William Sims Bainbridge

The Outer Circle Women In The Scientific Community:

The Outer Circle Harriet Zuckerman, Jonathan R. Cole, John T. Bruer, 1992 *China's Scientific Elite* Cong Cao, 2004-07-31 *China's Scientific Elite* is a study of those scientists holding China's highest academic honour membership of the Chinese Academy of Sciences Having carried out extensive systematic data collection of CAS members Cao examines the social stratification system of the Chinese science community and the way in which politics and political interference has effected the stratification The book then goes on to compare the Chinese system to the stratification of the US scientific elite The conclusions are fascinating not least because one national elite resides in a democratic liberal social system and the other in an authoritarian social system **The Psychology of Women at Work** Michele A. Paludi, 2008-06-30 According to the U S Department of Labor women made up 46.4 percent of the civilian labor force in 2005 and that percentage is expected to reach 47 percent by 2014 Professional and health related occupations are the fastest growing roles for women with computer related environmental and educational fields also drawing increasingly on the female workforce The bottom line at a macro level is that more and more women are driving the country's economic development But with that phenomenon come questions challenges and concerns on many diverse levels Debates rage on psychological topics such as the effect the increasing number of women at work has on marriage and divorce family and children women's identities and stress levels and overall their physical and mental health Psychologist Michele A Paludi and her team of experts from across fields examine all aspects of women at work the pros and cons how it is changing American society its women their relationships partners and children The factors that fuel women achievers are also discussed by female scholars and experts in the field who illustrate points with vignettes and their own career development stories Issues in the workplace affecting women's wellbeing are also discussed including sexual harassment and related laws pregnancy related work policy and regulations challenges for women bosses and career moms the glass ceiling racism women's relationships with male coworkers and issues that rise when a woman is the breadwinner This unique and timely set will appeal to those who are interested in psychology women's studies education law business and public policy Scientific Elite , *Scientific Elite* is about Nobel prize winners and the well defined stratification system in twentieth century science It tracks the careers of all American laureates who won prizes from 1907 until 1972 examining the complex interplay of merit and privilege at each stage of their scientific lives and the creation of the ultra elite in science The study draws on biographical and bibliographical data on laureates who did their prize winning research in the United States and on detailed interviews with forty one of the fifty six laureates living in the United States at the time the study was done Zuckerman finds laureates being successively advantaged as time passes These advantages are producing growing disparities between the elite and other scientists both in performance and in rewards which create and maintain a sharply graded stratification system The Science Education of American Girls Kim Tolley, 2014-04-08 *The Science Education of American Girls* provides a comparative analysis of the

science education of adolescent boys and girls and analyzes the evolution of girls scientific interests from the antebellum era through the twentieth century Kim Tolley expands the understanding of the structural and cultural obstacles that emerged to transform what in the early nineteenth century was regarded as a girl s subject As the form and content of pre college science education developed Tolley argues direct competition between the sexes increased Subsequently the cultural construction of science as a male subject limited access and opportunity for girls

Leadership in Science and Technology: A Reference Handbook William Sims Bainbridge,2011-10-20 Tackling 100 key topics and providing case studies in the area of science and technology leadership this reference handbook is an essential resource for students in this area

Contemporary Archaeology in Theory Robert W. Preucel,Stephen A. Mrozowski,2011-10-04 The second edition of Contemporary Archaeology in Theory The New Pragmatism has been thoroughly updated and revised and features top scholars who redefine the theoretical and political agendas of the field and challenge the usual distinctions between time space processes and people Defines the relevance of archaeology and the social sciences more generally to the modern world Challenges the traditional boundaries between prehistoric and historical archaeologies Discusses how archaeology articulates such contemporary topics and issues as landscape and natures agency meaning and practice sexuality embodiment and personhood race class and ethnicity materiality memory and historical silence colonialism nationalism and empire heritage patrimony and social justice media museums and publics Examines the influence of American pragmatism on archaeology Offers 32 new chapters by leading archaeologists and cultural anthropologists

Women Scholars in Hong Kong Nian Ruan,2024-01-02 This book depicts the diverse approaches of established women professors in perceiving and developing intellectual leadership in Hong Kong It analyzes the combined influences of various disciplines different higher education institutions and gender on the careers of female scholars in the East Asian region The complexity and interaction of academic careers for women disciplinary contexts higher education systems and socio cultural environments may present a relatively holistic landscape for readers interested in academic life and leadership Scholars administrators managers and policymakers in higher education related fields may gain comprehensive ideas to facilitate faculty and institutional development through a cultural and sociological lens This may empower female academics and students while also providing benefits for doctoral students and early career researchers seeking insights into the evolving advantages and disadvantages in women s academic careers Audiencesinterested in gender issues may find it intriguing to compare women scholars with women in other professions and in different cultural contexts

Immigrant Women Rita J. Simon,2018-01-16 The obstacles to assimilation and treatment of immigrant women are major issues confronting the leading immigrant receiving nations today the United States Canada and Australia This volume provides a range of perspectives on the concerns the sources of problems how issues might be addressed and the future of immigrant women It is based upon a two part issue of the journal Gender Issues and contains a new introduction by the editor The first section focuses on labor force experiences

of women who have immigrated to the United States and Australia from Mexico and Latin America Eastern Europe Korea the Philippines India and other parts of Asia Nancy Foner assesses the complex and contradictory ways that migration changes women's status Cynthia Crawford focuses on Mexican and Salvadoran women who have recently moved into janitorial work in Los Angeles M D R Evans and Tatjana Lucik analyze labor force participation of immigrants in Australia and family strategies of women migrants from the former Yugoslavia against the experiences of woman migrants from the Mediterranean world and other parts of the Slavic world Economist Harriet Duleep reviews what is known as the family investment model Monica Boyd tackles the controversial issue of the leading immigrant receiving nations unwillingness to declare gender an explicit ground for persecution and thus for gaining refugee status The second section deals with social class and English language acquisition the obstacles women have had to overcome in gaining refugee status in the United States and Canada and a comparison of movement patterns between different commentaries in Mexico and the United States on the part of Mexican male and female immigrants Contributors include Suzanne M Sinke Katharine Donato and Nina Toren Immigrant Women will be valuable to researchers in women's studies population demographics as well as those teaching courses in sociology history and immigration Rita James Simon is university professor in the School of Public Affairs at the Washington College of Law at American University She is editor of Gender Issues and author of The American Jury The Insanity Defense A Critical Assessment of Law and Policy in the Post Hinckley Era with David Aaronson Adoption Race and Identity with Howard Altstein In the Golden Land A Century of Russian and Soviet Jewish Immigration Social Science Data and Supreme Court Decisions with Rosemary Erickson and Abortion Statutes Policies and Public Attitudes the World Over

Career Patterns and Policies of Female Leaders in China Xin Tong, 2021-07-13 China's late Chairman Mao Zedong once said Women hold up half the world but in several respects the full emancipation of women still remains a global challenge This book based on extensive empirical studies on Chinese female leaders in different fields develops a female professional status attainment theory It summarizes the conditions for Chinese women to become leaders in various professions as the following increased human economic and social capital gender equality awareness gender friendly environment and improved work life balance The book also proposes supporting policies for the development of high level female talents female leaders in three different sectors women in politics in professional fields and in enterprise management With the comprehensive perspectives of female leaders development that addresses women's unique needs in organizations this book is a good choice for researchers and readers who are interested in China's top level talent development gender equality and women's professional attainment **Women Scientists in America** Margaret W. Rossiter, 1998-09-29 Winner of the Pfizer Award for Outstanding Book in the History of Science Margaret Rossiter's widely hailed Women Scientists in America Struggles and Strategies to 1940 marked the beginning of a pioneering effort to interpret the history of American women scientists That effort continues in this provocative sequel that covers the crucial years of World War II and beyond Rossiter

begins by showing how the acute labor shortage brought on by the war seemed to hold out new hope for women professionals especially in the sciences But the public posture of welcoming women into the scientific professions masked a deep seated opposition to change Rossiter proves that despite frustrating obstacles created by the patriarchal structure and values of universities government and industry women scientists made genuine contributions to their fields grew in professional stature and laid the foundation for the breakthroughs that followed 1972

Living Legacies at Columbia

William Theodore De Bary, 2006 From Margaret Mead and Zora Neale Hurston to Lionel Trilling and Lou Gehrig Columbia University has been home to some of the most important historians scientists critics artists physicians and social scientists of the twentieth century It can also boast a hall of fame athlete In Living Legacies at Columbia contributors with close personal ties to their subjects capture Columbia's rich intellectual history Essays span the birth of genetics and modern anthropology constitutionalism from John Jay to Ruth Bader Ginsberg Virginia Apgar's test Lou Gehrig's swing journalism education black power public health the development of Asian studies the Great Books Movement gender studies human rights and numerous other realms of teaching and discovery They include Eric Foner on historian Richard Hoftstadter Isaac Levi and Sidney Hook on John Dewey David Rosand on art historian Meyer Schapiro John Hollander on critic Mark Van Doren Donald Keene on Asian studies Jacques Barzun on history Eric Kandel on geneticist Thomas Hunt Morgan and Rosalind Rosenberg on Franz Boas and his three most famous pupils Ruth Benedict Margaret Mead and Zora Neale Hurston Much more than an institutional history Living Legacies captures the spirit of a great university through the stories of gifted men and women who have worked taught and studied at Columbia It includes stories of struggle and breakthrough searching and discovery tradition and transformation

A Data-Based Assessment of Research-Doctorate Programs in the United States (with CD)

Policy and Global Affairs, Board on Higher Education and Workforce, 2011-07-26 A Data Based Assessment of Research Doctorate Programs in the United States provides an unparalleled dataset that can be used to assess the quality and effectiveness of doctoral programs based on measures important to faculty students administrators funders and other stakeholders The data collected for the 2005-2006 academic year from more than 5,000 doctoral programs at 212 universities covers 62 fields Included for each program are such characteristics as faculty publications grants and awards student GRE scores financial support and employment outcomes and program size time to degree and faculty composition Measures of faculty and student diversity are also included The book features analysis of selected findings across six broad fields agricultural sciences biological and health sciences engineering physical and mathematical sciences social and behavioral sciences and humanities as well as a discussion of trends in doctoral education since the last assessment in 1995 and suggested uses of the data It also includes a detailed explanation of the methodology used to collect data and calculate ranges of illustrative rankings Included with the book is a comprehensive CD-ROM with a data table in Microsoft Excel In addition to data on the characteristics of individual programs the data table contains illustrative ranges of rankings for each

program as well as ranges of rankings for three dimensions of program quality 1 research activity 2 student support and outcomes and 3 diversity of the academic environment As an aid to users the data table is offered with demonstrations of some Microsoft Excel features that may enhance the usability of the spreadsheet such as hiding and unhiding columns copying and pasting columns to a new worksheet and filtering and sorting data Also provided with the data table are a set of scenarios that show how typical users may want to extract data from the spreadsheet PhDs org an independent website not affiliated with the National Research Council incorporated data from the research doctorate assessment into its Graduate School Guide Users of the Guide can choose the weights assigned to the program characteristics measured by the National Research Council and others and rank graduate programs according to their own priorities Gendered Futures in Higher Education Becky Ropers-Huilman,2003-02-27 Identifies gender issues affecting students faculty and leaders in higher education applying critical perspectives to suggest needed change Handbook of the Economics of Innovation Bronwyn H. Hall,Nathan Rosenberg,2010-05-14 Economists examine the genesis of technological change and the ways we commercialize and diffuse it The economics of property rights and patents in addition to industry applications are also surveyed through literature reviews and predictions about fruitful research directions Two volumes available as a set or sold separately Expert articles consider the best ways to establish optimal incentives in technological progress Science and innovation both their theories and applications are examined at the intersections of the marketplace policy and social welfare Economists are only part of an audience that includes attorneys educators and anyone involved in new technologies *Academic Motherhood* Kelly Ward,Lisa Wolf-Wendel,2012-08-31 Academic Motherhood tells the story of over one hundred women who are both professors and mothers and examines how they navigated their professional lives at different career stages Kelly Ward and Lisa Wolf Wendel base their findings on a longitudinal study that asks how women faculty on the tenure track manage work and family in their early careers pre tenure when their children are young under the age of five and then again in mid career post tenure when their children are older The women studied work in a range of institutional settings research universities comprehensive universities liberal arts colleges and community colleges and in a variety of disciplines including the sciences the humanities and the social sciences Much of the existing literature on balancing work and family presents a pessimistic view and offers cautionary tales of what to avoid and how to avoid it In contrast the goal of Academic Motherhood is to help tenure track faculty and the institutions at which they are employed make it work Writing for administrators prospective and current faculty as well as scholars Ward and Wolf Wendel bring an element of hope and optimism to the topic of work and family in academe They provide insight and policy recommendations that support faculty with children and offer mechanisms for problem solving at personal departmental institutional and national levels **The Gender and Science Reader** Muriel Lederman,Ingrid Bartsch,2001 The Gender and Science Reader brings together key articles in a comprehensive investigations of the nature and practice of science STEM the Tide David E. Drew,2011-10-01 Proven strategies for

reforming STEM education in America's schools colleges and universities One study after another shows American students ranking behind their international counterparts in the STEM fields science technology engineering and math Businesspeople and cultural critics such as Bill Gates warn that this alarming situation puts the United States at a serious disadvantage in the high tech global marketplace of the twenty first century and President Obama places improvement in these areas at the center of his educational reform What can be done to reverse this poor performance and to unleash America's wasted talent David E Drew has good news and the tools America needs to keep competitive Drawing on both academic literature and his own rich experience Drew identifies proven strategies for reforming America's schools colleges and universities and his comprehensive review of STEM education in the United States offers a positive blueprint for the future These research based strategies include creative and successful methods for building strong programs in science and mathematics education and show how the achievement gap between majority and minority students can be closed A crucial measure he argues is recruiting educating supporting and respecting America's teachers Accessible engaging and hard hitting STEM the Tide is a clarion call to policymakers administrators educators and everyone else concerned about students participation in the STEM fields and America's competitive global position

Gender and Academic Career Development in Central and Eastern Europe Anna M. Górska, 2023-03-17 The nature of academic institutions is inherently gendered This is because higher education institutions HEIs do not operate in a void but rather are part and parcel of patriarchal social structures This book offers a comprehensive presentation of the gendered and gendering academic career development It explores various scholarly roles that academics face throughout their careers and how they are gendered in their nature The book connects relevant literature on the topic with novel empirical studies to increase the understanding of how gender is played in academia across different roles and different career stages The empirical context is conducted in Central and Eastern Europe and sheds new light on the gendered and gendering nature in academia in the region The book also offers propositions on how to undo gendered academia to make it a more inclusive workplace for all Dedicated to the academic reader employed in HEIs particularly among those who are involved in the management of such institutions this volume will be of great interest to researchers academics and advanced students in the fields of human resource management organizational studies higher education and gender studies

Love, Power, and Knowledge Hilary Rose, 1994 Rose's passionately engaged book develops new terms for thinking about science and feminism She locates the feminist criticism of science as integral to both the feminist movement and the radical science movement She attend to the political economy of the production of knowledge and to what does and does not count as knowledge how women and minorities are affected by these processes is also explored Because biology is destiny is both an old and oppressive claim made by science she examines at length the latest and massively resourced claimant the Human Genome program the so called Holy Grail of the new industrialized genetics Rose's commitment to feminist resistance against the science and technology of oppression leads her to explore feminist

science fiction as an ally of feminist science critics with its imaginative capacity to explore different futures with different sciences and technologies
