Nineteenth-Century British Travel Accounts Leila Koivunen, 2008-11-19 This study provides the first sustained analysis of the process by which images of Africa were transformed into the illustrations of the continent that appeared in nineteenth century European travel books Koivunen examines the actual production process of images and the books in which they were published in order to demonstrate how why and by whom the images were manipulated **The Lives of Images** Peter Mason, 2001 Examines the history of European representations of non European peoples German Culture and the Modern Environmental Imagination Sabine Wilke, 2015-03-20 Thinking about and relating to the environment what the Germans call Umwelt i.e. the world that surrounds us in the way that we do today has a long tradition within modern German culture German scientists were among the many European explorers that left Europe in the late eighteenth century on voyages of discovery to then unknown parts of the world For some explorers discovery meant the fundamental confirmation of their own superiority vis vis primitive peoples and primitive natures for others it resulted in a shake up of their belief in the superiority of European civilization in the face of the achievements of other civilizations or in the face of spectacular nature scenes that outperformed the temperate European landscapes in terms of scale sublimity and grandeur

The documents that contain these stories of discovery left an important impression not only on German culture but on European civilization at large defining it vis vis other civilizations and other natures Europe today is the product of these encounters including the way we conceive of our Umwelt the environment that surrounds us The story told in this book is the story of the rise of the modern German environmental imagination with particular emphasis on its narrative and visual components complementing and expanding Barbara Stafford s important work in her seminal study of the illustrated travel account from 1984 Chapters on Georg Forster Alexander von Humboldt Albert Bierstadt Leni Riefenstahl and Werner Herzog unfold the key stages in a process that constitutes the unfolding of the modern German environmental imagination

Unfabling the East Jürgen Osterhammel, 2019-11-19 During the long eighteenth century Europe s travelers scholars and intellectuals looked to Asia in a spirit of puzzlement irony and openness In this panoramic and colorful book Jürgen Osterhammel tells the story of the European Enlightenment s nuanced encounter with the great civilizations of the East from the Ottoman Empire and India to China and Japan Here is the acclaimed book that challenges the notion that Europe s formative engagement with the non European world was invariably marred by an imperial gaze and presumptions of Western superiority Osterhammel shows how major figures such as Leibniz Voltaire Gibbon and Hegel took a keen interest in Asian culture and history and introduces lesser known scientific travelers colonial administrators Jesuit missionaries and adventurers who returned home from Asia bearing manuscripts in many exotic languages huge collections of ethnographic data and stories that sometimes defied belief Osterhammel brings the sights and sounds of this tumultuous age vividly to life from the salons of Paris and the lecture halls of Edinburgh to the deserts of Arabia the steppes of Siberia and the sumptuous courts of Asian princes He demonstrates how Europe discovered its own identity anew by measuring itself against its more senior continent and how it was only toward the end of this period that cruder forms of Eurocentrism and condescension toward Asia prevailed

Johann Reinhold Forster and the Making of Natural History on Cook's Second Voyage, 1772-1775 Anne Mariss, 2019-09-09 James Cook s voyages of exploration are a turning point not only in the history of the British Empire but also in the history of science and exploration of the Pacific The last decades have seen a wide ranging scholarly interest in Cook s voyages focusing on their impact on European and Polynesian societies their scientific results and their protagonists such as Cook himself or the nobleman Joseph Banks who took part in Cook s first voyage of exploration This book examines the hitherto underestimated role of the German scholar Johann Reinhold Forster who together with his son Georg Forster accompanied Cook on his second voyage of exploration 1772-1775 as a principal naturalist For a long time the German traveler has remained a rather shadowy figure of Cook s voyages of exploration and has only attracted scholarly attention occasionally Focusing on the making of knowledge onboard the ship and the islands where it made landfall the study provides a historical reappraisal of Forster s scientific

performance as a leading naturalist of his time By examining Forster s Resolution Journal Anne Mariss takes a microhistorical approach toward the making of natural history knowledge during the expedition to the Pacific Mariss unveils the difficulties the traveling naturalists encountered while collecting describing classifying and painting the natural world Her study brings to light the contribution of the various actors who were involved in this undertaking such as the scientific assistants sailors officers and the local actors of the Pacific world

Ancestral Images Stephanie Moser, 2018-09-05 Pictorial reconstructions of ancient human ancestors have twin purposes to make sense of shared ancestry and to bring prehistory to life Stephanie Moser analyzes the close relationship between representations of the past and theories about human evolution showing how this relationship existed even before a scientific understanding of human origins developed How did mythological religious and historically inspired visions of the past in existence for centuries shape this understanding Moser treats images as primary documents and her book is lavishly illustrated with engravings paintings photographs and reconstructions In surveying the iconography of prehistory Moser explores visions of human creation from their origins in classical early Christian and medieval periods through traditions of representation initiated in the Renaissance She looks closely at the first scientific reconstructions of the nineteenth century which dramatized and made comprehensible the Darwinian theory of human descent from apes She considers as well the impact of reconstructions on popular literature in Europe and North America showing that early visualizations of prehistory retained a firm hold on the imagination a hold that archaeologists and anthropologists have found difficult to shake

The Oxford History of the British Empire: Volume V: Historiography Robin Winks, 1999-10-21 The Oxford History of the British Empire is a major new assessment of the Empire in the light of recent scholarship and the progressive opening of historical records From the founding of colonies in North America and the West Indies in the seventeenth century to the reversion of Hong Kong to China at the end of the twentieth British imperialism was a catalyst for far reaching change The Oxford History of the British Empire as a comprehensive study helps us to understand the end of Empire in relation to its beginning the meaning of British imperialism for the ruled as well as for the rulers and the significance of the British Empire as a theme in world history This fifth and final volume shows how opinions have changed dramatically over the generations about the nature role and value of imperialism generally and the British Empire more specifically The distinguished team of

contributors discuss the many and diverse elements which have influenced writings on the Empire the pressure of current events access to primary sources the creation of relevant university chairs the rise of nationalism in former colonies decolonization and the Cold War They demonstrate how the study of empire has evolved from a narrow focus on constitutional issues to a wide ranging enquiry about international relations the uses of power and impacts and counterimpacts between settler groups and native peoples The result is a thought provoking cultural and intellectual inquiry into how we understand the past and whether this understanding might affect the way we behave in the future **Imperial**

Boredom Jeffrey A. Auerbach, 2018-10-03 *Imperial Boredom* offers a radical reconsideration of the British Empire during its heyday in the nineteenth century Challenging the long established view that the empire was about adventure and excitement with heroic men and intrepid women eagerly spreading commerce and civilization around the globe this thoroughly researched engagingly written and lavishly illustrated account suggests instead that boredom was central to the experience of empire Combining individual stories of pain and perseverance with broader analysis Professor Auerbach considers what it was actually like to sail to Australia to serve as a soldier in South Africa or to accompany a colonial official to the hill stations of India He reveals that for numerous men and women from explorers to governors tourists to settlers the Victorian Empire was dull and disappointing Drawing on diaries letters memoirs and travelogues *Imperial Boredom* demonstrates that all across the empire men and women found the landscapes monotonous the physical and psychological distance from home debilitating the routines of everyday life wearisome and their work tedious and unfulfilling The empire's early years may have been about wonder and marvel but the Victorian Empire was a far less exciting project Many books about the British Empire focus on what happened this book concentrates on how people felt **British imperialism in Cyprus, 1878-1915**

Andrekos Varnava, 2017-03-01 This book explores the tensions underlying British imperialism in Cyprus Much has been written about the British Empire's construction outside Europe yet there is little on the same themes in Britain's tiny empire in Europe This study follows Cyprus progress from a perceived imperial asset to an expendable backwater by explaining how the Union Jack came to fly over the island and why after thirty five years the British wanted it lowered Cyprus importance was always more imagined than real and was enmeshed within widely held cultural signifiers and myths British Imperialism in Cyprus fills a gap in the existing literature on the early British period in Cyprus and challenges the received and monolithic view that British imperial policy was based primarily or exclusively on strategic military considerations The combination of archival research cultural analysis and visual narrative that makes for an enjoyable read for academics and students of Imperial British and European history *Orientalism Transposed* Julie F. Codell, Dianne Sacko

Macleod, 2018-12-20 First published in 1998 this volume reflects that ever since the publication of Edward Said's *Orientalism* twenty years ago scholars have tested his thesis against the wider application of his terms to cultural practices and the rhetoric of power The cultural impact of the British on their colonies has been extensively investigated but only recently have

scholars begun to ask in what ways British culture was transformed by its contact with the colonies The essays in this volume demonstrate how influential the Empire was on British culture from the late eighteenth to early twentieth centuries They show how from cross cultural cross dressing to Buddhism British artists and writers appropriated unfamiliar and challenging aspects of the culture of the Empire for their own purposes An examination is also made of the extent to which colonized people engaged in the orientalisng discourse amending and subverting it even re applying its stereotypes to the British themselves Finally two essays explore instances of the exchange of ideas between colonies Several of the essays are based on papers given at the 1996 Conference of the College Arts Association

Photographing Papua Max Quanchi, 2009-03-26
Photographing Papua is a study of photography in the public domain in the late nineteenth and early twentieth centuries It argues that southeastern New Guinea known as British New Guinea and then as Papua when it became an Australian colony was created as a geographical place through visual representation in illustrated magazines and newspapers lavishly illustrated travelogues and mission hagiography serial encyclopedia lantern slides and postcards Readers knew Papua because many thousands of black and white photographs of Papuans villages and material culture rapidly swamped the reading public once the process of halftone newsprint reproduction became possible In an innovative and breakthrough fashion Photographing Papua switches attention from a few well known prints in museums and archives in some cases repeatedly reproduced but mostly rarely seen outside of scientific and scholarly circles It deals instead with thousands of photographs often used in ways not intended when the photograph was taken but which editors and publishers and subsequent photographers gradually made conform to an iconographic imperative a sort of abbreviated visual gallery of natives and a quick access pathway to the actual and imagined lives of Papuans in the last Unknown as New Guinea was titled It is a study of representation colonialism cross cultural encounters and the early world of illustrated media and photo journalism
