millennium AD A series of comprehensive chapters combines literary evidence on Scandinavia's politics, kings and other rulers with archaeological, documentary, toponymical and linguistic evidence. The picture that emerges is one of surprisingly stable rulership institutions, sites and myths, while control of them was contested between individuals, dynasties and polities. While in the early centuries Scandinavia was integrated in Germanic Europe, profound societal and cultural changes in 6th century Scandinavia and the Christianisation of Continental and English kingdoms set northern kingship on a different path. The pagan heroic warrior ethos essential to kingship was developed and refined only to recur overseas embodied in 9th-10th century Vikings. Three chapters on a hitherto unknown masonry royal manor at Avaldsnes in western Norway excavated 2017 concludes this volume with discussions of the late medieval peak of Norwegian kingship and its eventual downfall in the late 14th century. This book's discussions and results are relevant to all scholars and students of 1st millennium Germanic kingship, polities and societies.

Southern Baltic Coastal Systems Analysis Hendrik Schubert, Felix Müller, 2023-01-31 This book gives an overall analysis of the current knowledge status about structures, functions, utilization for German Baltic coast ecosystems. The main focus of this book is on the aquatic area but land-sea interactions as well as river outfalls are included as well. Characteristic for this book is the inclusion of social science aspects. Approximately one third of its extent will be about the ecosystem services. In this segment the results of the last 6 years are presented in which a comprehensive quantification of the social relevance of ecosystems was carried out covering the entire area of the German Baltic Sea. This part builds directly on the results of scientific investigations and are in relation to social ideals. The assessment will not only be economically and ethically but also the mechanisms that are used for the valorisation of the ecosystem services will be evaluated. Both sub-areas, the classic natural science part as well as the part of social science aspects deal with the changes caused by increasing anthropogenic influence and social including demographic changes. This will be among others in the sense of an exemplary historical outline. The final chapter of the synthesis therefore not only presents a summary of the level of knowledge gained and a deduction of the research needs. It further contains a presentation of the application aspects resulting from the analysis of the social relevance gained from basic scientific research. The book is aimed at scientists and students of natural life and social sciences analysing functioning and structures of coastal ecosystems with regard to sustainable use and nature protection including aspects of coastal protection. Besides it is thought to become a reference for all levels of decision makers and stakeholders in coastal and marine management of the Baltic and North Sea region providing also a blueprint for system analysis respecting for societal as well as biological aspects world wide.

Special Publication, 1926 *From Middle Ages to Colonial Times* Hans Christian Gullov, 1997 *Encounters* John C. Kennedy, 2015-05-01 Part anthropological history part informed critique. *Encounters* examines the relations between the people of southeastern Labrador and the many visitors who have come to fish, heal the sick and extract the region's resources. John Kennedy presents the latest archaeological, genealogical and ethno-historical research that changes scholarly

understandings of southeastern Labrador Departing from the conventional view that coastal Labrador has distinct Inuit and non Inuit regions he argues that the coast should be viewed as a continuum of Inuitness Encounters unravels the social implications of the region s complex mercantile fishery describes how twentieth century military and resource development have impacted Labrador s seasonal economy and suggests that Newfoundland continues to use Labrador as a colony Kennedy uses field research he conducted in 2013 to describe the origins current economies and future challenges of the region s tiny villages Although he is a strong supporter of Aboriginal land claims Kennedy explores the impact of identity politics in the region showing how land claims based solely on geography can unintentionally create inequities Drawing on decades of field and archival research Kennedy demonstrates how Aboriginal politics are transforming society in southeastern Labrador empowering local people to overcome the stigmas of history and finally acknowledge their Inuit ancestry

The Archaeology of North Pacific Fisheries Madonna L. Moss,Aubrey Cannon,2011-11-15 For thousands of years fisheries were crucial to the sustenance of the First Peoples of the Pacific Coast Yet human impact has left us with a woefully incomplete understanding of their histories prior to the industrial era Covering Alaska British Columbia and Puget Sound The Archaeology of North Pacific Fisheries illustrates how the archaeological record reveals new information about ancient ways of life and the histories of key species Individual chapters cover salmon as well as a number of lesser known species abundant in archaeological sites including pacific cod herring rockfish eulachon and hake In turn this ecological history informs suggestions for sustainable fishing in today s rapidly changing environment
