

The Three Spheres of Influence

Sphere of Concern

The biggest sphere refers to anything that might be of interest or concern to you, but is fully outside of your control and your ability to influence.

Sphere of Influence

This includes all areas where you can affect outcomes and engage with others, but where you don't have direct control. What sits within this sphere are things you can actually take action on in your organisation.

Sphere of Control

This is the smallest sphere, because the only thing you can truly control in life is yourself; your actions, your decisions, your behaviours, and your words.

Spheres Of Influence:

Spheres of Influence Douglas S. Massey, Stefanie Brodmann, 2014-07-03 The black white divide has long haunted the United States as a driving force behind social inequality Yet the civil rights movement the increase in immigration and the restructuring of the economy in favor of the rich over the last several decades have begun to alter the contours of inequality Spheres of Influence co authored by noted social scientists Douglas S Massey and Stefanie Brodmann presents a rigorous new study of the intersections of racial and class disparities today Massey and Brodmann argue that despite the persistence of potent racial inequality class effects are drastically transforming social stratification in America This data intensive volume examines the differences in access to material symbolic and emotional resources across major racial groups The authors find that the effects of racial inequality are exacerbated by the class differences within racial groups For example when measuring family incomes solely according to race Massey and Brodmann found that black families average income measured 28 400 compared to Hispanic families 35 200 But this gap was amplified significantly when class differences within each group were taken into account With class factored in inequality across blacks and Hispanics family incomes increased by a factor of almost four with lower class black families earning an average income of only 9 300 compared to 97 000 for upper class Hispanics Massey and Brodmann found similar interactions between class and racial effects on the distribution of symbolic resources such as occupational status and emotional resources such as the presence of a biological father across racial groups Although there are racial differences in each group s access to these resources like income these disparities are even more pronounced once class is factored in The complex interactions between race and class are apparent in other social spheres such as health and education In looking at health disparities across groups Massey and Brodmann observed no single class effect on the propensity to smoke cigarettes Among whites cigarette smoking declined with rising class standing whereas among Hispanics it increased as class rose Among Asians and blacks there was no class difference at all Similarly the authors found no single effect of race alone on health Health differences between whites Asians Hispanics and blacks were small and non significant in the upper class but among those in the lower class intergroup differences were pronounced As Massey and Brodmann show in the United States a growing kaleidoscope of race class interactions has replaced pure racial and class disadvantages By advancing an ecological model of human development that considers the dynamics of race and class across multiple social spheres Spheres of Influence sheds important light on the factors that are currently driving inequality today

International Relations T V Paul,T. V. Paul,Markus Kornprobst,2025 This book argues that the world entered a new cold war

when Russia invaded Ukraine in 2022 While the United States and its allies are in competition with China Russia and their

allies this new cold war is far different from the old cold war The New Cold War and the Remaking of Regions shows how this

new competition will be multipolar and multiplex not a world separated into rigid blocs Rather secondary powers small states

and even non state actors will pragmatically pick and choose when their interests intersect with the great powers preserving

their flexibility and influence The new cold war will play out in regional competitions that may lead to either peaceful change

or conflict but it will also vary from region to region and across sectors such as the tech economy This volume contributes to

the study of regionalism in international relations and is part of a new wave of scholarship that changes the focus of

international relations from great powers alone to a recognition of the agency of others Contributors address the new cold
