**Nation-Building (1973)** Ying-Mao Kau, 2017-09-29 This revised edition brings the problem of Third World conflict into the post Cold War era It asks when and how should the developed countries intervene in internal wars outside of their traditional geopolitical interest and what can such intervention realistically accomplish

### *Chinese Naval Strategy in the 21st Century*

James R. Holmes, Toshi Yoshihara, 2012-09-10 Alfred Thayer Mahan has been called America's nineteenth century evangelist of sea power and the intellectual father of the modern US Navy. His theories have a timeless appeal and Chinese analysts now routinely invoke Mahan's writings exhorting their nation to build a powerful navy. Economics is the prime motivation for maritime reorientation and securing the sea lanes that convey foreign energy supplies and other commodities now ranks near or at the top of China's list of military priorities. This book is the first systematic effort to test the interplay between Western military thought and Chinese strategic traditions vis vis the nautical arena. It uncovers some universal axioms about how theories of sea power influence the behaviour of great powers and examines how Mahanian thought could shape China's encounters on the high seas. Empirical analysis adds a new dimension to the current debate over China's rise and its importance for international relations. The findings also clarify the possible implications of China's maritime rise for the United States and illuminate how the two powers can manage their bilateral interactions on the high seas. Chinese Naval Strategy in the 21st Century will be of much interest to students of naval history, Chinese politics and security studies. The Reserve Policies of Nations Richard Weitz, 2007 This work provides a comprehensive assessment of critical developments in the reserve policies of the world's major military powers as well as a wealth of data on recent developments affecting the reserve policies of Australia, Britain, Canada, China, France, Germany, Israel, Japan and Russia. *China's Rise and the Balance of Influence in Asia* William W. Keller, Thomas G. Rawski, 2007-05-31 China's protracted boom and political transformation is a major episode in the history of global political economy. Beginning in the late 1970s, China experienced a quarter century of extraordinary growth that raised every indicator of material welfare, lifted several hundred million out of poverty and rocketed China from near autarky to regional and even global prominence. These striking developments transformed China into a major US trade and investment partner, a regional military power and a major influence on national economies and cross national interchange throughout the Pacific region. Beijing has emerged as a voice for East Asian economic interests and an arbiter in regional and even global diplomacy from the Asian financial crisis to the North Korean nuclear talks. China's accession to the World Trade Organization promises to accentuate these trends. The contributors to this volume provide a multifaceted examination of China in the areas of economics, trade, investment, politics, diplomacy, technology and security, affording a greater understanding of what relevant policies the United States must develop. This book offers a counterweight to overwrought concerns about the emerging Chinese threat and makes the case for viewing China as a force for stability in the twenty first century. **Chinese Security Policy** Robert Ross, 2009-05-20 This volume provides a coherent and comprehensive understanding of Chinese security policy, comprising essays written by one of America's leading scholars. Chinese Security Policy covers such fundamental areas as the role of international structure in state behavior, the use of force in international politics, including deterrence, coercive diplomacy and war, and the sources of great power conflict and cooperation and balance of power politics, with a recent focus on international power transitions. The research integrates the

realist literature with key issues in Chinese foreign policy thereby placing China's behaviour in the larger context of the international political system. Within this framework Chinese Security Policy considers the importance of domestic politics and leadership in Chinese policy making. This book examines how Chinese strategic vulnerability since U.S. China rapprochement in the early 1970s has compelled Beijing to seek cooperation with the United States and to avoid U.S. China conflict over Taiwan. It also addresses the implications of the rise of China for the security of both United States and of Chinese neighbors in East Asia and considers the implications of China's rise for the regional balance of power and the emerging twenty-first century East Asian security order. This book will be of great interest to all students of Chinese Security and Foreign Policy, Chinese and Asian Politics, U.S. foreign policy and International Security in general.

**The Lessons of History: The Chinese People's Liberation Army at 75**, *People's Republic of China People's Liberation Army Air Force* Kenneth W. Allen, 1991

**Routledge Handbook of Chinese Security** Lowell Dittmer, Maochun Yu, 2015-05-08 Located in the center of Asia with one of the largest land frontiers in the world and 14 neighbors whose dispositions could not easily be predicted, China has long been obsessed with security. In this handbook an internationally renowned team of contributors provide a comprehensive and systematic analysis of contemporary thinking about Chinese national security. Chapters cover the PRC's historical ideological and doctrinal heritage related to security, its security arrangements and policies targeting key regions and nations of the world, the security aspects of the PRC's ground, air, sea, space and cyber forces as well as the changing and expanding definition and scope of China's security theory and practice.

*China Watching* Robert Ash, David Shambaugh, Seiichiro Takagi, 2007-01-24 An international team of contributors analyzes the state of European, Japanese and American scholarship on China over the last decade, exploring in depth the main subjects and trends in research being done on contemporary Chinese politics, economy, foreign affairs and security studies.

**The People's Liberation Army in the Information Age** James C. Mulvenon, Richard H. Yang, 1999 The product of a 1998 RAND conference, this collection discusses the People's Liberation Army. It covers the non-hardware side of the PLA's modernization and examines the critical software side, including civil-military relations, professionalism, logistics, training, doctrine and more.

**Transition from Communism in China** Edwin A. Winckler, 1999 Looks at China's transition in comparison to other transitions from communism, going beyond comparisons of whole countries to comparisons of institutional sectors and comparing differing theoretical approaches to regime type and regime change. Subjects include Leninist adaptability in China and Taiwan, military dimensions of regime transition, economic crisis and market transition in the 1990s, principal agent analysis of fiscal decentralization, state birth, planning and reconstituting the arts and sciences. *Civil-military Relations in Today's China: Swimming in a New Sea* David M. Finkelstein, Kristen Gunness, 2015-03-26 This work provides an in-depth and up-to-date examination of civil-military relations in China. It reflects the significant changes taking place in Chinese society and their impact on the civil-military dynamic, with particular attention to how the military will fit in with the

new class of entrepreneurs Rather than focusing exclusively on elite Party Army relations the book examines civil military relations from various vantage points at the center and in the provinces between civilian leaders and military leaders from a strictly military perspective and from a civilian perspective and from the angle of specific issue areas Chapters explore issues such as the impact of AIDS the defense budget the emerging dynamic between the military and China's new leadership resettling demobilized troops back into civilian life and the role of the militia reserve units and other civilian groups The contributors are highly respected specialists in China studies including political scientists historians PLA specialists and sociologists They present a vibrant portrait of the new civil military dynamic in the PRC within the complex social changes that China is exploring today *Defense Policy Choices for the Bush Administration, 2001-2005* Michael E.

O'Hanlon, 2010-12-01 This latest study in the Brookings series on U S defense strategy and the defense budget reviews current American military capabilities and offers suggestions for the new administration and Congress Michael O Hanlon makes sense of the hot political topic of military readiness questions the continued relevance of the current two war framework for structuring most conventional combat forces and challenges the wisdom of current plans for the procurement of advanced jet fighters helicopters and submarines The book also focuses on missile defense other means of homeland defense the so called revolution in military affairs and possible conflicts between Taiwan and China that could involve U S forces Throughout the author looks for ways to close the gap between the cost of projected U S defense forces and the budget actually available to the Pentagon *China's Transition Into the 21st Century* David L. Shambaugh, Zhongchun Wang, 1996 This past April the Army War College's Strategic Studies Institute held its Seventh Annual Strategy Conference The theme China Into the 21st Century Strategic Partner and or Peer Competitor was especially timely Dr David Shambaugh and Senior Colonel Wang Zhongchun look at China from two very different perspectives Professor Shambaugh contends that those who succeed Deng Xiaoping fearful of any further erosion of Communist Party hegemony and determined to return China to a purer form of neo Maoist Marxism will become even more conservative as China's economic and social problems intensify Despite considerable political and economic challenges his best estimate is that China will from inherent inertia muddle through well into the 21st century Indeed it is in the interests of the United States for China to hold together as a territorial nation state and political unit because disintegration would foster socio economic dislocations that could destabilize Asia At the same time U S policy must maintain pressure on China to improve human and civil rights performance Senior Colonel Wang Zhongchun provides a tour d horizon of nearly a half century of Chinese defense policy from a distinctly PRC perspective He then argues that China has attained a position of security and even though the world presents many uncertainties Beijing is committed to playing a positive role for peace and stability in Asia The central principle in today's security analysis is that defense policy must support economic development so that China can grow into an economically progressive democratic and modern socialist country Colonel Wang portrays China's military posture as one that seeks above

all to protect China's territorial sovereignty while focusing in this relatively peaceful era on modernizing in step with national economic development

**Encyclopedia of Chinese History** Michael Dillon, 2016-12-01 China has become accessible to the west in the last twenty years in a way that was not possible in the previous thirty. The number of westerners travelling to China to study for business or for tourism has increased dramatically and there has been a corresponding increase in interest in Chinese culture, society and economy and increasing coverage of contemporary China in the media. Our understanding of China's history has also been evolving. The study of history in the People's Republic of China during the Mao Zedong period was strictly regulated and primary sources were rarely available to westerners or even to most Chinese historians. Now that the Chinese archives are open to researchers there is a growing body of academic expertise on history in China that is open to western analysis and historical methods. This has in many ways changed the way that Chinese history, particularly the modern period, is viewed. The Encyclopedia of Chinese History covers the entire span of Chinese history from the period known primarily through archaeology to the present day. Treating Chinese history in the broadest sense, the Encyclopedia includes coverage of the frontier regions of Manchuria, Mongolia, Xinjiang and Tibet that have played such an important role in the history of China. Proper and will also include material on Taiwan and on the Chinese diaspora. In A-Z format with entries written by experts in the field of Chinese Studies, the Encyclopedia will be an invaluable resource for students of Chinese history, politics and culture.
