## **The Penitent Butchers The Fauna Preservation Society 1903 1978:**

The Penitent Butchers Richard Fitter, Peter Scott, 1978      *The Penitent Butchers* Richard Sidney Richmond Fitter, Peter Scott, 1978      **National Park Science** Jane Carruthers, 2017-08-17 South Africa is renowned for its wildlife and environmental conservation in iconic national parks such as the Kruger one of the world's first formal protected areas. However, this is the first book to thoroughly analyse and explain the interesting and changing scientific research that has been accomplished in South Africa's national parks during the twentieth century. Providing a fascinating and thorough historical narrative based on an extensive range of sources, this text details the evolution of traditional natural history pursuits to modern conservation science in South Africa, covering all research areas of conservation biology and all the national parks around the country. It reveals the interaction between the international context, government, learning institutions, and the public that has shaped the present conservation arena. A complex story that will interest and inform not only those involved in conservation science of South Africa but worldwide.

**The Animal Estate** Harriet Ritvo, 1989-01-01 Harriet Ritvo gives us a vivid picture of how animals figured in English thinking during the nineteenth century and by extension how they served as metaphors for human psychological needs and sociopolitical aspirations.

**The Nature of Endangerment in India** Ezra Rashkow, 2023-01-30 This book is a study of the concepts of endangerment and extinction. Examining interlinking discourses of biological and cultural diversity loss in western and central India, it problematizes the long history of human endangerment and extinction discourse.

**Ecology and Power in the Age of Empire** Corey Ross, 2017 Ecology and Power in the Age of Empire provides the first wide-ranging environmental history of the heyday of European imperialism from the late nineteenth century to the end of the colonial era. It focuses on the ecological dimensions of the explosive growth of tropical commodity production, global trade, and modern resource management strategies that still visibly shape our world today and how they were related to broader social, cultural, and political developments in Europe's colonies. Covering the overseas empires of all the major European powers, Corey Ross argues that tropical environments were not merely a stage on which conquest and subjugation took place but were an essential part of the colonial project, profoundly shaping the imperial enterprise even as they were shaped by it. The story he tells is not only about the complexities of human experience but also about people's relationship with the ecosystems in which they were themselves embedded: the soil, water, plants, and animals that were likewise a part of Europe's empire. Although it shows that imperial conquest rarely represented the signal ecological trauma that some accounts suggest, it nonetheless demonstrates that modern imperialism marked a decisive and largely negative milestone for the natural environment. By relating the expansion of modern empire, global trade, and mass consumption to the momentous ecological shifts that they entailed, this book provides a historical perspective on the vital nexus of social, political, and environmental issues that we face in the twenty-first century world.

*Sustainable Governance of Wildlife and Community-Based Natural Resource Management* Brian

Child,2019-10-23 This book develops the Sustainable Governance Approach and the principles of Community Based Natural Resource Management CBNRM It provides practical examples of successes and failures in implementation and lessons about the economics and governance of wild resources with global application CBNRM emerged in the 1980s encouraging greater local participation to conserve and manage natural and wild resources in the face of increasing encroachment by agricultural and other forms of land use development This book describes the institutional history of wildlife and the empirical transformation of the wildlife sector on private and communal land particularly in southern Africa to develop an alternative paradigm for governing wild resources With the twin goals of addressing poverty and resource degradation in the world s extensive agriculturally marginal areas the author conceptualises this paradigm as the Sustainable Governance Approach which integrates theories of proprietorship and rights prices and economics governance and scale and adaptive learning The author then discusses and defines CBNRM a major subset of this approach Interweaving theory and practice he shows that the primary challenges facing CBNRM are the devolution of rights from the centre to marginal communities and the governance of these rights by communities a challenge which is seldom recognised or addressed He focuses on this shortcoming extending and operationalising institutional theory including Ostrom s principles of collective action within the context of cross scale governance Based on the author s extensive experience this book will be key reading for students of natural resource management sustainable land use community forestry conservation and development Providing practical but theoretically robust tools for implementing CBNRM it will also appeal to professionals and practitioners working in communities and in conservation and development

*The Naturalist* Darrin Lunde,2017-04-11 Winner of the inaugural Theodore Roosevelt Association Book Prize A captivating account of how Theodore Roosevelt s lifelong passion for the natural world set the stage for America s wildlife conservation movement and determined his legacy as a founding father of today s museum naturalism No U S president is more popularly associated with nature and wildlife than is Theodore Roosevelt prodigious hunter tireless adventurer and ardent conservationist We think of him as a larger than life original yet in *The Naturalist* Darrin Lunde has firmly situated Roosevelt s indomitable curiosity about the natural world in the tradition of museum naturalism As a child Roosevelt actively modeled himself on the men including John James Audubon and Spencer F Baird who pioneered this key branch of biology by developing a taxonomy of the natural world basing their work on the experiential study of nature The impact that these scientists and their trailblazing methods had on Roosevelt shaped not only his audacious personality but his entire career informing his work as a statesman and ultimately affecting generations of Americans relationship to this country s wilderness Drawing on Roosevelt s diaries and travel journals as well as Lunde s own role as a leading figure in museum naturalism today *The Naturalist* reads Roosevelt through the lens of his love for nature From his teenage collections of birds and small mammals to his time at Harvard and political rise Roosevelt s fascination with wildlife and exploration culminated in his triumphant expedition to Africa a trip which he himself considered to be the apex of

his varied life With narrative verve Lunde brings his singular experience to bear on our twenty sixth president s life and constructs a perceptively researched and insightful history that tracks Roosevelt s maturation from exuberant boyhood hunter to vital champion of serious scientific inquiry **The Interwar World** Andrew Denning,Heidi J.S.

Tworek,2023-08-29 The Interwar World collects an international group of over 50 contributors to discuss analyze and interpret this crucial period in twentieth century history A comprehensive understanding of the interwar era has been limited by Euro American approaches and strict adherence to the temporal limits of the world wars The volume s contributors challenge the era s accepted temporal and geographic framings by privileging global processes and interactions Each contribution takes a global thematic approach integrating world regions into a shared narrative Three central questions frame the chapters First when was the interwar Viewed globally the years 1918 and 1939 are arbitrary limits and the volume explicitly engages with the artificiality of the temporal framework while closely examining the specific dynamics of the 1920s and 1930s Second where was the interwar Contributors use global history methodologies and training in varied world regions to decenter Euro American frameworks engaging directly with the usefulness of the interwar as both an era and an analytical category Third how global was the interwar Authors trace accelerating connections in areas such as public health and mass culture counterbalanced by processes of economic protectionism exclusive nationalism and limits to migration By approaching the era thematically the volume disaggregates and interrogates the meaning of the global in this era As a comprehensive guide this volume offers overviews of key themes of the interwar period for undergraduates while offering up to date historiographical insights for postgraduates and scholars interested in this pivotal period in global history **Zoo**

**Conservation Biology** John E. Fa,Stephan M. Funk,Donnamarie O'Connell,2011-08-18 In the face of ever declining biodiversity zoos have a major role to play in species conservation Written by professionals involved in in situ conservation and restoration projects internationally this is a critical assessment of the contribution of zoos to species conservation through evidence amassed from a wide range of sources The first part outlines the biodiversity context within which zoos should operate introducing the origins and global spread of zoos and exploring animal collection composition The second part focuses on the basic elements of keeping viable captive animal populations It considers the consequences of captivity on animals the genetics of captive populations and the performance of zoos in captive breeding The final part examines ways in which zoos can make a significant difference to conservation now and in the future Bridging the gap between pure science and applied conservation this is an ideal resource for both conservation biologists and zoo professionals Theodore

Roosevelt Abroad J. Lee Thompson,2010-05-14 In a life full of momentous episodes Theodore Roosevelt s fifteen month post presidential odyssey to Africa and Europe has never been given its due place A tale of daring adventure international celebrity a friendship lost and a political legacy transformed Theodore Roosevelt Abroad is the first full account of this important time in history **Tropical Nature** Guillaume Blanc,Mathieu Guérin,Grégory Quenet,2025-03-01 Across Africa

and South East Asia the impulse to protect nature often dovetails with the domination of local people From mass displacement to severe restrictions on land use and daily acts of violence conservation work risks reproducing Eurocentric modes of colonialism and worsening the effects of the climate crisis In this insightful and wide ranging study of the colonial history of conservation *Tropical Nature* seeks to provide a much needed history of the Global South from its own perspective Comparing case studies ranging from Ali Bongo s Gabon to the postcolonial African itinerary of the agronomist Arthur Bunting this volume advances a small scale global history that deciphers the relations binding human societies to the non human world

*Colonial Seeds in African Soil* Paul Munro, 2020-02-03 Empire forestry the broadly shared forest management practice that emerged in the West in the nineteenth century may have originated in Europe but it would eventually reshape the landscapes of colonies around the world Melding the approaches of environmental history and political ecology *Colonial Seeds in African Soil* unravels the complex ways this dynamic played out in twentieth century colonial Sierra Leone While giving careful attention to topics such as forest reservation and exploitation the volume moves beyond conservation practices and discourses attending to the overlapping social economic and political contexts that have shaped approaches to forest management over time

*Conservation Across Borders* Charles C. Chester, 2012-02-13 Conservationists have long been aware that political boundaries rarely coincide with natural boundaries From the establishment of early peace parks to the designation of continental migratory pathways a wide range of transborder mechanisms to protect biodiversity have been established by conservationists in both the public and private sectors *Conservation Across Borders* presents a broad overview of the history of transboundary conservation efforts and an accessible introduction to current issues surrounding the subject Through detailed examinations of two initiatives the International Sonoran Desert Alliance ISDA and the Yellowstone to Yukon Initiative Y2Y the book helps readers understand the benefits and challenges of landscape scale protection In addition to discussing general concepts and the specific experience of ISDA and Y2Y the author considers the emerging concept of conservation effectiveness and offers a comparative analysis of the two projects The book ends with a discussion of the complex relationships among civil society governments and international borders By considering the history goals successes and failures of two divergent initiatives the book offers important insights into the field of transborder conservation along with valuable lessons for those studying or working in the field

**Nature's Ghosts** Mark V. Barrow, 2011-04-15 The rapid growth of the American environmental movement in recent decades obscures the fact that long before the first Earth Day and the passage of the Endangered Species Act naturalists and concerned citizens recognized and worried about the problem of human caused extinction As Mark V Barrow reveals in *Nature s Ghosts* the threat of species loss has haunted Americans since the early days of the republic From Thomas Jefferson s day when the fossil remains of such fantastic lost animals as the mastodon and the woolly mammoth were first reconstructed through the pioneering conservation efforts of early naturalists like John James Audubon

and John Muir Barrow shows how Americans came to understand that it was not only possible for entire species to die out but that humans themselves could be responsible for their extinction With the destruction of the passenger pigeon and the precipitous decline of the bison professional scientists and wildlife enthusiasts alike began to understand that even very common species were not safe from the juggernaut of modern industrial society That realization spawned public education and legislative campaigns that laid the foundation for the modern environmental movement and the preservation of such iconic creatures as the bald eagle the California condor and the whooping crane A sweeping beautifully illustrated historical narrative that unites the fascinating stories of endangered animals and the dedicated individuals who have studied and struggled to protect them *Nature's Ghosts* offers an unprecedented view of what we've lost and a stark reminder of the hard work of preservation still ahead

**Imposing Wilderness** Roderick P. Neumann, 1998 The book focuses on the symbolic importance of natural landscapes among various social groups in this setting and how it relates to conflicts between peasant communities and the state Neumann's thoughtful framing of the issues that fuel ongoing controversies will interest ecologists as well as those interested in political economy and development in Africa

**Wildlife & Warfare** Jane Carruthers, 2001 James Stevenson Hamilton can be credited with the creation of the Kruger National Park in South Africa His wildlife accomplishments have been well documented but the rest of his long and varied life has remained obscure until now

**The Invention of Green Colonialism** Guillaume Blanc, 2022-06-08 The story begins with a dream the dream of Africa Virgin forests majestic mountains surrounded by savannas vast plains punctuated with the rhythms of animal life where lions elephants and giraffes reign as lords of nature far from civilization all of us carry such images in our heads imagining Africa as a timeless Eden untouched by the ravages of modernity But this Africa has never existed The more we destroy nature here the more we fantasize about it in Africa Along with UNESCO the WWF and other organizations we convince ourselves that the African national parks are protecting the last vestiges of a world once untouched and wild In reality argues Guillaume Blanc these organizations are responsible for naturalizing large tracts of the African continent turning territories into parks and forcibly evicting thousands of people from the lands where they have lived for centuries Making use of archives and oral histories Blanc investigates this battle for a phantom Africa and the contradictory claims of nations who destroy nature at home while believing that they are protecting the natural world abroad In so doing they enact a new type of colonialism green colonialism

**International Organizations and Environmental Protection** Wolfram Kaiser, Jan-Henrik Meyer, 2016-12-01 Pollution resource depletion habitat management and climate change are all issues that necessarily transcend national boundaries Accordingly they and other environmental concerns have been a particular focus for international organizations from before the First World War to the present day This volume is the first to comprehensively explore the environmental activities of professional communities NGOs regional bodies the United Nations and other international organizations during the twentieth century It follows their efforts to shape debates about environmental

degradation develop binding intergovernmental commitments and following the seminal 1972 Conference on the Human Environment implement and enforce actual international policies      *The History of Natural History* Gavin D. R. Bridson, 2008 With over 5 300 added references this revised and updated edition is an essential source of information for scientists researchers and enthusiastic amateurs The History of Natural History is one of those key works that should be kept in easy reach of anyone interested in the study of natural history in all its branches
