**Arthur C. Clarke** Eric S. Rabkin,1980-01-01 The second edition of Eric S Rabkin s study of the life and work of Arthur C Clarke *Religion in Science Fiction* Steven Hrotic,2014-07-31 Religion in Science Fiction investigates the history of the representations of religion in science fiction literature Space travel futuristic societies and non human cultures are traditional themes in science fiction Speculating on the societal impacts of as yet undiscovered technologies is after all one of the distinguishing characteristics of science fiction literature A more surprising theme may be a parallel exploration of religion its institutional nature social functions and the tensions between religious and scientific worldviews Steven Hrotic investigates the representations of religion in 19th century proto science fiction and genre science fiction from the 1920s through the end of the century Taken together he argues that these stories tell an overarching story a metanarrative of an evolving respect for religion paralleling a decline in the belief that science will lead us to an ideal and religion free future Science fiction s metanarrative represents more than simply a shift in popular perceptions of religion it also serves as a model for cognitive anthropology providing new insights into how groups and identities form in a globalized world and into how crucial a role narratives may play Ironically this same perspective suggests that science fiction as it was in the 20th century may no longer exist

Crossing the Event Horizon Jonathan Zap,2012-02-24 Crossing the Event Horizon provides evidence that we are both individually and collectively hurtling toward an evolutionary event horizon Using the tools of Jungian psychology the nature of the singularity is defined by its myriad manifestations emerging from the collective unconscious These include dreams motifs and themes found in art science fiction and fantasy literature and films religious cults and the paranormal especially near death experiences and UFO encounters Key aspects of the Singularity Archetype include Logos Beheld visually comprehended linguistic intent often associated with

a collective telepathic network Homo gestalt a new species where individuality is conserved but also telepathically networked and a parallelism between the individual event horizon of death and eschaton the collective event horizon of the species Apocalypticism is analyzed as an example of the Singularity Archetype pathologizing A study of the Heaven's Gate saucer suicide cult illustrates what can happen when people become possessed by the Singularity Archetype and are driven by it into delusory projections The Singularity Archetype is viewed apocalyptically by the ego and as a transcendent evolutionary event by the Self and the duality of these views is explored in many examples The evolutionary origins of the ego and its metamorphosis as it approaches the event horizon are explored Evolutionary theory which relates to the Singularity Archetype through a number of dynamic paradoxes is discussed Many popular books and movies are analyzed as permutations of the Singularity Archetype including Avatar Childhood's End Village of the Damned Powder and 2001 A Space Odyssey The Singularity Archetype is a primordial image of human evolutionary metamorphosis which emerges from the collective unconscious How the Archetype Manifests a Composite Picture A rupture of plane event occurs usually threatening the survival of the individual and or species The event is a shock that disrupts the equilibrium of body physical world and also individual collective psyche It is an ontological shock that will be viewed as the worst thing possible by individual collective ego There is another rupture of plane that may actually be the same rupture as above but seen from a cosmic rather than a personal view The shock is revealed to be a transcendent evolutionary event The revelation of the transcendent aspect will often involve spiral motifs and unusual lights Consciousness and communication metamorphose and with them core aspects ego individuality connection to linear time corporeality gender identification social order etc fundamentally transform There is a vision or actualization of release from some or all limits of corporeal incarnation and the emergence of glorified bodies which have enhanced powers and various degrees of etherialization More visual and telepathic modes of consciousness and communication emerge and this is part of a transformation of individuality into Homo gestalt a new species where individual psyches are networked telepathically The Singularity Archetype may be experienced and even actualized to various degrees by an individual through transcendent and or anomalous experiences such as near death experiences NDEs UFO abduction close encounter experiences kundalini and psychotropic episodes As with encounters with all archetypes individuals and groups attach idiosyncratic material to it such as particular end dates and scenarios Another way of defining the Singularity Archetype in its collective form is as a resonance flowing backward through time of an approaching Singularity at the end of human history The Singularity Archetype relates to both the evolutionary event horizon of the species and for the individual the event horizon of death

**Anatomy of Science Fiction** Donald E. Morse, 2009-03-26 This wide ranging collection of essays re opens the connection between science fiction and the increasingly science fictional world Kevin Alexander Boon reminds us of the degree to which the epistemology of science fiction infects modern political discourse K roly Pint r explores the narrative structures of utopian estrangement and Tam s B nyei and Brian Attebery take us deeper into the cultural

exchanges between science fiction and the literary and political worlds In the second half Donald Morse Nicholas Ruddick and va Federmayer look at the way in which science fiction has tackled major ethical issues while Amy Novak and K lm n Matolcsy consider memory and evolution as cultural batteries The book ends with important discussions of East German and Hungarian science fiction by Usch Kiausch and Donald Morse respectively I envisage that the book will find a market both among academics and as a recommended text to undergraduates as it offers interesting essays on important readers The tendency for science fiction to be offered as a literature class to science majors is not usually considered but this book would be particularly appropriate for such a market Dr Farah Mendelsohn Middlesex University

**The Golden Age of Science Fiction** John Wade,2020-11-12 A detailed look at the British world of science fiction in the 1950s John Wade grew up in the 1950s a decade that has since been dubbed the golden age of science fiction It was a wonderful decade for the genre but not so great for young fans With early television broadcasts being advertised for the first time as unsuitable for children and the inescapable barrier of the X certificate in the cinema barring anyone under the age of sixteen the author had only the radio to fall back on and that turned out to be more fertile for the budding SF fan than might otherwise have been thought Which is probably why as he grew older rediscovering those old TV broadcasts and films that had been out of bounds when he was a kid took on a lure that soon became an obsession For him the super accuracy and amazing technical quality of today s science fiction films pale into insignificance beside the radio early TV and B picture films about people who built rockets in their back gardens and flew them to lost planets or tales of aliens who wanted to take over if not our entire world then at least our bodies This book is a personal account of John Wade s fascination with the genre across all the entertainment media in which it appeared the sort of stuff he reveled in as a young boy and still enjoys today Not only a well researched book grounded in hundreds of sources but also an unmistakable labor of love New York Journal of Books
