Teaching to the Brain's Natural Learning Systems Barbara K. Given,2002-05-15 What do we know about the brain's day to day functions What does neuroscience tell us about how we learn How can we make sense of the complex interconnections of billions of neurons in the human brain Just as educators divide many subjects into parts goals and learning objectives we can begin to understand the workings of the human brain by focusing on five learning systems emotional social cognitive physical and reflective In *Teaching to the Brain's Natural Learning Systems* Barbara K Given has investigated brain structures and functions of these five systems and applied findings from neurobiology to education without making leaps of judgment or unfounded claims In this book she translates neuroscience into an educational framework for lesson planning teaching and assessment Educators can use details from each chapter to add to their repertoire of teaching strategies and instructional approaches For example understanding the five learning systems promotes effective ongoing assessment of youngsters basic human needs to belong to know to do to reflect and to be one's self In addition each chapter can help teachers understand the roles they play mentor model collaborator facilitator coach and talent scout and the personal professional qualities they bring to the classroom passion vision intention action and reflection This is a practical book for educators based on current neurobiological insights into learning Note This product listing is for the Adobe Acrobat PDF version of the book **Supervision, a Guide to Practice** Jon Wiles,Joseph Bondi,1980 *Styles of Learning and Teaching* Noel J. Entwistle,2013-10-31 First Published in 1989 This book is in a sense a text book of educational psychology designed mainly for those with little previous knowledge of the subject But it is not a conventional text book To begin with it does not cover the whole area which normally defines educational psychology It concentrates instead on those aspects which are most directly applicable to understanding the processes related to learning intellectual skills and acquiring knowledge Also the book does not aim to provide a detailed coverage it is deliberately selective in the topics which are covered The main aim is to present an outline or perhaps an overview of current ideas in educational psychology in the hope of providing a more coherent picture of what otherwise tends to be a rather fragmentary set of topics drawn from mainstream psychology Read in conjunction with more conventional textbooks this overview should provide a good guide to the recent literature
