Marvasti, 2012-04-01 The mission in writing this book was to look beyond politics in order to explore the extent of the ongoing and long term human cost of war and military occupation This book addresses the suffering of our troops and their families and our responsibility as a society first to acknowledge and diagnose this suffering and then to care for those who are affected by it The first of two sections Clinical Issues of War Trauma contains chapters on signs and symptoms diagnosis and pharmacotherapy of war trauma This section explores the vast variety of pathology such as TBI PTSD suicide affective disorder addiction spiritual distress and forensic aspects of combat trauma To supplement or advance beyond medication and counseling the editor designed a set of 12 Step Self Help Principles for Combat Veterans with PTSD inspired by addiction self help programs The second section Witnesses to War is comprised of four first hand accounts of experiences in combat zones during and after conflict Some of the chapters of this book were written by professionals with direct involvement in combat from WW II to the wars in Iraq and Afghanistan This outstanding book will be a standard text at military educational institutions and highly valuable to civilian professionals practicing psychiatry family counseling and forensic psychology in the military system **Healing War Trauma** Raymond M. Scurfield, Katherine Theresa Platoni, 2013 Healing War Trauma details a broad range of exciting approaches for healing from the trauma of war The techniques described in each chapter are designed to complement and supplement cognitive behavioral treatment protocols and ultimately to help clinicians transcend the limits of those protocols For those veterans who do not respond productively to or who have simply little interest in office based regimented and symptom focused treatments the innovative approaches laid out in Healing War Trauma will inspire and inform both clinicians and veterans as they chart new paths to healing **Appalachian Free Spirit**

Rhoades, Michael R. Leaveck, James C. Hudson, 1996-07 41 papers from 70 authors from the 1994 national symposium on the aftermath of Vietnam Authorities and doctors of medicine and psychology speak out on the effects of Vietnam on vets and their families Topics include the children of vets with post traumatic stress disorder the potential for change in the delivery of services to vets rural vets traumas and transition building on the experiences of the Agent Orange class assistance program lingering consequences of the Vietnam War vet families with children with disabilities or chronic illness etc *Beyond Trauma: Hope and Healing for Warriors* Dean Bonura, 2016-03-03 It is estimated that well over 250 000 military veterans from Iraq and Afghanistan are suffering today from PTSD and even more from post traumatic stress or PTS Clinical interventions alone do not adequately address all the issues associated with PTSD There is also a profound spiritual dimension to trauma and it is frequently manifested in post trauma symptoms such as guilt grief and shame and in various forms of loss including loss of meaning loss of faith and loss of peace Pastors chaplains and Christian counselors have a legitimate healing role alongside clinicians in addressing the spiritual aspects of trauma through spiritual interventions that are based on Scripture and leverage new ways of viewing trauma and assumptions about its meaning Beyond Trauma Hope Healing for Warriors equips pastors chaplains and other pastoral caregivers with the knowledge and resources to not only understand the spiritual effects of trauma but to make appropriate interventions that will lead veterans in their churches and

communities to healing and growth *Psychological Trauma and Addiction Treatment* Bruce Carruth, 2006 Here in a single source is an essential overview of trauma treatment for people in addiction treatment settings Psychological Trauma and Addiction Treatment presents specific methodologies and techniques for clients in inpatient and outpatient addiction mental health settings The contributors leading clinicians and researchers in the field provide a comprehensive set of scientific treatment approaches addressing a broad spectrum of trauma disorders **Moral Injury Reconciliation** Lewis Jeffery Lee, 2018-02-21 Aimed at Veterans suffering from moral injury and PTSD the author has created a 3 phased spiritual care treatment based on reconciling past trauma creating a focused present and anticipating a hopeful future It blends spiritual awareness exercises EBT elements psychoeducation and self care techniques Religion and Recovery from PTSD Harold Koenig, Donna Ames, Michelle Pearce, 2019-12-19 This volume focuses on the role that religion and spirituality can play in recovery from post traumatic stress disorder PTSD and other forms of trauma including moral injury Religious texts from the Bible to Buddhist scriptures have always contained passages that focus on helping those who have experienced the trauma of war Many religions have developed psychological social behavioral and spiritual ways of coping and healing that can work in tandem with clinical treatments today in assisting recovery from PTSD and moral injury In this book the authors review and discuss systematic research into how religion helps people cope with severe trauma including trauma caused by natural disasters intentional interpersonal violence or combat experiences during war They delve into the impact that spirituality has in both the development of and recovery from PTSD Beyond reviewing research they also use case vignettes throughout to illustrate the very human story of recovery from PTSD and how religious or spiritual beliefs can both help or hinder depending on circumstance A vital work for any mental health or religious professionals who seek to help people dealing with severe trauma and loss **Re-Authoring Life Narratives After Trauma: A Holistic Narrative Model of Care** Charles B. Manda, 2019-12-12 Re authoring Life Narratives after Trauma is an interdisciplinary specialist resource for traumatic stress researchers practitioners and frontline workers who focus their research and work on communities from diverse religious backgrounds that are confronted with trauma death illness and other existential crises This book aims to argue that the biopsychosocial approach is limited in scope when it comes to reaching a holistic model of assessing and treating individuals and communities that are exposed to trauma The holistic model must integrate an understanding of and respect for the many forms of religion and spirituality that clients might have Pargament 2011 It will not only bring a spiritual perspective into the psychotherapeutic dialogue but it will also assist in dealing with the different demands in pastoral ministry as related to clinical and post traumatic settings The book makes several contributions to scholarship in the disciplines of although not limited to traumatic stress studies pastoral care and counselling psychology and psychiatry Firstly the book brings spirituality into the psychotherapeutic dialogue traditionally religious and spiritual topics have not been a welcome part of the psychotherapeutic dialogue Secondly it underscores the significance of documenting literary narratives as a means of

healing trauma writing about our traumas enables us to express things that cannot be conveyed in words and to bring to light what has been suppressed and imagine new possibilities of living meaningfully in a changed world Thirdly it proposes an extension to the five stage model of trauma and recovery coined by Judith Herman **A Vietnam Trilogy, Vol. 3: War**

Trauma Raymond M. Scurfield, 2006 War Trauma draws on the experience of prior wars for valuable insights to help people who are now in the military or in the healing professions and their families and communities to deal with today's realities of combat and its aftermath which so often entails PTSD post traumatic stress syndrome depression and the risk of suicide This is part three in A Vietnam Trilogy which studies the psychiatric impact of war on soldiers and veterans and their families The effects go on for decades after the violence occurred and we are still just learning to understand the depth and variety of problems it can cause Further Scurfield documents his proven innovative therapies for treating PTSD This third volume looks at what military and mental health professionals and the Veterans Administration VA should have learned from the Vietnam War in order to better protect American servicemen and servicewomen in later conflicts and to help them recover afterwards The Persian Gulf War for instance had an immense impact on veterans of all wars The author was a national faculty member for joint VA DOD training programs to enhance mental health response readiness for receiving anticipated medical and psychiatric casualties from the Persian Gulf War What he found was a resurgence of selective amnesia and denial about the true impact of war Scurfield notes Chillingly what happened in Vietnam in 1968 69 regarding psychiatric casualties has enormous parallels to what is happening today regarding U S psychiatric casualties from the Iraq War **Dreams,**
