The Panda's Thumb Steven James Gold, 1983 *The Way of the Panda* Henry Nicholls, 2012-06-01 Learn how the extraordinary impact of the panda from obscurity to fame is also the story of China's transition from shy beginnings to center stage Giant pandas have been causing a stir ever since their formal scientific discovery just over 140 years ago Yet in spite of humankind's evident obsession with the giant panda it is only in the last few decades that scientific research has begun to show us what this mysterious frequently misunderstood creature is really like Henry Nicholls uses the rich and curious history of the giant panda to do several things to ponder our changing attitudes toward the natural world to offer a compelling history of the conservation movement and to chart the rise of modern China on its journey to become the self-sufficient twenty-first century superpower it is today

Panda Nation E. Elena Songster, 2018-03-16 A logo on products ranging from chopsticks and toilet paper to cell phones and automobiles the panda is one of the most ubiquitous images in China and throughout the world Yet the panda holds little notable historical significance in China Although it has existed in the territory of present-day China since the Pliocene epoch its widespread popularity there is not only recent but almost sudden In *Panda Nation* E. Elena Songster links the emergence of the giant panda as a national symbol to the development of

nature protection in the People's Republic of China The panda's transformation into a national treasure exemplifies China's efforts in the mid twentieth century to distinguish itself as a nation through government directed science and popular nationalism The story of the panda's iconic rise offers a striking reflection of China's recent and dramatic ascent as a nation in global status

The Bank Teller and Other Essays on the Politics of Meaning Peter Gabel, 2010-05-16 A collection of provocative essays on politics social meaning and law from Critical Legal Studies scholar and magazine columnist Peter Gabel The Bank Teller presents a unique and powerful analysis of the psychological and spiritual dimension of U S political culture and society In this series of strikingly original essays Gabel sheds new light on a wide range of subjects based on what he calls the longing for mutual recognition including the meaning of American politics from 1960 health care affirmative action the SAT abolish it Gabel declares deadly job culture and the spiritual dimension of public policy He takes on the adversarial roles of the legal system

including a nationally publicized debate with Alan Dershowitz on the moral obligation of criminal defense lawyers as well as the meaning of the Holocaust and the social psychology underlying the modern media. Passionate, insightful and profound, *The Bank Teller* fundamentally challenges our existing social institutions and presents a political strategy that invents new forms of working friendship and community. It was well reviewed and much discussed and in some quarters much disputed upon its print release in 2000 and has since been assigned to classes on politics, law and religion.

Darwin's Black Box Michael J. Behe, 1996. Behe argues that the complexity of cellular biochemistry argues against Darwin's gradual evolution.

Intelligent Design William A. Dembski, 2002-07-12. In this book William A. Dembski brilliantly argues that intelligent design provides a crucial link between science and theology. This is a pivotal work from a thinker whom Phillip Johnson calls one of the most important of the design theorists.

The Mind of the Market Michael Shermer, 2007-12-26. Bestselling author Michael Shermer explains how evolution shaped the modern economy and why people are so irrational about money. How did we make the leap from ancient hunter gatherers to modern consumers and traders? Why do people get so emotional and irrational about bottom line financial and business decisions? Is the capitalist marketplace a sort of Darwinian organism evolved through natural selection as the fittest way to satisfy our needs? In this eye-opening exploration, author and psychologist Michael Shermer uncovers the evolutionary roots of our economic behavior. Drawing on the new field of neuroeconomics, Shermer investigates what brain scans reveal about bargaining, snap purchases and establishing trust in business. He scrutinizes experiments in behavioral economics to understand why people hang on to losing stocks, why negotiations disintegrate into tit-for-tat disputes and why money does not make us happy. He brings together astonishing findings from psychology, biology and other sciences to describe how our tribal ancestry makes us suckers for brands, why researchers believe cooperation unleashes biochemicals similar to those released during sex, why free trade promises to build alliances between nations and how even capuchin monkeys get indignant if they don't get a fair reward for their work.

The ^AScientific Sublime Alan G. Gross, 2018-06-01. In *The Scientific Sublime*, Alan Gross reveals the modern day sublime in popular science. He shows how the great popular scientists of our time—Richard Feynman, Stephen Hawking, Steven Weinberg, Brian Greene, Lisa Randall, Rachel Carson, Stephen Jay Gould, Steven Pinker, Richard Dawkins and E. O. Wilson—evoke the sublime in response to fundamental questions: How did the universe begin? How did life begin? How did language begin?

Rethinking the Way We Teach Science Louis Rosenblatt, 2011-03-17. Offering a fresh take on inquiry, this book draws on current research and theory in science education, literacy and educational psychology as well as the history and philosophy of science to make its case for transforming the way science is taught. *Rethinking the Way We Teach Science* addresses major themes in national reform documents and movements: how to place students at the center of what happens in the classroom; how to shift the focus from giving answers to building arguments; how to move beyond narrow disciplinary boundaries to integrated explorations of ideas and issues that connect directly with students; and most especially, the

importance of engaging students in discussions of an interactive and explanatory character Deeply anchored in the classroom highly interactive and relevant across grade levels and subject matter above all this is a book about choosing to place the authority of reason over that of right answers *More Than a Theory (Reasons to Believe)* Hugh Ross,2009-03-01 The year 2009 marks the 150th anniversary of the publication of Charles Darwin's *On the Origin of Species* Alongside that event there are many Darwin Day celebrations planned to acknowledge his 200th birthday Add to these the virulent attacks of the New Atheists led by Richard Dawkins Bible believing Christians will be left increasingly challenged with the theory of evolution as the only model to explain the origins and age of the universe In *More Than a Theory* Hugh Ross founder and president of Reasons To Believe offers discerning readers a comprehensive testable creation model to consider as an alternative This fascinating resource will educate readers with a direct response to the recent and well publicized challenges from aggressive atheists In doing so it also reminds the scientific community of what constitutes good science Furthermore it will supply Christians with the scientific information they need to defend their convictions that the God of the Bible is the Creator Complete with several appendices that put common documents and stories to the same test *More Than a Theory* is a bold brave and unapologetic work of apologetics that will stir much discussion in both the scientific and religious realms

Writing That Makes Sense, 2nd Edition David S. Hogsette,2019-11-05 The second edition of *Writing That Makes Sense* takes students through the fundamentals of the writing process and explores the basic steps of critical thinking Drawing upon over twenty years of experience teaching college composition and professional writing David S Hogsette combines relevant writing pedagogy and practical assignments with the basics of critical thinking to provide students with step by step guides for successful academic writing in a variety of rhetorical modes New in the second edition Expanded discussion of how to write effective thesis statements for informative persuasive evaluative and synthesis essays including helpful thesis statement templates Extensive templates introducing students to conventions of academic discourse including integrating outside sources interacting with other writers ideas and dialoguing with multiple perspectives Examples of academic writing from different disciplines illustrating essay titles abstracts thesis statements introductions conclusions and voice Expanded discussion of voice in academic writing including an exploration of active and passive voice constructions in different disciplines and tips on how to edit for clarity A new chapter on writing in the disciplines Updated sample student papers New readings with examples of opposing views and multiple perspectives
