#### The Peasant Economy And Social Change In North China:

The Peasant Economy and Social Change in North China Philip Huang, 1985-06-01 The author presents a convincing new interpretation of the origins and nature of the agrarian crisis that gripped the North China Plain in the two centuries before the Revolution His extensive research included eighteenth century homicide case records a nineteenth century country government archive large quantities of 1930 s Japanese ethnographic materials and his own field studies in 1980 Through a comparison of the histories of small family farms and larger scale managerial farms the author documents and illustrates the long term trends of agricultural commercialization social stratification and mounting population pressure in the peasant economy He shows how those changes in the absence of dynamic economic growth combined over the course of several centuries to produce a majority not simply of land short peasants or of exploited tenants and agricultural laborers but of poor peasants who required both family farming and agricultural wage income to survive This interlocking of family farming with wage labor furnished a large supply of cheap labor which in turn acted as a powerful brake of capital accumulation in the economy The formation of such a poor peasantry ultimately altered both the nature of village communities and their relations with the elites and the state creating tensions that led in the end to revolution The Peasant Economy and Social Change in North China Philip C. Huang, 1985 The Peasant Economy and Social Change in North China ,1985 the Gold Mountain Huping Ling, 1998-01-01 The first comprehensive work on Chinese American women's history covering Political Culture and Participation in Rural China Yang Zhong, 2013-06-17 Despite China's rapid the past 150 years urbanisation and industrialisation most Chinese still live in the vast countryside or have rural household registration Although there was significant economic improvement in rural areas in the 1980s the rural economy has been stagnating or deteriorating since then and the book argues that the rural urban income gap is giving rise to the potential for political instability throughout China This book based on extensive original research including interview fieldwork in rural areas examines the nature of political culture and participation in rural China discussing issues such as the support or lack of it for democratic values levels of political interest the ways in which Chinese peasants interact with village and local officials subjective factors that motivate them to vote or not to vote in village elections and rural people s views on market oriented economic reforms local and national government and the Communist Party The book argues that although hitherto peasants riots sit ins and demonstrations have been localised and uncoordinated they are frequent and have the potential to cause serious political crises for China's rulers It concludes by considering the future political development of China's vast countryside Chinese History in Economic Perspective Thomas G. Rawski, Lillian M. Li, 2024-07-26 This volume marks a turning point in the study of Chinese economic history It arose from a realization that the economic history of China as opposed to the history of the Chinese economy had yet to be written Most histories of the Chinese economy whether by Western or Chinese scholars tend to view the economy in institutional or social terms In contrast the studies in this volume

break new ground by systematically applying economic theory and methods to the study of China While demonstrating to historians the advantages of an economic perspective the contributors comprising both historians and economists offer important new insights concerning issues of long standing interest to both disciplines Part One on price behavior presents for the first time preliminary analyses of the incomparably rich and important grain price data from the imperial archives in Beijing and Taibei during the Qing Dynasty 1644 1911 These studies reveal long term trends in the Chinese economy since the seventeenth century and contain surprising discoveries about market integration the agricultural economy and demographic behavior in different regions of China The essays in Part Two on market response deal with different aspects of the economy of Republican China 1912 49 showing that markets for land labor and capital sometimes functioned as predicted by models of economic rationality but at other times behaved in ways that can be explained only by combining economic analysis with knowledge of political regional class and gender differences Based on new types of data they suggest novel interpretations of the Chinese economic experience The resulting collection is interdisciplinary scholarship of a high order which weaves together the analytic framework provided by economic theory and the rich texture of social phenomena gathered by accomplished historians This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1992 Twentieth-Century China Jeffrey N. Capitalism: Histories Robert G. Ingram, James M. Vaughn, 2025-01-28 Charts the emergence and development of capitalism across the world from a variety of perspectives providing a deep understanding of how capitalism came to be the dominant economic force This book re examines the historical emergence and evolution of capitalism Why did a radically new way of organizing economic life emerge in regions of the early modern world Why did it eventually encompass the globe tying the peoples of the world together in a common economic fate These questions have been at the heart of historical and social scientific inquiry since the nineteenth century They are explored and answered anew by the scholars gathered together in this geographically and theoretically capacious volume The chapters explore the emergence and development of capitalism in Africa Western Europe Eastern Europe South Asia East Asia North America and the Atlantic world and they engage with many of the major intellectual approaches for understanding capitalism from the New Institutional Economics to world systems theory The authors share a common commitment but not a common approach to understanding the historical development of capitalism They believe that the emergence and evolution of capitalism must be understood by examining the concrete conditions of socioeconomic life in a particular country empire or region and that such empirically and archivally driven historical analysis must be combined with theoretical discussion of the concepts and categories used to make sense of capitalism and its dynamics This work offers different accounts of capitalist development across and within major regions of the world It is a histories of rather than a history of capitalism As such it introduces readers to new historical research on capitalist development in different regional and national contexts and to several significant intellectual approaches for understanding what Max Weber called the most fateful force of our modern life ROBERT G INGRAM is Professor of Humanities at the University of Florida JAMES M VAUGHN is Assistant Instructional Professor in the Social Sciences Collegiate Division at the University of Chicago Contributors Gareth Austin Ralph Austen Peter Coclanis Tracy Dennison C Alexander Evans Emma Griffin Robert G Ingram Anirban Karak John Majewski Mark Metzler Kenneth Pomeranz J Mark Ramseyer Tirthankar Roy and Horus T an Moral Politics in a South Chinese Village Hok Bun Ku, 2003-08-25 Exploring sensitive issues often hidden to outsiders this engaging study traces the transformation and economic development of a south China village during the first tumultuous decade of reform Drawing on a wealth of intimate detail Ku explores the new sense of risk and mood of insecurity experienced in the post reform era in Ku Village a typical hamlet beyond the margins of richer suburban areas or fertile farmland Villagers dissatisfaction revolves around three key issues the rising cost of living mounting agricultural expenses and the forcible implementation of birth control quotas Faced with these daunting problems villagers have developed an array of strategies Their weapons include resisting policies they consider unreasonable by disregarding fees evading taxes and ignoring strict family planning regulations challenging the rationale of official policies

and the legitimacy of the local government and its officials and reestablishing clan associations to supercede local Party authority Using lively everyday narratives and compelling personal stories Ku argues that rural people are not in fact powerless and passive instead they have their own moral system that informs their everyday family lives work and political activities Their code embodies concepts of fairness and justice a concrete definition of the relationship between the state and its citizens an understanding of the boundaries and responsibilities of each party and a clear notion of what constitutes good and bad government and officials On the basis of these principles they may challenge existing policies and deny the authority of officials and the government thereby legitimizing their acts of self defense Through his richly realized ethnography Ku shows the reader a world of memorable fully realized individuals striving to control their fate in an often arbitrary world
