Gunaratana,2016-01-01 In the oldest scriptures of Theravada Buddhism much attention is given to the jhanas high levels of meditative attainment distinguished by powerful concentration and purity of mind Ven Dr Gunaratana examines these jhanas within the context of Buddhist teaching as a whole and particularly within the meditation disciplines taught by the Buddha Beginning with the ethical foundation for meditation the role of the teacher the classical subjects of meditation and the appropriateness of these subjects to individual practitioners the author traces the practice of meditation to the higher reaches of realization The eight stages of jhana are individually analyzed and explained in terms of their relation to one

another and to the ultimate goal of the teaching. The author makes the critical distinction between the mundane jhanas and supermundane jhanas pointing out that the lower four while leading to various mental powers and psychic attainments are not necessary to full enlightenment and may be developed or bypassed as the meditator wishes. The author goes on to explain the place of the jhanas among the accomplishments of an arahat and elucidate their usefulness for a dedicated meditator. Dompere,2012-08-28 The monograph is about a meta theory of knowledge production process and the logical pathway that connects the epistemic possibility to the epistemic reality It examines the general conditions of paradigms for information processing and isolates the classical and fuzzy paradigms for comparative analysis The sets of conditions that give rise to them are defined stated and analyzed to abstract the corresponding sets of laws of thought The fuzzy paradigm with its corresponding logic and mathematics is related to inexact symbolism for the defective information structure where the results of the knowledge production must satisfy the epistemic conditionality composed of fuzzy conditionality and fuzzy stochastic conditionality under the principle of logical duality with continuum The classical paradigm with its corresponding logic and mathematics is related to exact symbolism for exact information structure where the vagueness component of the defectiveness is assumed away and where the results of the knowledge production must satisfy no epistemic conditionality or at the maximum only the stochastic conditionality under the principle of logical dualism with excluded middle It is argued that the epistemic path that links ontological space to the epistemological space is information The ontological space is taken as the primary category of reality while the epistemological space is shone to be a derivative Such information is universally defective and together with assumptions imposed guides the development of paradigms with their laws of thought logic of reasoning mathematics and computational techniques The relational structure is seen in terms of logical trinity with a given example as matter information energy transformational trinity which is supported by the time trinity of past present future relationality The book is written for professionals researchers and students working in philosophy of science decision choice theories economies sciences computer science engineering cognitive psychology and researchers working on or interested in fuzzy paradigm fuzzy logic fuzzy decisions and phenomena of vagueness and ambiguities fuzzy mathematics fuzzy stochastic

**Managing by the Bhagavad Gītā** Satinder Dhiman, A. D. Amar, 2018-11-27

Drawing upon the timeless wisdom of the Bhagavad Gītā, a philosophical spiritual world classic, this professional book highlights the spiritual and moral dimensions of management using an inside-out leadership development approach. It interprets the Bhagavad Gītā's teachings on the personality types and psychological makeup of managers and employees, self-knowledge and self-mastery, and the leadership concepts of vision, motivation, and empowerment. This book covers topics such as training of the mind, ethical leadership, communication, stress management, and corporate social responsibility (CSR). Collectively, the enclosed contributions provide managers with an enhanced outlook on management functions such as leading, planning, organizing, and controlling in today's organizations, particularly those run by knowledge workers. Management research in the 20th century has mainly focused on the industrial paradigm characterized by a hierarchical structure of authority and responsibility with an individualistic focus on the personality of the manager. However, this traditional paradigm cannot solve many of the problems that confront leaders and managers today. Recent studies have shown that values traditionally associated with spirituality, such as integrity, honesty, trust, kindness, caring, fairness, and humility, have a demonstrable effect on managerial effectiveness and success. Although traditionally interpreted as a religious spiritual text, the Bhagavad Gītā teaches these values, which can be extrapolated and applied to practical management lessons in today's corporate boardrooms. Applying the text of the Bhagavad Gītā to the context of management, this book views the manager as an enlightened sage who operates from a higher stance, guided by self-knowledge and self-mastery. It demonstrates how character is the key ingredient for effective management and leadership. This book is therefore applicable to all managers, from first-line to CEOs, in their management and leadership roles in organizations.
