Kabakciev,2013-03-09 Based on an earlier edition published in 1992 in Bulgarian this book offers a specific approach to one of the most controversial problems in linguistics According to it aspect is the result of a subtle and complex interplay between the referents of verbs and nouns in the sentence Special attention is paid to the role nouns and noun phrases play in the explication of aspect in English and similar languages The grammatical marking of aspect is shown to be

a compensatory phenomenon imposed by language structure Comparisons made using Slavic mainly Bulgarian data reveal that compositional aspect is a mirror image of verbal aspect When explicated compositionally aspect is also determined by pragmatic factors Ultimately it is part of man s cognitive potential   <u>Verbal Prepositions and Argument Structure</u> Mai Ellin Tungseth,2008 This book investigates different types of verb PP combinations and examines the types of meanings which arise when the argument structure of the PP fuses with the verbal argument structure Focussing mainly on data from Norwegian the book investigates three different empirical domains of PP VP combinations and concludes that the arising interpretations result from a combination of the fine grained structure of the PP the structure of the verb phrase and the different modes of combination The book sheds new light on the syntax semantics interplay while adding new insight about the properties of the category P in Norwegian The book also contributes to the debate between Lexicalism and Constructionism and it concludes that a moderate Constructionist model with a fine grained syntactic structure determining interpretation is best equipped to handle the enormous flexibility of verb prepositional phrase combinations of the types explored   *The Parameter of Aspect* C.S. Jacobsen,Yukinori Takubo,2020-10-12 The volume on Semantics and Pragmatics presents a collection of studies on linguistic meaning in Japanese either as conventionally encoded in linguistic form the field of semantics or as generated by the interaction of form with context the field of pragmatics representing a range of ideas and approaches that are currently most influentialin these fields The studies are organized around a model that has long currency in traditional Japanese grammar whereby the linguistic clause consists of a multiply nested structure centered in a propositional core of objective meaning around which forms are deployed that express progressively more subjective meaning as one moves away from the core toward the periphery of the clause The volume seeks to achieve a balance in highlighting both insights that semantic and pragmatic theory has to offer to the study of Japanese as a particular language and conversely contributions that Japanese has to make to semantic and pragmatic theory in areas of meaning that are either uniquely encoded or encoded to a higher degree of specificity in Japanese by comparison to other languages such as conditional forms forms expressing varying types of speaker modality and social deixis *Structures in the Mind* Ida Toivonen,Piroska Csuri,Emile Van Der Zee,2015-10-23 New research on different areas of cognition focusing on language with contributions that treat topics explored in Ray Jackendoff s pioneering research This volume offers new research in cognitive science by leading scholars exploring different areas of cognition with an emphasis on language The contributions in such fields as linguistic theory psycholinguistics evolution and consciousness reflect the thriving interdisciplinary scholarship in cognitive science today Ray Jackendoff s pioneering cross disciplinary work was instrumental in establishing the field and Structures in the Mind with contributions from Jackendoff s colleagues and former students is a testament to his

lasting influence After an introduction that includes short reflections on Jackendoff s work by such scholars as Paul Bloom Noam Chomsky Barbara Partee and Steven Pinker the book presents chapters on linguistics which build on Jackendoff s theories of conceptual semantics and parallel architectures psycholinguistics reaching from linguistics to psychology and neuroscience and other topics as varied as the evolution of linguistic and musical abilities consciousness music theory and the grammar of comics with this particular chapter taking the form of a comic The chapters present fresh data bold claims and stimulating theoretical discussions offering a celebration of cognitive science today Contributors Daniel B ring Neil Cohn Peter W Culicover Daniel Dennett Cecily Jill Duffield W Tecumseh Fitch Lila Gleitman Jane Grimshaw Yosef Grodzinsky Katharina Hartmann Albert Kim Max Soowon Kim Barbara Landau Fred Lerdahl Willem J M Levelt Joan Maling Bhuvana Narasimhan Urpo Nikanne Catherine O Connor Maria Mercedes Pi ango Daniel Silverman Henk Verkuyl Heike Wiese Eva Wittenberg Edgar B Zurif Joost Zwarts **Enciclopedia de Lingüística Hispánica Volume I** Javier Gutiérrez-Rexach,2016-01-29 The Enciclopedia de Linguistica Hisp nica provides comprehensive coverage of the major and subsidiary fields of Spanish linguistics Entries are extensively cross referenced and arranged alphabetically within three main sections Part 1 covers linguistic disciplines approaches and methodologies Part 2 brings together the grammar of Spanish including subsections on phonology morphology syntax and semantics Part 3 brings together the historical social and geographical factors in the evolution of Spanish Drawing on the expertise of a wide range of contributors from across the Spanish speaking world the Enciclopedia de Linguistica Hisp nica is an indispensable reference for undergraduate and postgraduate students of Spanish and for anyone with an academic or professional interest in the Spanish language Spanish linguistics *Revisiting Aspect and Aktionsart* Francis G. H. Pang,2016-02-02 In Revisiting Aspect and Aktionsart Francis G H Pang employs a corpus approach to analyze the relationship between Greek aspect and Aktionsart Recent works have tried to predict the meanings that emerge when a certain set of clausal factors and lexical features combine with one of the grammatical aspects Most of these works rely heavily on Zeno Vendler s telicity distinction Based on empirical evidence Pang argues that telicity and perfectivity are not related in a systematic manner in Koine Greek As a corollary Aktionsart should be considered an interpretive category meaning that its different values emerge not from the interaction of only one or two linguistic parameters but from the process of interpreting language in context Modeling Biblical Language Stanley E. Porter,Gregory P. Fewster,Christopher D. Land,2016-03-21 Modeling Biblical Language presents articles with some of the latest scholarship applying linguistic theory to the study of the Christian Bible The contributors are all associated with the McMaster Divinity College Linguistic Circle a collegial forum for presenting working papers in modern linguistics especially Systemic Functional Linguistics and biblical studies The papers address a range of topics in linguistic theory and the Hebrew and Greek languages Topics include linguistic model building temporality and verbal aspect Greek lexical semantics and Hebrew Greek translation appraisal and evaluation theory metaphor theory corpus linguistics discourse analysis and Greek

clausal structure These various areas of linguistic exploration contribute generally to the interpretation and analysis of the Old and New Testaments as well as to linguistic theory proper **The Chinese Aspectual System** Hongzhi Xu,2021-07-22 This book presents a theoretical study on aspect in Chinese including both situation and viewpoint aspects Unlike previous studies which have largely classified linguistic units into different situation types this study defines a set of ontological event types that are conceptually universal and on the basis of which different languages employ various linguistic devices to describe such events To do so it focuses on a particular component of events namely the viewpoint aspect It includes and discusses a wealth of examples to show how such ontological events are realized in Chinese In addition the study discusses how Chinese modal verbs and adverbs affect the distribution of viewpoint aspects associated with certain situation types In turn the book demonstrates how the proposed linguistic theory can be used in a computational context Simply identifying events in terms of the verbs and their arguments is insufficient for real situations such as understanding the factivity and the logical temporal relations between events The proposed framework offers the possibility of analyzing events in Chinese text yielding deep semantic information *Linguistics* ,2007 **Advances in the Study of Biblical Hebrew and Aramaic** Benjamin J. Noonan,2020-02-18 Advances in the Study of Biblical Hebrew and Aramaic by Benjamin J Noonan examines issues of interest in the current world of Biblical Hebrew and Aramaic scholarship and their impact on understanding the Old Testament it provides an accessible introduction for students pastors professors and commentators to understand these important issues Aspectual Grammar and Past Time Reference Laura A. Michaelis,2002-01-04 This study presents a semantic framework for analysing all aspectual constructions in terms of the event state distinction and describes the grammatical expression of aspectual meaning in terms of a theory of grammatical constructions In this theory grammatical constructions like words are conventionalized form meaning pairs which are best described not only with respect to their intrinsic semantic values but also with respect to the functional oppositions in which they participate **The Structure of Modern English** Laurel J. Brinton,2000 This text is designed for undergraduate and graduate students interested in contemporary English especially those whose primary area of interest is English as a second language Focus is placed exclusively on English data providing an empirical explication of the structure of the language *A Grammar of Coastal Marind* Bruno Olsson,2021-06-08 This grammar provides the first modern comprehensive description of Coastal Marind It is a Papuan language spoken by the coastal dwelling Marind Anim formerly expansionistic head hunters of the Southern New Guinea lowlands Like the other languages of the poorly known Anim family Coastal Marind features astonishingly complex verb morphology and a range of unusual phenomena including indexing of up to four arguments on the verb verbal marking of focus the Orientation system engagement prefixes tracking the attention of the addressee and a system of four genders realised by intricate agreement patterns The structure of the language is examined in a detailed but accessible way and its many complexities are brought to life by contextualised spontaneous data drawn from a rich audio visual corpus *The*
