**Surfing through Hyperspace** Clifford A. Pickover, 1999-09-23 Do a little armchair time travel rub elbows with a four dimensional intelligent life form or stretch your mind to the furthest corner of an uncharted universe With this astonishing guidebook Surfing Through Hyperspace you need not be a mathematician or an astrophysicist to explore the all but unfathomable concepts of hyperspace and higher dimensional geometry No subject in mathematics has intrigued both children and adults as much as the idea of a fourth dimension Philosophers and parapsychologists have meditated on this mysterious space that no one can point to but may be all around us Yet this extra dimension has a very real practical value to mathematicians and physicists who use it every day in their calculations In the tradition of Flatland and with an infectious enthusiasm Clifford Pickover tackles the problems inherent in our 3 D brains trying to visualize a 4 D world muses on the religious implications of the existence of higher dimensional consciousness and urges all curious readers to venture into the unexplored territory lying beyond the prison of the obvious Pickover alternates sections that explain the science of hyperspace with sections that dramatize mind expanding concepts through a fictional dialogue between two futuristic FBI agents who dabble in the fourth dimension as a matter of national security This highly accessible and entertaining approach turns an intimidating subject into a scientific game open to all dreamers Surfing Through Hyperspace concludes with a number of puzzles computer experiments and formulas for further exploration inviting readers to extend their minds across this inexhaustibly intriguing scientific terrain

**ECOOP 2005 - Object-Oriented Programming** Andrew Black, 2005-07-18 The 19th Annual Meeting of the European Conference on Object Oriented Programming ECOOP 2005 took place during the last week of July in Glasgow Scotland UK This volume includes the refereed technical papers presented at the conference and two invited papers It is traditional to preface a volume of proceedings such as this with a note that emphasizes the importance of the conference in its respective field Although such self evaluations should always be taken with a large grain of salt ECOOP is undisputedly the pre eminent conference on object orientation outside of the United States In its turn object orientation is today's principal technology not only for programming but also for design analysis and specification of software systems As a consequence ECOOP has expanded far beyond its roots in programming to encompass all of these areas of research which is why ECOOP has remained such an interesting conference But ECOOP is more than an interesting conference It is the nucleus of a technical and academic community a community whose goals are the creation and dissemination of new knowledge Chance meetings at ECOOP have helped to spawn collaborations that span the boundaries of our many subdisciplines bring together researchers and practitioners cross cultures and reach from one side of the world to the other The ubiquity of fast electronic communication has made maintaining these collaborations easier than we would have believed possible only a dozen years ago But the role of conferences like ECOOP in establishing collaborations has not diminished
