

PH3700: TRA and TPB:

- TRA: Theory of Reasoned Action
- TPB: Theory of Planned Behavior

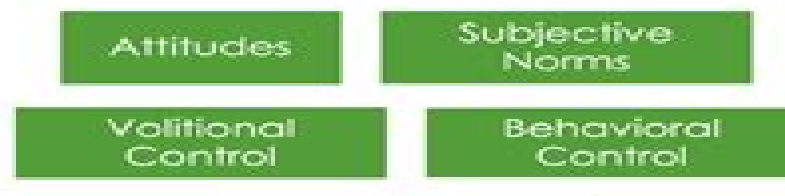

History:

- Attitudes were defined in the 1960s and 1970s as a comprising a person's beliefs, feelings, and actions towards a behavior (Hayden, 2023)
- Because of this, the following assumptions were made:
 - Attitude determined behavior
 - Repeated research failed to support this assumption. It was then thought that behavior was driven by intention to perform a behavior instead of attitude toward a behavior
- In 1975, social psychologists Martin Fishbein and Icek Ajzen conducted a review of studies done on behavior and attitude and, again, found little evidence of a relationship between the two.
- From their investigation, they concluded that intention to perform a behavior is what drives behavior rather than attitude toward the behavior. With this, the theory of reasoned action (TRA) was born.

Theoretical Concept:

- Intention (Health Behavior results from intention)
- The extent (or likelihood) to which someone is ready to engage in a certain behavior.
- People are more likely to do something if they plan or aim to do it, then if they do not. (Hayden, 2023)

Theoretical Constructs:
