By necessity, Pacific Islands have become hubs of innovation, where climate strategies are piloted and refined to inform adaptation efforts globally. Pacific Island ecosystems are being degraded by pollution, overfishing, and unsustainable development. They also increasingly face severe climate impacts including sea-level rise, changing temperature and rainfall patterns. These impacts result in changes in food and water security, loss of identity, climate-induced migration and threats to sovereignty. In response, communities in the region are leading climate adaptation strategies, often combining traditional practices and cutting-edge science, to build the resilience of their communities and ecosystems in the face of increasing climate risk. For example, communities are implementing resilient networks of marine protected areas using the best available science and strengthening tribal governance to manage these networks, experimenting with salt and drought tolerant crops, revegetating coastlines with native salt-tolerant plants, revitalizing traditional wells, and implementing climate-smart development plans. Often these efforts contribute to local development priorities and create co-benefits for multiple sustainable development goals (SDGs). These community efforts are being scaled up through provincial and national policies that reinforce the critical role that ecosystems play in climate adaptation and provide a model for the rest of the world. While adaptation efforts are critical to help communities cope with climate impacts, in some cases, they will be insufficient to address the magnitude of climate impacts and local development needs. Thus, there are inherent trade-offs and limitations to climate adaptation with migration being the last resort for some island communities.

Keywords: small island developing states (SIDS), climate change, Pacific Islands, vulnerability, adaptation, ecosystem-based adaptation

INTRODUCTION

The Pacific Islands are facing devastating impacts of climate change including increasing droughts and water scarcity, coastal flooding and erosion, changes in rainfall that affect ecosystems and food production, and adverse impacts to human health (IPCC, 2014, 2018).

Overpopulation, pollution and overuse of natural resources (e.g., overfishing and intensive land and water use), and unsustainable development and mining are also degrading island ecosystems

Social Change In The Pacific Islands:

Social Change In The Pacific Isl Robillard,2020-02-21 First published in 1992 The Pacific Ocean is the largest geographical feature on the face of the earth covering about one third of its entire surface Occupying part of that large expanse are the far flung islands of the Pacific As the papers of this volume clearly indicate the post world war II era and decolonization have brought unprecedented change and the Pacific is now experiencing problems that were formerly associated with other Third World nations Most Pacific countries have rapidly expanding populations and over half of all Pacific Islanders are now in their teenage years or younger Education and modern communications have served to increase aspirations and attracted by hopes of employment and the distractions of urban life islanders are gravitating to urban centers

Social Change and Psychosocial Adaptation in the Pacific Islands Anthony J. Marsella,Ayda Aukahi Austin,Bruce Grant,2006-05-31 The Pacific Island oceanic and rim nations include many traditional societies and emerging nations that have experienced abusive histories of colonization exploitation and social change and upheaval Their peoples are struggling to restore traditional cultural heritages and identities in a world community dominated by Western values and lifestyles The conflicts uncertainties and instability of this transitional time are reflected in these populations current social and psychological difficulties This volume is one of the few devoted to these issues and covering a range of problems including substance abuse hopelessness violence crime abuse juvenile delinquency suicide and AIDS Family Violence and Social Change in the Pacific Islands Lois Bastide,Denis Regnier,2022-09-23 The Pacific Islands have some of the highest rates of family violence in the world Addressing the contemporary mutations of Pacific Island families and the shifting understandings of violence in the context of rapid social change this book investigates the conflict dynamics generated by these transformations The contributors draw from detailed case studies in a range of Pacific territories to examine family violence in relation to the social economic and political situation of native populations as well as individual collective and institutional responses to the development of violence within and upon the family They focus on vernacular understandings conflicting social norms the emergence of different types of violent patterns the impact of violence on individuals and communities and local attempts at mitigating or combating it Combining ethnographic expertise with engaged scholarship this volume offers a vivid account of ongoing social change in Pacific Island societies and a crucial contribution to the understanding of family violence as a social process cultural construct and political issue This book will appeal to scholars with interests in the sociology of violence and the family Pacific studies development studies and the social and cultural anthropology of Oceania

Globalization and Culture Change in the Pacific Islands Victoria S. Lockwood,2004 Offering insight into the major changes that are taking place in the context of increasing globalization in Pacific Island societies the authors seek to ground globalization in concrete real life cases of communities that are dealing with specific processes of globalization and formulating their own responses in their own cultural terms The case studies presented reflect the many different cultural

contexts of island societies as they deal with global politics nation states and ethnic conflict global economic integration and transnationalism evolving identities and cultural representations changes in patterns of social and community relations and increasing integration into global religions For anyone interested in the effects of globalization on the peoples and cultures of the Pacific

Globalisation and Governance in the Pacific Islands Stewart Firth,2006-12-01 The Pacific Islands are feeling the effects of globalisation

Free trade in sugar and garments is threatening two of Fiji s key industries At the same time other opportunities are emerging Labour migration is growing in importance and Pacific governments are calling for more access to Australia s labour market Fiji has joined Samoa Tonga Tuvalu and Kiribati as a remittance economy with thousands of its citizens working overseas Meantime Papua New Guinea and Solomon Islands grapple with an older kind of globalisation in which overseas companies exploit mineral and forest resources The Pacific Islands confront unique problems of governance in this era of globalisation The modern democratic state often fits awkwardly with traditional ways of doing politics in that part of the world Just as often politicians in the Pacific exploit tradition or invent it to serve modern political purposes The contributors to this volume examine Pacific globalisation and governance from a wide range of perspectives They come from Papua New Guinea Solomon Islands Hawai i the Federated States of Micronesia Samoa Fiji New Zealand and Jamaica as well as Australia Publisher s description

Home in the Islands Jan Rensel,Margaret Rodman Critchlow,1997-09-01 Ordinary houses have extraordinary stories to tell For more than a century anthropologists have been recording these sagas in an attempt to uncover humanity s relationship with the common dwelling Fundamental to the interaction of humans and housing is the way people shape their living spaces even redefining their purposes and meanings their houses in turn influence how people live their lives and perpetuate the cultural structures that produced a given form of shelter The stories draw attention to colonial and missionary agendas local and global economies environmental disasters cultural identities social connections and family continuity as well as personal choices And as the chapter on homeless Hawaiians shows even those without houses have stories to tell Anthropologists architects environmental designers geographers and historians will welcome this diverse volume on a neglected yet important aspect of change in the lives of Pacific Islanders
