Effective writing in English Mike Hannay, J. Lachlan Mackenzie, Herman Wekker, 2013-11-11. We learn to speak and understand our native language without any great effort for these are natural aspects of the maturation of every human being. The skills of reading and writing by contrast have to be learned usually in an educational context. Now when it comes to a foreign language all the skills speaking, understanding, reading and writing have to be learned; nothing can be acquired without considerable effort. This learning process does not take place in a vacuum; it is heavily influenced by our previous experience of acquiring our native language and learning to read and write it. These facts have been taken as the background to this book. We aim this book at native speakers of Dutch who have learned to read and write their own language and who now wish to add skill in writing English to their repertoire. Since this is our well-defined target group we will be continually pointing to those aspects of written English which differ from comparable aspects of written Dutch while also giving a complete guide to the writing process. There are two matters concerning the presentation of information in this book that require clarification in advance. Firstly the book contains hundreds of numbered examples.
