Collected papers Gladwyn Kingsley Noble,1925

Genetics of Mate Choice: From Sexual Selection to Sexual

Isolation W.J. Etges,M.A. Noor,2012-12-06 Genetic studies aimed at understanding the origin of species are dominating major scientific journals In the past decade genetic tools that were previously available only in model systems have become accessible to investigators working on nearly all species Concurrent with these technical advances has been an increase in understanding of both the importance of considering the ecological context of speciation and testing hypotheses about causes for species formation Many recent studies suggest a prominent role of sexual selection in species formation These advances have produced a need for a synthesis of what we now understand about speciation and perhaps more importantly where we should go from here In this volume several leading investigators and rising stars have contributed reviews and or novel primary research findings aimed at understanding the ultimate mystery on which Darwin named his most famous and influential book Fundamental to the origin of species is the evolution of mate choice systems This collection of papers discusses burgeoning genetic evolutionary and ecological approaches to understanding the origins of mating discrimination and causes of premating reproductive isolation both within and between species The individual contributions span a wide spectrum of disciplines taxa and ideas some controversial This synthesis brings together several of the most recent ideas with supporting empirical data This book will be of particular interest to both undergraduate and postgraduate researchers and students and researchers in the field of evolutionary biology genetics and animal behaviour *Zoologica* ,1928

Readings in Behavior William G. Van der Kloot,Charles

Walcott,Benjamin Dane,1974

The Hidden Structure of Interaction Luigi Anolli,2005

The idea of complexity states that most things tend to organize themselves into recurring patterns even when these patterns are not immediately visible to an external observer The general name for the scientific field concerned with the behaviour over time of a dynamic system is complexity theory The dynamic systems systems capable of changing over time are the focus of this approach and its concern is with the predictability of their behaviour The systems of interest to the complexity theory under certain conditions perform

in regular predictable ways under other conditions they exhibit behaviour in which regularity and predictability is lost The concepts of stable and unstable behaviour are part of the traditional repertoire of physical science What is novel is the concept of something in between chaotic behaviour For chaos here we refer to systems which display behaviour that though it has certain regularities defies prediction How does the order emerge from the chaos How can we predict the behaviour of a chaotic system Over the last 30 years and more trying to identify the hidden patterns behind chaotic behaviour became the focus of attention in a number of scientific disciplines These range as widely as astronomy chemistry evolutionary biology geology and psychology

Genealogies of Emotions, Intimacies, and Desire Ann Brooks, 2016-10-04 Genealogies of Emotions Intimacies and Desire excavates epistemologies which attempt to explain changes in emotional regimes from medieval society to late modernity Key in this debate is the concept of intimacy The book shows that different historical periods are characterized by emotional regimes where intimacy in the form of desire sex passion and sex largely exist outside marriage and that marriage and traditional normative values and structures are fundamentally incompatible with the expression of intimacy in the history of emotional regimes The book draws on the work of a number of theorists who assess change in emotional regimes by drawing on intimacy including Michel Foucault Eva Illouz Lauren Berlant Anthony Giddens Laura Ann Stoler Anne McClintock Niklas Luhmann and David Shumway Some of the areas covered by the book include Foucault sex and sexuality romantic and courtly love intimacy in late modernity Imperial power gender and intimacy intimacy and feminist interventions and the commercialization of intimacy This book will appeal to students and scholars in the social sciences and humanities including sociology gender studies cultural studies and literary studies

Exploring People of the Old Testament John Phillips, 2006-04-01 This inaugural volume in the John Phillips Bible Characters series provides a rich exposition of the lives of twenty seven significant and sometimes overlooked people in the Old Testament An excellent resource for pastors and teachers

The Sociology of Women Sara Delamont, 2021-10-17 Originally published in 1980 The Sociology of Women An Introduction aimed to provide a sociological biographically organised portrait of women written from a feminist perspective It was the first self contained analytical textbook treatment to present an account of the situation of women in modern Britain that was informed by sociological research At the same time it remained a straightforward and elementary text in the sense that it assumed no previous knowledge and is written throughout with the beginning student in mind it provided a lively thorough and realistic introduction to a range of sociological issues and problems it is abundantly illustrated by examples from research findings and views women always in the context of the wider society around them nor does it shirk controversial questions The book opens with a short chapter on sex and gender then traces women's lives as they grow from childhood through to old age There are chapters on childhood adolescence and early adulthood in the first part of the book which deals principally with the home the school and friendship patterns In part two the focus shifts to the adult lives of women The chapters here are on work illness and deviance on class and community on politics leisure and

religion and on motherhood and old age An important feature of the book will be the extensive guidance it provides on further reading and the inclusion of a full bibliography of material on women s lives

The Ecology of Marine Fishes Dr. Larry G. Allen, Dr. Michael H. Horn, 2006-02-15 Marine fishes have been intensively studied and some of the fundamental ideas in the science of marine ecology have emerged from the body of knowledge derived from this diverse group of organisms This unique authoritative and accessible reference compiled by 35 luminary ecologists evolutionary biologists and ichthyologists provides a synthesis and interpretation of the large often daunting body of information on the ecology of marine fishes The focus is on the fauna of the eastern Pacific especially the fishes of the California coast a group among the most diverse and best studied of all marine ecosystems A generously illustrated and comprehensive source of information this volume will also be an important launching pad for future research and will shed new light on the study of marine fish ecology worldwide The contributors touch on many fields in biology including physiology development genetics behavior ecology and evolution The book includes sections on the history of research both published and unpublished data sections on collecting techniques and references to important earlier studies

Animal Behaviour VK Agarwal, 2009-07 This textbook covers all syllabus of B Sc classes of All Indian Universities and has been prepared according to U G C model curriculum

Acoustic Communication in Insects and Anurans H. Carl Gerhardt, Franz Huber, 2002-07-15 Walk near woods or water on any spring or summer night and you will hear a bewildering and sometimes deafening chorus of frog toad and insect calls How are these calls produced What messages are encoded within the sounds and how do their intended recipients receive and decode these signals How does acoustic communication affect and reflect behavioral and evolutionary factors such as sexual selection and predator avoidance H Carl Gerhardt and Franz Huber address these questions among many others drawing on research from bioacoustics behavior neurobiology and evolutionary biology to present the first integrated approach to the study of acoustic communication in insects and anurans They highlight both the common solutions that these very different groups have evolved to shared challenges such as small size ectothermy cold bloodedness and noisy environments as well as the divergences that reflect the many differences in evolutionary history between the groups Throughout the book Gerhardt and Huber also provide helpful suggestions for future research

Multimodal Mating Signals: Evolution, Genetics and Physiological Background Astrid T. Groot, Varvara Yu. Vedenina, 2021-02-17

Theory of Coping Systems Francis D. Powell, 2017-09-29 This book deals with specific issues of the characteristics of various chronic pediatric diseases that cause stress for these families in their coping processes It emphasises on the changes in the coping system

The Encyclopedia of Land Invertebrate Behaviour Rod Preston-Mafham, Ken Preston-Mafham, 1993 Splendidly illustrated from nature this encyclopedia describes with rigour and grace some of the most complex and bizarre behaviours in the animal world

Vision in Cephalopods, Volume II Daniel Osorio, Chuan-Chin Chiao, Frederike Diana Hanke, 2021-09-29

Foundations of Animal Behavior Lynne D. Houck, Lee C. Drickamer, 1996-08 Beginning with Darwin s

work in the 1870s *Foundations of Animal Behavior* selects the most important works from the discipline's first hundred years, forty-four classic papers, and presents them in facsimile, tracing the development of the field. These papers are classics because they either founded a line of investigation, established a basic method, or provided a new approach to an important research question. The papers are divided into six sections, each introduced by prominent researchers. Sections one and two cover the origins and history of the field and the emergence of basic methods and approaches. They provide a background for sections three through six, which focus on development and learning, neural and hormonal mechanisms of behavior, sensory processes, orientation and communication, and the evolution of behavior. This outstanding collection will serve as the basis for undergraduate and graduate seminars and as a reference for researchers in animal behavior, whether they focus on ethology, behavioral ecology, comparative psychology, or anthropology. Published in association with the Animal Behavior Society.

The Garland Handbook of Southeast Asian Music Terry Miller, Sean Williams, 2011-03-17. The *Garland Handbook of Southeast Asian Music* is comprised of essays from *The Garland Encyclopedia of World Music*, Volume 4, Southeast Asia, 1998. Largely revised and updated, the essays offer detailed regional studies of the different musical cultures of Southeast Asia and examine the ways in which music helps to define the identity of this particular area. Part one provides an in-depth introduction to the area of Southeast Asia and explores a series of issues and processes such as colonialism, mass media, spirituality, and war. The articles in this section are important in gaining historical, political, and social perspective. Part two focuses on mainland Southeast Asia with essays representing Cambodia, Thailand, Laos, Burma, Peninsular Malaysia, Vietnam, Singapore, and the minority peoples of mainland Southeast Asia. Part three focuses on island Southeast Asia, dividing the area into three sections: Indonesia, the Philippines, and Borneo. In addition to offering a detailed study of the music of each area, it also offers recent perspectives on the gamelan and theater traditions of Indonesia. Questions for Critical Thinking at the end of each major section guide and focus attention on what issues musical and cultural arise when one studies the music of Southeast Asia, issues that might not occur in the study of other musics of the world. An accompanying compact disc offers musical examples from Southeast Asia.

The Garland Handbook of Southeast Asian Music , The Evolutionary Bases of Consumption Gad Saad, 2007-02-05. *The Evolutionary Bases of Consumption* by Gad Saad applies Darwinian principles in understanding our consumption patterns and the products of popular culture that most appeal to individuals. The first and only scholarly work to do so, this is a captivating study of the adaptive reasons behind our behaviors, cognitions, emotions, and perceptions. Thi
