Old Sylvan Beach and the Pavilions Ann Uloth Malone, Dan Becker, 2014 Sylvan Beach is synonymous with bathing beauties moonlit pavilions the jitterbug the Charleston and a train called the Moonlight Express as well as picnics carnivals music romance love and legend The unlikely truth is that familiarity and age can make our most beautiful treasures banal if we do not pause to remember and observe and venerate the events and moments when we first saw or most appreciated a place like Sylvan Beach For this reason we ask you to come back with us to Sylvan Beach where for over 100 years Houston and much of Texas has come to play dance pray fall in love relax or simply swim in the bay Today the park and its pavilion are enjoying renewed popularity

Brand-Driven City Building and the Virtualizing of Space Alexander Gutzmer, 2014-04-24 This book is an investigation of the cultural phenomenon of branding and its transformational effects on the contemporary spatial and urban reality It develops a novel understanding of the rationale behind the construction of large scale architectural complexes that relate to corporate brands and of its tremendous cultural effects The author suggests that what we see today is the creation of global mass ornaments of a thorough ornamentalization of the entire globe The origins of this are discussed with regard to examples of corporate brand building from Europe and China Autostadt Wolfsburg BMW Welt Munich and Anting New Town Additional cases are several simulated spaces in Berlin and the space branding activities of companies like Apple or Prada Theoretically the author develops an innovative poststructuralist framework combining ideas from Gilles Deleuze with the space philosophy of Peter

Sloterdijk He analyzes how the corporate redefinition of space makes the city enter into a mode of virtual urbanity This idea leads to a notion of a global urban and ultimately the global mass ornament This concept of a global mass ornament is developed here with reference to Sloterdijk's concept of a world of spheres The latter is used to understand the new mode of spatiality of mediatized spaces The book makes the point that our world is involved in a process of mass ornamentalization that has only just begun The concept of the global mass ornament is the first to come to grips with a culture in which branding is effectively changing the physiognomy of the earth The global mass ornament is a banner for a cultural transformation that employs architecture sign theory and mechanisms borrowed from traditional advertising and from social media as well as social processes and that we have yet to properly understand This book is a significant step forward in this respect

The Architectural Imagination at the Digital Turn Nathalie Bredella, 2022-06-29 The Architectural Imagination at the Digital Turn asks what it means to speak of a digital turn in architecture It examines how architects at the time engaged with the digital and imagined future modes of practice and looks at the technological conceptual and economic phenomena behind this engagement It argues that the adoption of digital technology in architecture was far from linear but

depended on complex factors from the operative logic of the technology itself to the context in which it was used and the people who interacted with it Creating a mosaic like account the book presents debates projects and publications that changed how architecture was visualized fabricated and experienced using digital technology Spanning the university new media art institutes ecologies architectural bodies fabrication and the city it re evaluates familiar narratives that emphasized formal explorations instead the book aims to complicate the myth of the digital by presenting a nuanced analysis of the material and social context behind each case study During the 1990s architects repurposed software and technological concepts from other disciplines and tested them in a design environment Some architects were fascinated by its effects others were more critical Through its discussion on case studies places and themes that fundamentally influenced discourse formation in the era this book offers scholars researchers and students fresh insights into how architecture can engage with the digital realm today
