The Paths of the Perambulator Alan Dean Foster, 1985 The Paths of the Perambulator Alan Dean Foster, 2005-12-01 There goes the neighborhood Nobody wants to be around when a freak of supernature called a Perambulator enters the world bringing with it some really weird shifts in the fabric of existence like suddenly turning Jon Tom into a giant blue crab or Mudge the Otter into a nasty disease But the mad Perambulator is there to stay unless the wizard Clothahump can muster all his power and boot it into the next dimension So despite the bumbblings of Sorbl the drunken owl and the fitful runes of a koala amateur wizard Jon Tom Mudge and Clothahump make their way ever deeper into the realms where Chaos perambulates to find a deadly foe that only the combined forces of illogic can hope to defeat *The Paths of the Perambulator* Alan Dean Foster, 1986 **Spellsinger #05** Alan Dean Foster, 1993-04-01 **STACS 94** Patrice Enjalbert, Ernst W. Lectures in Parallel Computation Alan Gibbons,Paul Spirakis,1993-03-18 The foundations of parallel computation especially the efficiency of computation are the concern of this book Distinguished international researchers have

contributed fifteen chapters which together form a coherent stream taking the reader who has little prior knowledge of the field to a position of being familiar with leading edge issues The book may also function as a source of teaching material and reference for researchers The first part is devoted to the Parallel Random Access Machine P RAM model of parallel computation The initial chapters justify and define the model which is then used for the development of algorithm design in a variety of application areas such as deterministic algorithms randomisation and algorithm resilience The second part deals with distributed memory models of computation The question of efficiently implementing P RAM algorithms within these models is addressed as are the immensely interesting prospects for general purpose parallel computation Official Gazette of the United States Patent Office United States. Lee,Shin-ichi Nakano,Takeshi Tokuyama,2003-05-21 The abstracts and papers in this volume were presented at the Fifth Annual International Computing and Combinatorics Conference COCOON 99 which was held in Tokyo Japan from July 26 to 28 1999 The topics cover most aspects of theoretical computer science and combinatorics pertaining to computing In response to the call for papers 88 high quality extended abstracts were submitted internationally of which 46 were selected for presentation by the p gram committee Every submitted paper was reviewed by

at least three program committee members. Many of these papers represent reports on continuing search and it is expected that most of them will appear in a more polished and complete form in scientific journals. In addition to the regular papers, this volume contains abstracts of two invited plenary talks by Prabhakar Raghavan and Seinosuke Toda. The conference also included a special talk by Kurt Mehlhorn on LEDA: Library of Efficient Data types and Algorithms. The Hao Wang Award inaugurated at COCOON 97 is given to honor the paper judged by the program committee to have the greatest scientific merit. The recipients of the Hao Wang Award 1999 were Hiroshi Nagamochi and Toshio Ibaraki for their paper "An Approximation for Finding a Smallest 2-Edge Connected Subgraph Containing a Specified Spanning Tree".
