**Gifts** Richard Hyland, 2009-06-05 Gifts A Study in Comparative Law is the first broad based study of the law governing the giving and revocation of gifts ever attempted Gift giving is everywhere governed by social and customary norms before it encounters the law and the giving of gifts takes place largely outside of the marketplace As a result of these two characteristics the law of gifts provides an optimal lens through which to examine how different legal systems engage with social practice The law of gifts is well developed both in the civil and the common laws Richard Hyland s study provides an excellent view of the ways in which different civil and common law jurisdictions confront common issues The legal systems discussed include principally in the common law those of Great Britain the United States and India and in the civil law the private law systems of Belgium and France Germany Italy and Spain Professor Hyland also serves a critique of the dominant method in the field which is a form of functionalism based on what is called the praesumptio similitudinis namely the axiom that once legal doctrine is stripped away developed legal systems tend to reach similar practical results His study demonstrates to the contrary that legal systems actually differ not only in their approach and conceptual structure but just as much in the results

Medicine, Money, and Morals Marc A. Rodwin, 1995 Physicians conflicts of interest are rampant in the American medical community Today it is not uncommon for doctors to refer patients to clinics or labs in which they have a financial interest for hospitals to offer incentives to physicians who refer patients to them or for drug companies to provide lucrative give aways to entice doctors to use their brand name drugs

**Psychotherapy Tradecraft: The Technique And Style Of Doing** Theodore H. Blau, 2014-01-09 First published in 1988 The literature of psychotherapy is heavily weighted on the side of theory There is an almost complete absence of tradecraft what to do when to do it and how to do it Tradecraft refers to the specific techniques used by experienced and skillful psychotherapists to create the therapeutic setting to invite

and maintain a therapeutic alliance to enhance the patient's progress and finally to allow the patient to integrate and complete the process of psychotherapy. A search of psychoanalytic literature reveals an enormous amount of theory and speculation, countertheory and counter speculation but little tradecraft. This book aims to fulfil that gap.
