## **The Oxfam Handbook Of Development And Relief Volume 2:**

**The Oxfam Handbook of Development and Relief** Deborah Eade, Suzanne Williams, 1995 This slipcase of three volumes offers an expression of Oxfam's fundamental principles that everyone has the right to an equitable share in the world's resources. It analyzes policy procedure and practice in health, human rights, emergency relief, and agricultural production. The Oxfam Handbook of Development and Relief (Volume 2). Oxfam, 1995. *The Oxfam Handbook of Development & Relief. Vol. 2* D. Eade, 1995.

**The Oxfam Handbook of Development and Relief** Deborah Eade, Oxfam, 1995. **Handbook of Development Policy Studies** Gedeon M. Mudacumura, M. Shamsul Haque, 2004-04-23. Considering the current challenges to human progress, this reference book examines recent theories, policies, and sectoral priorities, as well as various social, economic, and administrative factors that impact worldwide modernization and development. The book emphasizes the fact that communities must evaluate continuously and adjust their program.

*Non-Governmental Development Organizations and the Poverty Reduction Agenda* Jonathan Makuwira, 2013-12-04. The Non Governmental Development Organisations (NGDOs) have over the past two decades entered centre stage in their active participation in the social, political, and economic issues affecting both the developing and developed world. This book offers a highly stimulating and concise summary of the NGDO sector by examining their history and metamorphosis, their influence on the social, political, and economic landscapes of the Northern and Southern governments and societies. The author analyses competing theoretical and conceptual debates, not only regarding their contribution to the global social, political dynamism, but also on the sector's changing external influence as they try and mitigate poverty in marginalized communities. This book presents NGDOs as multidimensional actors propelled by the desire to make a lasting change but constrained by market-oriented approaches to development and other factors both internal and external to their environment. While a lot of attention has been given to understanding international NGDOs like World Vision, International Oxfam, Care International, and Plan International, this book offers a critical analysis of grassroots organizations, those NGDOs founded and established by locals and operate at the deepest end of the development contexts. This work will be of interest to students and scholars in a range of areas including Development Studies, International Organizations, and Globalization. At Risk Piers Blaikie, Terry Cannon, Ian Davis, Ben Wisner, 2014-01-21. The term natural disaster is often used to refer to natural events such as earthquakes, hurricanes, or floods. However, the phrase natural disaster suggests an uncritical acceptance of a deeply engrained ideological and cultural myth. *At Risk* questions this myth and argues that extreme natural events are not disasters until a vulnerable group of people is exposed. The updated new edition confronts a further ten years of ever more expensive and deadly disasters and discusses disaster not as an aberration but as a signal failure of mainstream development. Two analytical models are provided as tools for understanding vulnerability. One links remote and distant root causes to unsafe conditions in a progression of vulnerability. The other uses the concepts of access and livelihood to understand why some

households are more vulnerable than others Examining key natural events and incorporating strategies to create a safer world this revised edition is an important resource for those involved in the fields of environment and development studies

This title was first published in 2002 NGOs are receiving increasing international attention and resources from policy makers donors academics and others The New Policy Agenda accepts NGOs as agents for social welfare alongside the state and as fostering democracy in the Developing World Astonishingly however there have been very few studies and no books on NGO field workers This study of field workers in Bangladesh provides excellent insights into this neglected field Bangladesh is an excellent example as since independence in 1971 it has been a donor dependent country both financially and functionally and since the 1980s has concentrated this funding towards NGOs rather than to the state The book shows how field workers are seen simply as implementers carrying out directions given by their superiors and never being consulted on how best to achieve their goals The book examines four types of NGOs international national regional and small local in a number of sample locations It compares the benefits and facilities provided by each NGO to their field workers then explores the socio economic background of both field workers and their mid level managers and examines the interactions between these two groups and between field workers and their clients It also looks at the field workers personal and professional lives and problems and details their opinions on their NGO s activities and policies and on development The findings show that NGO managers and donors lack knowledge of the realities in the field and do not realise how certain policies such as their positive discrimination of women can have negative results It proposes that NGO field workers should be more active in policy making and puts forward several recommendations for changes in the management and structure of future NGOs

Humanitarianism and the Quantification of Human Needs Joël Glasman, 2020-01-06 This book provides a historical inquiry into the quantification of needs in humanitarian assistance Needs are increasingly seen as the lowest common denominator of humanity Standard definitions of basic needs however set a minimalist version of humanity both in the sense that they are narrow in what they compare and that they set a low bar for satisfaction The book argues that we cannot understand humanitarian governance if we do not understand how humanitarian agencies made human suffering commensurable across borders in the first place The book identifies four basic elements of needs As a concept as a system of classification and triage as a material apparatus and as a set of standards Drawing on a range of archival sources including the United Nations Refugee Agency UNHCR Médecins sans Frontières MSF and the Sphere Project the book traces the concept of needs from its emergence in the 1960s right through to the present day and United Nations Secretary General Ban Ki-moon's call for evidence based humanitarianism Finally the book assesses how the international governmentality of needs has played out in a recent humanitarian crisis drawing on field research on Central African refugees in the Cameroonian borderland in 2014-2016 This important historical inquiry into the universal nature of human suffering will be an important read for humanitarian researchers and practitioners as well as readers with an interest in international history and development
