

The pathway looks like an easy path, but in reality, looks are deceiving. It's not easy, but the path brings forth the meaning of optimism. The road we travel will have some good and bad, but we have to look for the good in all that we do and in every situation.

Groundless Paths Karl Brunnholz,2012-08-14 The Abhisamayalamkara summarizes all the topics in the vast body of the praj aparamita sutras Resembling a zip file it comes to life only through its Indian and Tibetan commentaries Together these texts not only discuss the hidden meaning of the praj aparamita sutras the paths and bhumis of sravakas pratyekabuddhas and bodhisattvas but also serve as contemplative manuals for the explicit topic of these sutras emptiness and how it is to be understood on the progressive levels of realization of bodhisattvas Thus these texts describe what happens in the mind of a bodhisattva who meditates on emptiness making it a living experience from the beginner s stage up through buddhahood Groundless Paths contains the first in depth study of the Abhisamayalamkara the text studied

most extensively in higher Tibetan Buddhist education and its commentaries from the perspective of the Nyingma School of Tibetan Buddhism This study consists mainly of translations of Maitreya s famous text and two commentaries on it by Patrul Rinpoche These are supplemented by three short texts on the paths and bhumis by the same author as well as extensive excerpts from commentaries by six other Nyingma masters including Mipham Rinpoche Thus this book helps close a long standing gap in the modern scholarship on the praj aparamita sutras and the literature on paths and bhumis in mahayana Buddhism Arya Maitreya s Ornament of Clear Realization with its Indian and Tibetan commentaries presents the complex dynamics of the path to liberation as a succession of realizations of the empty nature of all phenomena This presentation is a powerful antidote to whatever two dimensional views we might hold about spiritual experience and the journey to enlightenment

Einstein, Tagore and the Nature of Reality Partha Ghose,2016-06-23 The nature of reality has been a long debated issue among scientists and philosophers In 1930 Rabindranath Tagore and Albert Einstein had a long conversation on the nature of reality This conversation has been widely quoted and discussed by scientists philosophers and scholars from the literary world The important question that Tagore and Einstein discussed was whether the world is a unity dependent on humanity or the world is a reality independent on the human factor Einstein took the stand adopted by Western philosophers and mathematicians namely that reality is something independent of the mind and the human factor Tagore on the other hand adopted the opposite view Nevertheless both Einstein and Tagore claimed to be realists despite the fundamental differences between their conceptions of reality Where does the difference lie Can it be harmonized at some deeper level Can Wittgenstein for example be a bridge between the two views This collection of essays explores these two fundamentally different conceptions of the nature of reality from the perspectives of theories of space time quantum theory general philosophy of science cognitive science and mathematics

reservation I call a genius Lee Smolin **The Reality of Time Flow** Richard T. W. Arthur, 2019-04-25 It is commonly held that there is no place for the now in physics and also that the passing of time is something subjective having to do with the way reality is experienced but not with the way reality is. Indeed the majority of modern theoretical physicists and philosophers of physics contend that the passing of time is incompatible with modern physical theory and excluded in a fundamental description of physical reality. This book provides a forceful rebuttal of such claims. In successive chapters the author explains the historical precedents of the modern opposition to time flow giving careful expositions of matters relevant to becoming in classical physics the special and general theories of relativity and quantum theory without presupposing prior expertise in these subjects. Analysing the arguments of thinkers ranging from Aristotle Russell and Bergson to the proponents of quantum gravity he contends that the passage of time understood as a local becoming of events out of those in their past at varying rates is not only compatible with the theories of modern physics but implicit in them.
