The Perfect Planet And Other Stories:

The Perfect Planet Marvin Kananen, 2014-01-27 THE PERFECT PLANET AND OTHER STORIES come from the mind of Marvin Kananen. Some stories date back for decades; most were written during Mr Kananen's last assignment in Africa where the land and people gave him time to sit and write and read. In a land without television, occasional electricity, irregular water, Mr Kananen and his wife lived among the Maasai people for twelve years in a one-room hut between the Rift Valley and Mt Kilimanjaro. Every night 6:30 every day of the year he lived 3 degrees south of the equator when the sun went down they stayed indoors. The night in Africa belongs to the animals and everyone stays within their houses. In Africa when you hear something in the dark you never go and investigate. There in nighttime Africa Kananen finally found the time to write. And write he did. In those last twelve years he completed 152 journals, 30,500 pages, over 200 stories and a half dozen longer works. These twenty-four stories cover his Science Fiction tales, a subject he loves dearly and deeply. Other collections of his short stories can be found in WILD PITCHES 33 and a 1-3 BASEBALL STORIES and BAD THEOLOGY short stories on strange religious themes.

AstroNuts Mission Three: The Perfect Planet Jon Scieszka, 2021-09-21 This series is *The Hitchhiker's Guide to the Galaxy* meets *The Bad Guys* in a funny, visually daring adventure series for reluctant readers, teachers, and librarians alike. This hilarious, visually groundbreaking read is the conclusion to a major series by children's literature legend Jon Scieszka. The book follows a final

mission where AlphaWolf LaserShark SmartHawk and StinkBug must find a planet fit for human life after we've finally made Earth unlivable. Time is up for our friends the AstroNuts. In fact, time is up for you too. If they don't succeed on this mission, Earth is doomed. So when the team finds out they're being sent to a place called the perfect planet, their mission sounds way too easy. Unfortunately, the second they land, they realize they'll be dealing with the most dangerous species of all time: humans. Huh. Where in the universe is this supposedly perfect place? And how will the Nuts manage to convince the humans to risk death for the sake of their lives?

Featuring full color illustrations throughout, Planet Earth as the narrator, an out of this world gatefold, and how to draw pages in the back, eager and reluctant readers alike will be over the moon about this new mission. Full of laugh out loud humor with a thoughtful commentary on the reality of climate change at the core of the story, this creatively illustrated full color action packed space saga is a can't put it down page turner for readers of all levels and fans ready to blast past Dogman.

EXCITING BIG NAME TALENT Jon Scieszka is one of the biggest names in children's books. The first National Ambassador of Young People's literature, he and Steven Weinberg toured extensively for this series. They'll continue making their way around the world for Book 3. You might have met them at ALA, the National Book Festival, the Rabbit Hole, the Brooklyn Book Festival, the Illinois Reading Council, the Tween Reads Book Festival, the Texas Book Festival, the NYC Department of Education Fall Conference, the 826 Story Soirée in New York, or NCTE in Baltimore.

POPULAR SERIES MISSIONS 1 and 2 received starred reviews, amazing blurbs, and tons of industry love. MISSION 1 was an Amazon Best Book of the Year. Dav Pilkey, Jennifer Holm, LeUyen Pham, and Gene Luen Yang are all big fans. Check out those blurbs.

FUN AND SCIENTIFIC The book incorporates STEM elements in a way that readers will find fun and entertaining while teachers and librarians will find it clever and original.

PERFECT FOR BUDDING GRETA THUNBERGS This book successfully talks about the effect of climate change and impels its readers to take action without feeling didactic or message-y at all.

TIES TO REAL WORLD ISSUES Readers will recognize quite a few dilemmas the AstroNuts face from current events on Earth. Making connections between fiction and non-fiction is a big developmental milestone for young readers, and this book works as an effective allegory for our most dire contemporary concerns.

RELUCTANT READER FRIENDLY The book is a great vehicle for reluctant readers, featuring cool topics and bright art and relying on visual literacy and very few words.

A CONSTELLATION OF TOPICS Space, STEM, and talking animals. There's something here for every reader.

LOLS FOR DAYS The book is funny and will delight kids who love books like Wimpy Kid, The 39 Story Treehouse, Dog Man, and Captain Underpants. While it contains serious ideas, it's a quick, easy, and fun visual read.

GROUNDBREAKING DESIGN The hundreds of pages of full color art are dynamic and engaging, and it doesn't look like anything else out there. Steven Weinberg bases his art on public domain pieces from the Smithsonian museum. Teachers turn to the books for this element of the art and use it in classrooms to talk about collage, idea sourcing, history, and art medium.

PERFECT ART PROJECT On the website, kids can download pages of the original art and use it to make their own hybrid animal collages. Perfect for fans of Dog Man, Big Nate, Wimpy Kid.

Burger,2011-04-29 A masterful survey Times Literary Supplement A concise extremely well written journey about this planet s history Highly recommended ChoiceIn a feat that may rival time travel Burger has condensed 4 5 billion years into 294 eminently readable pages as he builds a case for solitude in our Milky Way galaxy Burger writes with the clarity and humor of one who has had experience communicating complicated ideas to the lay public Boston GlobeFor many years the federal government funded the Search for Extraterrestrial Intelligence SETI later popularized by Carl Sagan s novel Contact and the movie starring Jodie Foster Though in actuality SETI never did make contact with signals from an alien civilization the search continues to this day through privately funded endeavors How likely is it that intelligent life exists elsewhere in the universe This is the intriguing question that has prompted William Burger s illuminating and absorbing exploration of the unusual circumstances surrounding life on earth Examining the critical episodes in our planet s early history and the peculiar trajectory of life on our world Burger shows that the long odyssey of planet Earth may be utterly unique in our galaxy For example he describes features of the sun that are far from average By some estimates 95 percent of the other stars in the Milky Way galaxy are smaller and it is unlikely that any of them could supply the energy requirements for a life sustaining

planet such as our own Earth as the third planet from the sun sits within the Goldilocks orbit it is in the perfect position to receive not too much heat like Mercury and Venus and not too little like more distant planets of the solar system but just the right amount to foster the development of life Turning to the evolution of life itself Burger points out a host of amazing accidents for example the extinction of dinosaurs and the proliferation of flowering plants that make the steps along the way to Homo sapiens seem like very rare events indeed He also calls attention to the curious fact that the early hominid brain tripled in size over the relatively short time period leading to the appearance of modern human beings Finally he notes aspects of humanity's cultural evolution that seem unlikely to have been duplicated anywhere else Burger's enlightening evaluation of evolutionary and cosmic history full of fascinating details shows that the human achievement may be unique in our galaxy More Praise for Perfect Planet Clever Species This is by far the best existing treatment of the SETI problem Based on the most recent findings of science it analyzes in full detail all the unique factors that would have to be right for success Particularly fascinating is Burger's critical study of the ten thousands of unpredictable steps in the evolution of Homo sapiens after the origin of life A splendid history of mankind Ernst Mayr Harvard University I believe that this brilliant richly documented and well written book on par in historical influence or importance with classics such as Rachel Carson's Silent Spring Paul Ehrlich's The Population Bomb E O Wilson's On Human Nature or Sarah Blaffer's Mother Nature will go down as one of the most significant philosophical guides for us to follow as we stumble blindly into the 21st Century Hugh H Iltis Emeritus Botany Professor University of Wisconsin Madison With a lively narrative and at a headlong pace Bill Burger leads us expertly from the origin of our planet through to the evolutionary history of humankind Along the way he repeatedly highlights the part played by chance occurrence of favourable conditions Such contingency means that we can reconstruct our past but not predict our future But we can address Burger's central question Are we alone Soberingly he builds up step by step to his conclusion The history of evolution on Earth is a compelling story in its own right and one that
