BOOK JACKET Neuromechanics of Human Movement Roger M. Enoka, 2024-05 **Neuromechanics of Human Movement** Sixth Edition draws on the disciplines of neurophysiology and physics to explore how the nervous system controls the actions of muscles to produce human motion in relation to biomechanical principles The Biology of Tooth Movement Louis A. Norton, Charles J. Burstone, 1988-11-30 Written by a broad spectrum of dental medical and basic science researchers from around the world this book presents state of the art knowledge concerning the biology of connective tissues and their response to exogenous mechanical stimulation at the cell biology level The text goes well beyond the traditional morphologic descriptions of tooth movement covering the cell biology of the connective tissues involved the various in vitro and in vivo research models possible pharmacological means of influencing tissue responses and biophysical considerations Many cellular events that occur during tooth movement are discussed as well as the exciting challenges unanswered questions and possibilities in the future This publication is extremely relevant to the work of dental specialists in orthodontics pediatric dentistry and periodontics plus orthopedists and basic scientists working in connective tissue research

Neuromechanics of Human Movement-5th Edition Enoka, Roger M., 2015-02-24 **Neuromechanics of Human Movement** Fifth Edition draws on the disciplines of neurophysiology and physics to explore how the nervous system controls the actions of muscles to produce human motion This contemporary approach is much different from the traditional approach which focuses solely on mechanics and does not consider the role of the sensorimotor system in the control of human movement Authored by Roger Enoka a widely recognized and esteemed scholar in neuromechanics this influential text is an essential resource in biomechanics motor learning and applied physiology making complex information accessible to students

Gravitational Physiology J. Hideg, O. Gazonko, 2013-10-22 **Advances in Physiological Sciences Volume 19 Gravitational Physiology** covers the proceedings of the 28th International Congress of Physiological Sciences The volume presents studies that tackle the biological concerns caused by the interactions between complex living organisms and altered gravitational field The articles in the text are organized into parts based on their main theme The first part presents materials about the general problems when adapting to altered gravity system such as physiological mechanisms of adaptation of mammals to weightlessness and studies of biorhythms in biosatellite experiments In the next part the selection presents papers about metabolism and morphology that include stress metabolic aspects in space flight and the effect of spaceflight on human lymphocyte activation The text also covers the function and structure of gravity dependent systems along with hypokinesia and immobilization The book will be of great interest to health professionals involved in various space programs Firestein
