The Cult of Alien

Gods Jason Colavito, 2010-03-05 Fans of fantasy horror writer H P Lovecraft must add *The Cult of Alien Gods* H P Lovecraft and Extraterrestrial Pop Culture to their reading lists California Bookwatch Combining literary theory cultural criticism and muckraking Colavito aims to debunk alternative history He does a fair job of presenting his case using a great deal of textual analysis but believers will dismiss it as yet another attempt to suppress the truth while those who haven't been immersed in the literature are likely to be bewildered or indifferent the writing is engaging and the topic intriguing Publishers Weekly Nearly half of all Americans believe in the existence of extraterrestrials and many are also convinced that aliens have visited earth at some point in history Included among such popular beliefs is the notion that so called ancient astronauts visitors from outer space were responsible for historical wonders like the pyramids In *The Cult of Alien Gods* author Jason Colavito reveals for the first time that the entire genre of ancient astronaut books is based upon fictional horror stories whose author once wrote that he never wished to mislead anyone In this entertaining and informative book Colavito traces the origins of the belief in ancient extraterrestrial visitors to the work of horror writer H P Lovecraft 1890 1937 This amazing tale takes the reader through fifty years of pop culture and pseudoscience highlighting such influential figures and developments as Erich von Däniken *Chariots of the Gods* Graham Hancock *Fingerprints of the Gods* Zecharia Sitchin *Twelfth Planet* and the Raelian Revolution The astounding and improbable connections among these various characters are revealed along with the disturbing consequences of Lovecraft's little joke for modern science and public knowledge Beyond documenting Lovecraft's influence on ancient astronaut theories and Raelian cloning efforts Colavito also argues that the appeal of such modern myths is a troubling sign in an age when science is having its greatest success He suggests that at the dawn of the 21st century Western society is witnessing a deep seated erosion of Enlightenment values that are the basis of the modern world Jason Colavito is a freelance writer and editor who has written for *Skeptic* magazine among other publications

Ancient Mysteries Peter James, Nick Thorpe, 2007-12-18 What was the Minotaur Did a Welsh prince discover America Did Robin Hood really exist How does the Star of Bethlehem fit into the science of astronomy Is the Vinland Map a fake Can archaeologists use spirit messages to guide their work For centuries philosophers scientists and charlatans have attempted to decipher the baffling mysteries of our past from the Stonehenge to the lost continent of Atlantis Today however DNA testing radiocarbon dating and other cutting edge investigative tools together with a healthy dose of common sense are guiding us closer to the truth Peter James and Nick Thorpe the professional historian and archaeologist team who created the acclaimed *Ancient Inventions* now tackle these age old conundrums presenting the latest information from the scientific community and the most startling challenges to traditional explanations of mysteries such as The rise and fall of the Maya A lost cache of Dead Sea Scrolls The curse of Tutankhamun The devastation of Sodom and Gomorrah The Nazca Lines

These true mystery stories twist and turn like a good whodunit as James and Thorpe present the evidence for and against the expert theories shedding new light on humankind's age old struggle to make sense of the past. The authors also make dramatic contributions of their own to the fray demonstrating persuasively that catastrophic events including the collisions of comets with the Earth long ago could explain puzzles that have baffled experts for centuries. Ancient Mysteries will entertain and enlighten, delight the curious and inform the serious. *The Canopus Revelation* Philip Coppins, 2004 Links the star Canopus in the constellation Orion with the god Osiris, the Grail legend and alchemy. Proposes that Canopus enabled men to communicate with gods and enter other dimensions and shows how this connection is part of both Egyptian mythology and modern physics and describes the structure of the universe. **Stairway to Heaven** Peter Levenda, 2008-06-01 The idea of heavenly ascent while popularized in Jewish mysticism is neither a unique nor recent one. Expertly tracing its origins back to the ancient Middle East, Levenda unearths ascent literature in Africa, India and China, discerns a common connection in the heavens themselves and determines that this connection has been sorely neglected in contemporary scholarship. Because scholars treat the heavens as metaphorical, it is necessary to recreate the physical context of the culture under discussion in order to better understand it. For the benefit of the reader, Levenda offers two useful concepts for his investigative journey: a map whereby he means the cosmological system to better understand the mystical technologies of each culture investigated and a vehicle, the method by which the individual equipped with special knowledge is able to navigate the culture's particular cosmology. With these two tools, Levenda travels from the worlds of ancient Egypt and Babylon to the Hebrew Bible to Jewish and Christian kabbalists to Daoists in ancient China to Hindu Tantra and Haitian Vodoun and finally to nineteenth and twentieth century European occult societies. *Celestial Blessings from the Stars: Glowing Transmissions* Pasquale De Marco, 2025-04-24 Embark on a transformative journey through the cosmos with *Celestial Blessings from the Stars: Glowing Transmissions*, a book that unveils the profound energetic connections between celestial bodies and our lives. Beyond 2012: Catastrophe or Awakening? Geoff

Stray,2009-05-21 An illustrated encyclopedic overview of the prophecies calendars and theories that indicate the year 2012 is a threshold of great change for humanity Looks at the scientific and anthropological evidence for the rare galactic alignment due to occur in December 2012 Sifts through the catastrophic theories to show what we might really expect in 2012 In December of 2012 the Mayan Calendar s Great Cycle will come to an end Opinion remains divided as to whether apocalyptic scenarios of worldwide destruction or utopian visions of a spiritually renewed humanity will prevail after this key date has passed What is certain however is that a rare galactic alignment will occur one so unique that it is found at the core of many wisdom traditions from around the globe Geoff Stray has been collecting the vast amounts of data relating to the 2012 phenomena since 1982 Far from confining his research to the Maya who provide the most prominent predictions indicating this date will herald significant changes for humanity he has studied the prophetic traditions of other cultures including the Tibetan Chinese Jewish Ethiopian and tribal cultures from around the globe to show the kind of convergence of cosmic purposes happening along a number of parallel tracks This book offers an extensive study of many modern theories including Terence McKenna s timewave zero and Maurice Cotterell s sunspot research as well as anomalous phenomena such as near death experiences and crop circles Sifting through all the scientific research and speculation that the year 2012 has inspired Geoff Stray provides an encyclopedic look at what we might really expect on this pivotal date

The Night Sky, Updated and Expanded Edition Richard Grossinger,2014-09-30

Ever since Homo sapiens first looked up at the stars we as a species have been looking for meaning in the mysteries of the night sky Over the millennia as our knowledge science and technology developed the stories we told ourselves about the universe and our place in it developed as well In The Night Sky Richard Grossinger traces those developments covering multiple aspects of humanity s complex relationship to the cosmos Covering

not only astronomy but also cosmology cosmogony astrology and science fiction he offers us a revelatory look at the firmament through his own telescope fitted with an anthropological lens Throughout his explorations Grossinger continually reflects on the deeper meaning of our changing concepts about the universe and creation offering insight into how each new discovery causes us to redefine the values moralities and aesthetics by which we live He also calls into question the self aggrandizing notion that humanity can and will conquer all and injects our strident confidence in science with a healthy dose of humility and wonder Filled with poetic observation and profound questions *The Night Sky* is a brilliant reflection of humanity's relationship with the cosmos a relationship fed by longing doubt and awe
