Psychology and School Social Work The Quality of American Life Angus Campbell, Philip E. Converse, Willard L. Rodgers, 1976-03-25 Considers how Americans define the quality of their life experiences as expressed in their perceptions evaluations and satisfactions Based on research conducted by the Institute for Social Research at the University of Michigan the book uses data which are representative of the national population eighteen years of age and older and employs the major social characteristics of class age education and income The authors cover such topics as the residential environment the experience of work marriage and family life and personal resources and competence They also report on the situation of women and the quality of the life experience of black people *Social Change in a Metropolitan Community* Otis Dudley Duncan, Beverly Duncan, Howard Schuman, 1974-05-06 How has American society changed over the last fifteen years Do we raise our children differently now than in 1953 Has women's liberation produced a shift in attitudes toward marriage or altered our idea about appropriate activities for women Have our attitudes toward race undergone a significant revision In this challenging volume three eminent sociologists examine questions like these in the light of hard data which have become available year by year over the last two decades The major purpose of the book is to demonstrate how measures of social change can be developed capitalizing on past efforts in survey research An omnibus survey carried out in 1971 was designed almost entirely as a selective repetition of questions originally asked in the 1950s It provides precise and reliable measures of change in such areas as marital and sex roles social participation child rearing religious behavior political orientations and racial attitudes Lucid and authoritative *Social Change in a Metropolitan Community* presents a unique body of information on changes in public opinion social norms and institutional behavior Its large number of statistical measurements are presented in an extremely accessible form almost always as simple percentage comparisons The research findings included here are unduplicated by any other study and as a source of information on current social trends they provide fascinating reading for anyone who wishes to enlarge his understanding of the temper of our times **Social Indicator Models** Kenneth C. Land, Seymour Spilerman, 1975-02-14 Deals in comprehensive fashion with a diverse array of objective and subjective social indicators and shows how these indicators can be used potentially to inform and perhaps guide social policy Written with clarity and authority it will be of paramount interest to those concerned with the interpretation and analysis of social indicators and to those interested in their use For the former it serves as an illuminating introduction to some of the analytical tasks that lie ahead in the study of social indicators For the latter it provides a solid foundation upon which future policy analysis may be based **Historical Social Psychology** Kenneth Gergen, Mary Gergen, 2014-01-27 The vast majority of research in social psychology focuses on momentary events an attitude is changed dissonance is reduced a cognition is primed and so on Little attention is paid to the unfolding of events over time to social life as an ongoing process in which events are related in various ways as life unfolds Originally published in 1984 *Historical Social Psychology* opens a space for theory and research in which temporal process is central Contributors to this broad ranging work provide a rich range of

perspectives from the theoretical to the methodological from micro sequences to the life span and from contemporary history to the long dur e Together these authors set the stage for a major shift in the focus of social psychological inquiry Catalog of Copyright Entries.
