The Passions And The Interests Political Arguments For Capitalism Before Its Triumph:

The Passions and the Interests Albert O. Hirschman.1981 The passions and the interests: political arguments for capitalism before its triumph Albert Otto Hirschman, 1981 The Passions and the Interests Albert O. The Passion and the Interests: Political Arguments for Capitalism Before Its Triumph Albert O. Hirschman, 1978 Hirschman, 1977 Research Handbook on Critical Legal Theory Emilios Christodoulidis, Ruth Dukes, Marco Goldoni, 2019 Critical theory characteristically linked with the politics of theoretical engagement covers the manifold of the connections between theory and praxis This thought provoking Research Handbook captures the broad range of those connections as far as legal thought is concerned and retains an emphasis both on the politics of theory and on the notion of theoretical engagement The first part examines the question of definition and tracks the origins and development of critical legal theory along its European and North American trajectories The second part looks at the thematic connections between the development of legal theory and other currents of critical thought such as Feminism Marxism Critical Race Theory varieties of post modernism as well as the various turns ethical aesthetic political of critical legal theory. The third and final part explores particular fields of law addressing the question how the field has been shaped by critical legal theory or what critical approaches reveal about the field with the clear focus on opportunities for social transformation **Economic Growth from David Hume to the Present** W. W. Rostow, 1992-09-24 This history of theories and theorists of economic growth elucidates the economic theory economic history and public policy observations of the renowned scholar W W Rostow Looking at the economic growth theories of the classic economists up to 1870 Rostow compares Hume and Adam Smith Malthus and Ricardo and J S Mill and Karl Marx He then examines the period 1870 1939 and its economic theorists including Schumpeter Colin Clark Kuznets and Harrod and surveys the three forms of growth analysis in the postwar era formal models statistical morphology and development theories This authoritative overview also includes an agenda of unresolved problems in growth analysis and a description of the five major tasks statesmen will confront over the next several generations **Adam Smith and the Economy of the Passions** Jan Horst Keppler, 2010-07-14 This book links economic theory information theory and several psychoanalytic notions to show how Adam Smith provides the psychological determinants of human behaviour from which market economics arises as an imperfect but inevitable consequence The Nanxun Legacy and China's Development in the Post-Deng Era John Wong, Yongnian Zheng, 2001 In the spring of 1992 Deng Xiaoping made a historical tour of south China popularly known as the Nanxun southern tour During the tour he boldly called for more radical economic reform and further opening up of China The Nanxun has become a political landmark in the history of the People's Republic of China much like great events such as the Great Leap Forward the Cultural Revolution and the 1989 Tiananmen crackdown Deng Xiaoping has left his own legacy for the country The Nanxun belongs to Deng just as the 1911 revolution belongs to Sun Yat sen and the communist revolution to Mao Zedong In this collection of articles leading

China scholars and experts analyze how the Nanxun has sparked off dynamic economic growth in China and drastically changed the political and social landscape of the country Psychology and History Cristian Tileagă, Jovan Byford, 2014-02-20 Exploring the relationship between psychology and history this book considers how the disciplines could benefit from a closer dialogue The American Experiment and the Idea of Democracy in British Culture, 1776-1914 Ruth Livesey, 2016-04-01 In nineteenth century Britain the effects of democracy in America were seen to spread from Congress all the way down to the personal habits of its citizens Bringing together political theorists historians and literary scholars this volume explores the idea of American democracy in nineteenth century Britain The essays span the period from Independence to the First World War and trace an intellectual history of Anglo American relations during that period Leading scholars trace the hopes and fears inspired by the American model of democracy in the works of commentators including Thomas Paine Mary Wollstonecraft Alexis de Tocqueville Charles Dickens John Stuart Mill Richard Cobden Charles Dilke Matthew Arnold Henry James and W T Stead By examining the context of debates about American democracy and notions of culture citizenship and race the collection sheds fresh light on well documented moments of British political history such as the Reform Acts the Abolition of Slavery Act and the Anti Corn Law agitation The volume also explores the ways in which British Liberalism was shaped by the American example and draws attention to the importance of print culture in furthering radical political dialogue between the two nations As the comprehensive introduction makes clear this collection makes an important contribution to transatlantic studies and our growing sense of a nineteenth century modernity shaped by an Atlantic exchange It is an essential reference point for all interested in the history of the idea of democracy its political evolution and its perceived cultural consequences Individualism Alexander Somek, 2008-03-20 This innovative study examines the authority constituting the European Union It claims that the type of power constituting a transnational regime transcends traditional forms of constitutional legality It argues that the European constitutional project is out of step with the normative make up of such a regime It is to be feared indeed that the adoption of a Constitution for Europe would create a smokescreen obscuring a new and disturbing reality Drawing on the ancient tradition of linking different types of political power with the composition of the citizen's soul the book explains that a transnational regime is based on an understanding of citizenship that is different from that underlying a constitutional democracy Citizens are deemed to be essentially separate from one another They abandon the larger society to itself and pursue their good in the private sphere In place of trust and reliance in their own power to bring about change through common action they hope to benefit from entrusting problem solving to international networks of expertise Essentially citizens of this kind exhibit a strong commitment to individualism The book shows how individualism is reflected in the regulatory authority that the Union claims for itself in particular as regards the regulation of the internal market Text, Image, and the Problem with Perfection in Nineteenth-Century France Daniel Sipe, 2016-04-01 In the decades after the French Revolution philosophers artists and social scientists set out to chart

and build a way to a new world and their speculative blueprints circulated like banknotes in a parallel economy of ideas Examining representations of ideal societies in nineteenth century French culture Daniel Sipe argues that the dream image of the literary or art historical utopia does not disappear but rather is profoundly altered by its proximity to the social utopianism of the day Sipe focuses on this persistent afterlife in utopias ranging from Fran ois Ren de Chateaubriand s Amerindian utopia in Atala 1801 to the utopian spoof of J J Grandville s illustrated novel Un autre monde 1844 He proposes a new reading of Etienne Cabet's seminal utopian novel Voyage en Icarie 1840 and offers an original perspective on the gendered utopias of technological inspiration that authors such as Charles Barbara and Auguste Villiers de l Isle Adam penned in the second half of the century In addition Sipe considers utopias or important readings of the century's rampant utopianism in among others Victor Hugo Alfred de Vigny Th ophile Gautier Charles Baudelaire and Gustave Courbet His book provides the historical context for comprehending the significance and implications of this enigmatic afterlife in nineteenth century utopian art and literature The Poverty of Disaster Tawny Paul,2019-10-17 Examines debt insecurity in eighteenth century Britain a period of famously rapid economic growth when many people nevertheless experienced financial failure

Principle and Interest Herbert E. Sloan, 2001 Eloquently written and exhaustively researched Principle and Interest provides a unique perspective on a range of topics revolutionary ideology political economy the mechanics of party Spaces for Feeling Susan Broomhall, 2015-03-05 Spaces for organization central to an understanding of the period Feeling explores how English and Scottish people experienced sociabilities and socialities from 1650 to 1850 and investigates their operation through emotional practices and particular spaces. The collection highlights the forms practices and memberships of these varied spaces for feeling in this two hundred year period and charts the shifting conceptualisations of emotions that underpinned them The authors employ historical literary and visual history approaches to analyse a series of literary and art works emerging forms of print media such as pamphlet propaganda newspapers and periodicals and familial and personal sources such as letters in order to tease out how particular communities were shaped and cohered through distinct emotional practices in specific spaces of feeling This collection studies the function of emotions in group formations in Britain during a period that has attracted widespread scholarly interest in the creation and meaning of sociabilities in particular From clubs and societies to families and households essays here examine how emotional practices could sustain particular associations create new social communities and disrupt the capacity of a specific cohort to operate successfully This timely collection will be essential reading for students and scholars of the history of emotions The Cambridge Companion to the Victorian Novel Deirdre David, 2001 In The Cambridge Companion to the Victorian Novel first published in 2000 a series of specially commissioned essays examine the work of Charles Dickens the Bront's George Eliot and other canonical writers as well as that of such writers as Olive Schreiner Wilkie Collins and H Rider Haggard whose work has recently attracted new attention from scholars and students The collection combines the literary study of the novel

as a form with analysis of the material aspects of its readership and production and a series of thematic and contextual perspectives that examine Victorian fiction in the light of social and cultural concerns relevant both to the period itself and to the direction of current literary and cultural studies Contributors engage with topics such as industrial culture religion and science and the broader issues of the politics of gender sexuality and race The Companion includes a chronology and a comprehensive guide to further reading Historicizing Self-Interest in the Modern Atlantic World Christine Zabel. 2021-03-15 This volume historicizes the use of the notion of self interest that at least since Bernard de Mandeville and Adam Smith s theories is considered a central component of economic theory Having in the twentieth century become one of the key features of rational choice models and thus is seen as an idealized trait of human behavior self interest has despite Albert O Hirschman's pivotal analysis of self interest only marginally been historicized A historicization's of self interest however offers new insights into the concept by asking why when for what reason and in which contexts the notion was discussed or referred to how it was employed by contemporaries and how the different usages developed and changed over time This helps us to appreciate the various transformations in the perception of the notion and also to explore how and in what ways different people at different times and in different regions reflected on or realized the act of considering what was in their best interest The volume focuses on those different usages knowledges and practices concerned with self interest in the modern Atlantic World from the seventeenth to twentieth centuries by using different approaches including political and economic theory actuarial science anthropology or the history of emotions Offering a new perspective on a key component of Western capitalism this is the ideal resource for researches and scholars of intellectual political and economic history in the modern Atlantic World The French Enlightenment and the Emergence of Modern Cynicism Sharon A. Stanley, 2012-03-19 Sharon A Stanley chronicles the emergence of a recognizably modern form of cynicism during the French Enlightenment by discussing the work of philosophers such as Denis Diderot and Jean Jacques Rousseau While recent scholarly and popular commentary has depicted cynicism as a novel contemporary phenomenon that threatens healthy democratic functioning this book shows that cynicism has much earlier roots and may contribute to the health of democracies Rethinkina Third-World Politics James Manor, 2014-05-12 Providing a thorough reassessment of our understanding of politics in Third World societies this book contains some of the liveliest and most original analyses to have been published in recent years The severity of the political and economic crisis throughout Africa Asia and Latin America in the 1980s has highlighted the inadequacy of existing political science theories and the urgent need to provide new paradigms for the 1990s The Project of Positivism in International Law Mónica García-Salmones Rovira, 2013-11-28 International legal positivism has been crucial to the development of international law since the nineteenth century It is often seen as the basis of mainstream or traditional international legal thought The Project of Positivism in International Law addresses this theory in the long standing tradition of critical intellectual histories of international law It provides a nuanced analysis of the resilience of the

economic positivist theory and shows how influential its role was in shaping the modern frameworks of international law The book argues that the rise of positivist international law was inseparable from philosophical developments placing the notion of conflict of interests at the centre of collective life Where previously international thought was dominated by notions of the right the just and the good increasingly international relations became viewed as interests in need of harmonisation In this context international law was re founded as the universal law that could harmonise the interests of both public and private international entities The book argues that these evolutions in philosophical thought were bound up with the consolidation of capitalism and with the ideas about human existence and human nature which emerged in that process It provides an innovative analysis of the selected biography of ideas which it presents including a detailed focus on the work of Hans Kelsen one of the leading positivist thinkers of the twentieth century It also argues that the work of Lassa Oppenheim should be included within this analysis as providing some of the key founding texts of positivism in international law This book will be a fascinating read for scholars and students of international legal theory historians of ideas and legal philosophers
