diet statistically increased insulin sensitivity The dash is a positive step in managing effects of diabetes in addition to the insulin sensitivity This is because many people with diabetes have a higher risk of heart disease and stroke Hypertension increases this risk so a diet that decreases blood pressure will have the benefit of being a tool of prevention of other diseases in individuals with diabetes Develop your relationship with your medical provider and be sure to maintain contact about any questions concerns or changes in your diabetes symptoms All the recipes also include detailed information on calories fat saturated fat sodium carbohydrates Total sugars protein Dietary fiber as well as serving sizes **Forum** ,1997
