Spirits In Motion:

Minds in Motion Anne M. Thell, 2017-08-31 The central claim of *Minds in Motion* is that British travel writing of the long eighteenth century functions as an epistemological playing field where authors test empiricist models of engagement with the world while simultaneously seeking out the role of the self and the imagination in producing knowledge Whether exploring the relationship between the senses and the mind the narrative viability of experimental detachment or the literary dynamics of virtual witnessing eighteenth century travel authors persistently confront their positionality and raise difficult questions about the nature and value of first hand experience In one way or another they also complicate empiricist ideals by exploring the limits of individual perception and the role of the imagination in generating and relating knowledge While the genre is often viewed as either numbingly documentary or non literary and commercial travel literature actually operates at the front line of the period s intellectual developments illustrating both how individual writers grapple with philosophical ideals and how these ideals filter into the lives of ordinary people Indeed travel literature directly engages the scientific and philosophical concerns of the period while it is also widely avidly read as such it offers models for cognitive and rhetorical practices that are evaluated and either embraced or rejected by readers in a process of identification not unlike that which occurs in early English fiction Moreover because eighteenth century travel literature is so crucial to the development of so many fields from botany to the novel it illustrates vividly the divisive energies of discipline and genre formation while also archiving the shared aims and methods of what will become discrete fields of study Travelogues as diverse as Margaret Cavendish s *Blazing World* 1666 and Samuel Johnson s *Journey to the Western Islands of Scotland* 1775 reveal the epistemological circuitry of the eighteenth century and historicize the absorption of the philosophical tendencies that have come to define modernity

Voice in Motion Gina Bloom, 2013-04-19 *Voice in Motion* explores the human voice as a literary historical and performative motif in early modern English drama and culture where the voice was frequently represented as struggling even failing to work In a compelling and original argument Gina Bloom demonstrates that early modern ideas about the efficacy of spoken communication spring from an understanding of the voice s materiality Voices can be cracked by the bodies that produce them scattered by winds when transmitted as breath through their acoustic environment stopped by clogged ears meant to receive them and displaced by echoic resonances The early modern theater underscored the voice s volatility through the use of pubescent boy actors whose vocal organs were especially vulnerable to malfunction Reading plays by Shakespeare Marston and their contemporaries alongside a wide range of late sixteenth and early seventeenth century texts including anatomy books acoustic science treatises Protestant sermons music manuals and even translations of Ovid Bloom maintains that cultural representations and theatrical enactments of the voice as unruly matter undermined early modern hierarchies of gender The uncontrollable physical voice creates anxiety for men whose masculinity is contingent on their capacity to discipline their voices and the voices of their subordinates By contrast for women the voice is most effective

not when it is owned and mastered but when it is relinquished to the environment beyond There the voice's fragile material form assumes its full destabilizing potential and becomes a surprising source of female power Indeed Bloom goes further to query the boundary between the production and reception of vocal sound suggesting provocatively that it is through active listening not just speaking that women on and off the stage reshape their world Bringing together performance theory theater history theories of embodiment and sound studies this book makes a significant contribution to gender studies and feminist theory by challenging traditional conceptions of the links among voice body and self Edgar Cayce on Vibrations Kevin J. Todeschi, 2007-06 Science caught up with the psychic readings of Edgar Cayce when it proved that all of materiality consisting of atoms and therefore protons neutrons and electrons is energy in motion Everything is a vibration Even the body's five senses operate through the use of vibrations The Cayce readings suggested that vibrations were also associated with healing consciousness and even locations In fact the Cayce information presents the premise that all of life in every dimension is actually just different manifestations of the One Force the Force that moved all of Creation into being Therefore all vibration is ultimately that One Force manifesting in the material world in a variety of ways Todeschi's latest title explores how everything from consciousness to the material is connected to vibration and how we continue to create and shape our world through the vibrations all around us Vibrations are essentially spirit in motion and our thoughts and actions affect our life and the way we are living *Blood in Motion* Abraham Noordergraaf, 2011-08-31 *Blood in Motion* is a textbook in Cardiovascular Science It sets out to introduce and explain the cardiovascular system to the reader using a classical system in teaching anatomy physiology general operation and specific systems It is specifically designed to support the interests of students experienced physiologists and clinicians The book is subdivided into three parts comprising a total of 11 chapters Part I presents an historical perspective of cardiovascular knowledge and complements it with current insight into the physiology of the cardiovascular system Part II explores sections of the circulatory loop starting with an in depth treatment of the veins and including the lymphatic the microcirculation the arterial system and the heart Part III incorporates approaches to the cardiovascular system as a whole both in physiology and in science such as modeling This section introduces impedance defined flow and offers the reader its application in mathematical modeling At the end of each chapter the reader will find questions designed to reinforce the information presented Each chapter can be read or studied as an independent unit **Spirits in the Wires** Charles de Lint, 2024-03-26 From the World Fantasy Award winning author A website malfunction causes unexpected trouble for a modern city infused with magic and myth Charles de Lint's Newford novels are renowned for their imaginative scope and memorable characters In *Spirits in the Wires* de Lint returns to his captivating city as it enters the Internet age The city of Newford has it all including its own popular research and library website Wordwood But when Wordwood mysteriously crashes everyone visiting the site instantly vanishes Longtime resident Christy Ridding witnesses his girlfriend Saskia disappears right before his eyes To rescue their missing friends Christy and

his companions must journey into Newford's otherworld where the Wordwood it transpires has a physical presence of its own

Contesting Visibility Heike Behrend, 2014-03-15 Since the introduction of photography by commercial studio photographers and the colonial state in Kenya this global medium has been intensely debated and contested among Muslims on the cosmopolitan East African coast This book does not only explore the making circulation and consumption of popular photographs but also the other side their rejection and obliteration an essential aspect of a medium's history that should not be neglected It deals with various social spaces of refusal in the local Muslim milieu and in that of traditional spirit mediums in which gendered visibility was and is contested in various and creative ways It focuses on the aesthetics of withdrawal the various ways and techniques that process the photographic act as well as the photographic image to theatricalize the surface of the image in new ways by veiling masking and concealing In a fragmented historical perspective Heike Behrend seeks to complement decenter and counter the history of photography as it has been told by the West and to narrate another history beginning with preceding local media such as textiles and spirit possession **Horæ Solitariae** Ambrose Serle, 1801
