Markets and Ideology in the City of London David Lazar,2016-07-27 Markets and Ideology in the City of London is the first fieldwork based sociological study of how participants in City of London financial markets view the markets in which they work and the market mechanism in general But it is more than a narrow study of financial market participants because it is also an empirical investigation into how ideologies function and it develops a critique of pro market ideologies such as Thatcherism Finally it is one of a small number of sociological studies into the privileged world of high earners and the wealthy sociologists too frequently study the powerless and the deviant or marginal groups

Ethical Reflections on the Financial Crisis 2007/2008 Wilfried Ver Eecke,2013-01-05 In this book the author reflects on the

philosophical and ethical bases of the financial crisis 2007-08 and the subsequent recession. He finds in Adam Smith solid arguments for the new free market economy (capitalism) but also arguments for a role for the government in the case of public goods (roads and of merit goods (education, control of banking). Where the provision of public goods requires that the government respect consumer sovereignty, there the provision of merit goods legitimizes the violation of that principle. By making use of the history of economic thought (e.g. the neo-liberal tradition), the author demonstrates that Musgrave's idea of merit goods can be expanded to eleven domains in which the government has an important function. He legitimizes that move by using the Kantian argument that we must accept the possibility conditions for what we want. The author demonstrates that Rajan, Reich and Reinhart Rogoff make use of seven of his eleven categories of merit goods in order to explain the financial crisis 2007-08 and the subsequent recession. The author thereby provides a philosophical and ethical analysis of the government's failures at the basis of the financial crisis. *International Relations in the Nuclear Age* Henry L.

Bretton, 1985-11-01 This timely introduction to the study of international relations places special emphasis on the politics of international economics and the nuclear threat. Written for beginning students, the book combines comprehensive and realistic introductory material basic to the study of international relations with in-depth case studies of major issues and problem areas such as management of the world economy and management of world military power, East-West and North-South, rich nation vs. poor nation conflicts and the struggle for resources and ways and means of preventing World War III. Readers untrained in economics will find the subject matter introduced before it is discussed in its applied form. Henry L. Bretton has published widely on Western and non-Western government politics and international relations. He is currently Distinguished Professor of Political Science at the State University of New York College at Brockport. [British Sources of Information](#)
