## **The Passionate Mind Sources Of Destruction And Creativity:**

*The Passionate Mind* Robin Fox, Ashley Montagu, 1999-05 Consciousness declares Robin Fox is out of context Useful as an adaptation in the Stone Age it brought humanity to the top of the food chain but has now created a world it cannot control The *Passionate Mind* explores this paradox not through academic demonstration but through satiric dialogues blank verse ruminations lyric narrative comic verse Aesopian fables This mix of genres styles forces us out of our usual linear modes of thinking to confront a harsh thesis Because of consciousness we cannot operate without ideas but once in thrall to ideas whether of love power religion or ideology we cannot operate without destructiveness lest we become imprisoned by them The range of subjects genres Fox covers includes a verse summary of the key points of human evolution a conference of farm animals ruminating on their social problems visions of a desperate future from a neolithic hunter a shaman at Lascaux Kafkaesque trial scenes a new version of God is dead George Washington having lost at Yorktown is put on trial with Adams Jefferson Benedict Arnold giving evidence Through the persona of Humbert Humbert as decadent Europe the new world of Lolita America is faced with the consequences of its pursuit of happiness Scandinavian utopianism salvation through romantic eros get their turn the basic design failure of humanity is examined in a Platonic dialogue A bullfight the struggle for existence in New Jersey farming lead up to a monologue from a decidedly unlikely Jesus who turns out to be part of an alien plan to control an otherwise out of control human race Through this kaleidoscopic mix Fox mounts a case for a thorough revision of consciousness that breaks realistic boundaries between science the humanities religion myth

The Tribal Imagination Robin Fox, 2011-07-01 Fox traces our ongoing struggle to maintain open societies in the face of profoundly tribal human needs that paradoxically hold the key to our survival This latest book ranges from incest and arranged marriage to poetry and myth from human rights and vengeance to pop icons such as Seinfeld

**The Eco-Self in Early Modern English Literature** Elizabeth Gruber, 2025-10-01 The *Eco Self in Early Modern English Literature* tracks an important shift in early modern conceptions of selfhood arguing that the period hosted the birth of a new subset of the human the eco self which melds a deeply introspective turn with an abiding sense of humans embedment in the world A confluence of cultural factors produced the relevant changes Of paramount significance was the rapid spread of literacy in England and across Europe reading transformed the relationship between self and world retooled moral reasoning and even altered human anatomy This book pursues the salutary possibilities including the ecological benefits of this redesigned self by advancing fresh readings of texts by William Shakespeare Christopher Marlowe John Webster and Margaret Cavendish The eco self offers certain refinements to ecological theory by renewing appreciation for the rational deliberative functions that distinguish humans from other species

The Character of Human Institutions Michael Egan, 2017-07-28 This volume celebrates the life and work of Robin Fox and the idea of a biosocial science From his early studies of kinship primates the brain evolution the incest taboo and aggression to his later work on literature politics civilization law the Bible Shakespeare

and the history of ideas Robin Fox inspired many with an evolutionary vision of humanity that goes beyond narrow disciplinary boundaries and embraces the universal history of mankind Fox's work represents an independent biosocial science stream of thinking that accepts the Darwinian mandate while avoiding reductionism by recognizing culture as a natural phenomenon The essays cover Fox's life and his contributions and address topics as diverse as the meaning and function of laughter the unforgiving discipline of writing popular anthropology extreme drinking rituals among young men training for the British army Darwin and close cousin marriage the universal essence of the epic form as a super attractor anthropologists autobiographies the conflict between science and anti science and the decline of British imperial education This engaging collection on a mainstream maverick has been edited by Michael Egan It includes essays by Sir Antony Jay Lionel Tiger Howard Bloom Michael McGuire Kate Fox Melvin Konner Alan Macfarlane Adam Kuper Dieter Steklis Alexandra Maryanski Bernard Chapais Jonathan Turner Linda Stone Charles Macdonald Anne Fox David Jenkins Frederick Turner Robert Trivers and an essay by Robin Fox himself [Renaissance Ecopolitics from Shakespeare to Bacon](#) Elizabeth Gruber, 2017-06-14 The work of Shakespeare and his contemporaries has often been the testing ground for innovations in literary studies but this has not been true of ecocriticism This is partly because until recently most ecologically minded writers have located the origins of ecological crisis in the Enlightenment with the legacies of the Cartesian cogito singled out as a particular cause of our current woes Traditionally Renaissance writers were tacitly or occasionally overtly presumed to be oblivious of environmental degradation and unaware that the episteme the conceptual edifice of their historical moment was beginning to crack This perception is beginning to change and Dr Gruber's work is poised to illuminate the burgeoning number of ecocritical studies devoted to this period in particular by showing how the classical concept of the cosmopolis which posited the harmonious integration of the Order of Nature cosmos with the Order of Society polis was at once revived and also systematically dismantled in the Renaissance Renaissance Ecopolitics from Shakespeare to Bacon Rethinking Cosmopolis demonstrates that the Renaissance is the hinge the crucial turning point in the human nature relationship and examines the persisting ecological consequences of the nature state's demise [Current contents Arts and Humanities](#), 2002 **Diaspora**, 1999 **American Book Publishing Record**, 1999 **Psychological Jurisprudence** Bruce A. Arrigo, 2012-02-01 Psychological jurisprudence or the use of psychology in the legal realm relies on theories and methods of criminal justice and mental health to make decisions about intervention policy and programming While the intentions behind the law psychology field are humane the results often are not This book provides a radical agenda for psychological jurisprudence one that relies on the insights of literary criticism psychoanalysis feminist theory political economy analysis postmodernism and related strains of critical thought Contributors reveal the roots of psycholegal logic and demonstrate how citizen justice and structural reform are displaced by so called science and facts A number of complex issues in the law psychology field are addressed including forensic mental health decision making parricide competency to stand trial

adolescent identity development penal punitiveness and offender rehabilitation In exploring how the current resolution to these and related controversies fail to promote the dignity or empowerment of persons with mental illness this book suggests how the law psychology field can meaningfully contribute to advancing the goals of justice and humanism in psycholegal theory research and policy **Anthropology News** ,2000 **Resist Everything Except Temptation** Kristian

Williams,2020-06-02 Oscar Wilde is remembered as a wit and a dandy as a gay martyr and as a brilliant writer but his philosophical depth and political radicalism are often forgotten Resist Everything Except Temptation locates Wilde in the tradition of left wing anarchism and argues that only when we take his politics seriously can we begin to understand the man his life and his work Drawing from literary historical and biographical evidence including archival research the book outlines the philosophical influences and political implications of Wilde s ideas on art sex morality violence and above all individualism Williams raises questions about the relationships between culture and politics between utopian aspirations and practical programs and between individualism group identity and class struggle The resulting volume represents not merely a historical curiosity but a contribution to current debates within political theory and a salvo in the broader culture wars

**Anarchism** George Woodcock,2018-09-03 Whoever denies authority and fights against it is an anarchist said Sebastien Faure The definition is tempting in its simplicity but simplicity is the first thing to guard against in writing a history of anarchism Few doctrines or movements have been so confusedly understood in the public mind and few have presented in their own variety of approach and action so much excuse for confusion These are the opening sentences of this book which brilliantly effaces confusion by providing a critical history of anarchist thought and practice Mr Woodcock traces the development of anarchism from its earliest appearances and the rise and fall of anarchism as a movement aiming at practical social changes during the nineteenth and twentieth centuries He discusses the ideas of the principal anarchist thinkers Godwin Proudhon Bakunin Kropotkin Tolstoy among others and explains the various forms anarchist individualism anarchist communism anarcho syndicalism that anarchist proposals for change have taken The development of anarchist organizations the various forms peaceful and violent of anarchist political action in Europe and America the reasons for the appeal of anarchism at certain periods and to certain people all these are given full treatment in Mr Woodcock s comprehensive work which closes with a discussion of the causes of anarchism s failure as a movement and with a consideration of whether there are any elements in anarchist thought that despite the failure of anarchism as a political panacea may still be worth preserving in the modern world The essential introduction to the classical anarchist thinkers Mark Leier Director Centre for Labour Studies Simon Fraser University Choice ,1999 International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences ,2000 **Left in the Past** Alastair Bonnett,2010-05-06 This book looks at the role nostalgia plays in the radical imagination to offer a new guide to the history and politics of the left In Left in the Past Bonnett re assesses the place of nostalgia within radical politics and in doing so

provides a new introduction to the history and politics of the left Bonnett argues that nostalgia has been a chronic but repressed aspect of the socialist imagination Left in the Past is premised on the idea that in our post socialist era the relationship between radicalism and a sense of loss and the ambivalent position of socialism in and against modernity can be viewed with greater clarity In Section One of the book Bonnett shows the centrality and repression of nostalgia in both 19th century radicalism and anti colonial radicalism In Section Two he explores the consequences of this inheritance by way of 20th century and contemporary studies of revolutionary intellectuals and intellectual culture Bonnett s unique approach in how to understand the left in an age of post socialism will make book a needed resource for anyone interested in the history and politics of the left and radicalism     Anarchism Robert Graham,1970     *Russian Philosophy, Volume 1* James M. Michael Forman, 1998-02-13 The resurgence of nationalism accompanying the decline of Communism has been taken to indicate the failure of socialist theory to grasp the nature of this phenomenon Against both those who argue that the radical tradition has ignored and underestimated nationalism and those who accuse it of economic reductionism this careful analysis of the idea of the nation as it was developed in the work of the major thinkers of the international labor movement reveals evidence of how seriously they grappled with nationalism Each of the main sections of the book focuses on the most influential theorists of the international labor movement as it became organized and grew Bakunin Marx and Engels and the concern of the First International 1864 1876 with class solidarity across political borders Lenin Luxemburg and Bauer and the preoccupation of the Second International 1889 1914 with socialism in ethnically plural societies Stalin and Gramsci in relation to the substitution by the Third International 1919 1943 of nation building and national liberation for the old class project In the conclusion the author examines the relationships among ethnic and civic nationality national self determination republican institutions and the process of globalization from the perspective of the post Soviet era and in the light of social theory and Kant s ideas about cosmopolitan right
