**European Spirit, Adaption to Market Economy and National Identity in Poland and Ukraine** Matthias Reichhard,2008-09 When at the turn of the 1980 the face of the political world was largely remodelled with the vanishment of classical East and West blocs the economical wasteland created by the failed socialist planned economic system constituted a

fascinating research pasture for economists of all disciplines especially macroeconomists and specialists for economic politics At universities new faculties for transformation studies were created Authors like Rodrick elucidated the reasons for the acute period of the COMECON alliance in form of the Soviet trade shock de Melo van den Mortel also discussed reasons for discrepancy of initial conditions Aghion however most authors refer to the five dimensions of national culture presented by Hofstede which in the authors opinion oversimplify the complex and difficult observable domain of culture sometimes even is entangled in contradictions like with the high masculinity femininity index for Italy This is why the author rather oriented by the need belief value attitude continuum described by Culatta and thus developed his chapters on EU accession and

Education and the Spirit of Time Olli-Pekka Moisio, Juha Suoranta, 2006 The aim of this book is to raise current social political and moral issues in social theory by taking a critical stance towards historical global and educational themes in the context of culture politics and technology Thus the focus of the book is critical Zeitgeist analysis and its potential in addressing various social maladies of the present era Methodologically critical Zeitgeist analysis is argued to be of value in demonstrating how to both utilize and expand the possibilities of writing normative social theory **The Spirit of**

**Democracy** Larry Diamond, 2024-07-02 A neatly structured survey examines the prospects for universal democracy A refreshingly evenhanded overview of democracy's global prospects Kirkus Reviews Meticulous and gleaned from his experience Diamond is at his best when he recounts how ordinary people affect the democratic process The New York Times Book Review In 1974 nearly three quarters of all countries were dictatorships today more than half are democracies Yet recent efforts to promote democracy have stumbled and many democratic governments are faltering In this sweeping vision for advancing freedom around the world Larry Diamond a renowned sociologist at the Hoover Institution at Stanford University and coeditor of the Journal of Democracy examines how democracy progresses He demonstrates that the desire for democracy runs deep even in very poor countries and why seemingly entrenched regimes like Iran and China could become democracies within a generation Diamond urges the United States to vigorously support good governance and free civic organizations Only then will the spirit of democracy be secured Diamond is eloquent in arguing that despite the recent blunders of American democracy promoters there is still a role for the international community in helping societies that are struggling to be free Foreign Affairs The War between Russia and Ukraine Nicole Kunkel, Torsten Meireis, 2025-08-18

Depending on the global but also the European context peace ethical perspectives on the Russian Ukrainian war differ considerably While many Northern Western Middle and South Eastern European states stress the illegitimacy and illegality of Russia's invasion in Ukraine according to international law some European and many states in the global South and East take a different stance Thus important international agents like South Africa have abstained from voting on UN resolution A/RES/ES/11/1 March 2nd 2022 and also the renewed resolution A/ES/11/L.7 February 23rd 2023 Brazil's president Lula da Silva claims neutrality in the conflict South African officials understand Russia as a long standing ally and the conflict as a

**The Spirit of Socialism** Joseph Kellner, 2025-06-15 The Spirit of Socialism is a cultural history of the Soviet collapse It examines the millions of Soviet people who during the cascading crises of the collapse and the post Soviet transition embarked on a spirited and highly visible search for new meaning Amid profound disorientation these seekers found direction in their horoscopes or behind gurus in saffron robes or apocalyptic preachers or by turning from the most basic premises of official science and history to orient themselves anew The beliefs they seized on and even more the questions that guided their search reveal the essence of late Soviet culture and its legacy in post Soviet Russia To skeptical outsiders the seekers appeared eccentric deviant and above all un Soviet Yet they came to their ideas by Soviet sources and Soviet premises As Joseph Kellner demonstrates their motley beliefs reflect modern values that formed the spiritual core of Soviet ideology among them a high regard for science an informed and generous internationalism and a confidence in humanity to chart its own course Soviet ideology failed however to unite these values in an overarching vision that could withstand historical change And so as The Spirit of Socialism shows the seekers asked questions raised but not resolved by the Russian Revolution and subsequent Soviet order questions of epistemic authority of cultural identity and of history's ultimate meaning Although the Soviet collapse was not the end of history it was a rupture of epochal significance whose fissures extend into our own uncertain era
