Social Amplification Of Risk

Carlo Jaeger

Social Amplification Of Risk:

The Social Amplification of Risk Nick Pidgeon, Roger E. Kasperson, Paul Slovic, 2003-07-10 This volume edited by three of the world's leading analysts of risk and its communication brings together contributions from a group of international experts working in the field of risk perception and risk communication. Key conceptual issues are discussed as well as a range of recent case studies spanning BSE and food safety, AIDS, HIV, nuclear power, child protection, Y2K, electromagnetic fields and waste incineration that take forward the state of the art in risk amplification theory. The volume also draws attention to lessons for public policy, risk management and risk communication practice. **Social Amplification of Risk**, 2012

The Social Amplification of Risk Roger E. Kasperson, 1988 **The Social Contours of Risk** Roger E. Kasperson, Jeanne Kasperson, 2022-02-15 We live in a risk society where the identification, distribution and management of risks from new technology, environmental factors or other sources are crucial to our individual and social existence. In *The Social Contours of Risk* Volumes 1 and 2, two of the world's leading and most influential analysts of the social dimensions of risk bring together their most important contributions to this fundamental and wide-ranging field. Volume II centres on the analysis and management of risk in society in international business and multinationals and globally. The acceptability of risk to an individual depends on the context, whether the larger society or, for example, a corporate framework. Their work clarifies the structures and processes for managing risks in the private sector and the factors that produce or impede effective decisions. The authors demonstrate that corporate culture is crucial in determining risk management. They analyse the transfer of corporate risk management systems from industrial to developing countries and how globalization is spreading and creating new kinds of risk: the combination of traditional and modern hazards presented by climate change, technology transfer and economic growth. They describe the new priorities and capacities needed to deal with these enhanced vulnerabilities around the globe. **Social Amplification of Risk** Judith Petts, Graham Murdock, Tom Horlick-Jones, 2001

Risk, Uncertainty, and Rational Action Carlo Jaeger, 2001 Risk as we now know it is a wholly new phenomenon, the by-product of our ever more complex and powerful technologies. In business policy making and in everyday life it demands a new way of looking at technological and environmental uncertainty. In this definitive volume, four of the world's leading risk researchers present a fundamental critique of the prevailing approaches to understanding and managing risk: the rational actor paradigm. They show how risk studies must incorporate the competing interests, values and rationalities of those involved and find a balance of trust and acceptable risk. Their work points to a comprehensive and significant new theory of risk and uncertainty and of the decision-making process they require. The implications for social, political and environmental theory and practice are enormous. Winner of the 2000-2002 Outstanding Publication Award of the Section on Environment and Technology of the American Sociological Association. Risk Management and Governance Terje Aven, Ortwin Renn, 2010-09-27 Risk is a popular topic in many sciences: in natural, medical, statistical, engineering, social, economic and legal

disciplines Yet no single discipline can grasp the full meaning of risk Investigating risk requires a multidisciplinary approach The authors coming from two very different disciplinary traditions meet this challenge by building bridges between the engineering the statistical and the social science perspectives The book provides a comprehensive accessible and concise guide to risk assessment management and governance A basic pillar for the book is the risk governance framework proposed by the International Risk Governance Council IRGC This framework offers a comprehensive means of integrating risk identification assessment management and communication The authors develop and explain new insights and add substance to the various elements of the framework The theoretical analysis is illustrated by several examples from different areas of applications

Risk communication the evolution of attempts Risk communication is at once a very new and a very old field of interest Risk analysis as Krimsky and Plough 1988 2 point out dates back at least to the Babylonians in 3200 BC Cultures have traditionally utilized a host of mechanisms for anticipating responding to and communicating about hazards as in food avoidance taboos stigma of persons and places myths migration etc Throughout history trade between places has necessitated labelling of containers to indicate their contents Seals at sites of the ninth century BC Harappan civilization of South Asia record the owner and or contents of the containers Hadden 1986 3 The Pure Food and Drug Act the first labelling law with national scope in the United States was passed in 1906 Common law covering the workplace in a number of countries has traditionally required that employers notify workers about significant dangers that they encounter on the job an obligation formally extended to chronic hazards in the OSHA s Hazard Communication regulation of 1983 in the United States In this sense risk communication is probably the oldest way of risk management However it is only until recently that risk communication has attracted the attention of regulators as an explicit alternative to the by now more common and formal approaches of standard setting insuring etc Baram 1982 Risk Communication and the Social Amplification of Risk Ortwin Renn,2010
