The Bloomsbury Guide to Pastoral Care Bernadette Flanagan, 2014-01-30 The Bloomsbury Guide to Pastoral Care provides a framework for reflection on pastoral care practice and identifies frontier learning from the new and challenging practical contexts which are important in pastoral care research today In this collection of essays from leading practitioner scholars Bernadette Flanagan and Sharon Thornton set out core principles underpinning professional identity and the practice of pastoral care in rapidly changing social settings Such pastoral challenges as developing compassionate and effective companionship to those who have suffered trauma torture catastrophic events social disintegration the moral wounds of war and cultural dislocation are treated with insight and deep care The new frontiers of pastoral care in more familiar circumstances such as family health settings where patients facing life challenging medical events and multi cultural communities are also explored With contributions from Kevin Egan Michael O Sullivan SJ Rita Nakashima Brock and Julia Prinz VDMF The Bloomsbury Guide to Pastoral Care is an essential reference for the theory and practice of pastoral care

Moving Beyond Individualism in Pastoral Care and Counseling Barbara J McClure, 2011-10-27 Despite astute critiques and available resources for alternative modes of thinking and practicing individualism continues to be a dominating and constraining ideology in the field of pastoral psychotherapy and counseling Philip Rieff was one of the first to highlight the negative implications of individualism in psychotherapeutic theories and practices As heirs and often enthusiasts of the Freudian tradition of which Rieff and others are critical pastoral theologians have felt the sting of his charge and yet the empirical research that McClure presents shows that pastoral counseling practitioners resist change Their attempts to overcome an individualistic perspective have been limited and ineffective because individualism is embedded in the field's dominant theological and theoretical resources practices and organizational arrangements Only a radical reappraisal of these will make possible pastoral counseling practices in a post individualistic mode McClure proposes several critical transformations broadening and deepening the operative theologies used to guide the healing practice expanding the role of the pastoral counselor reimagining the operative anthropology reclaiming sin and judgment nuancing the particular against

the individual rethinking the ideal outcome of the practices and reimagining the organizational structures that support the practices Only this level of revisioning will enable this ministry of the church to move beyond its individualistic limitations and offer healing in more complex effective and socially adequate ways

The Power of Neuroplasticity for Pastoral and Spiritual Care Kirk A. Bingham, 2014-04-10 Studies in neuroscience demonstrate that a focus on mindfulness meditation and contemplative spiritual practice has the capacity to increase our non anxious awareness and significantly lower our stress Not only is this finding of immediate importance for pastoral counselors and psychotherapists it will even necessitate a paradigm shift in the way that pastoral and spiritual practitioners approach the general care of souls The starting point for such a paradigm shift is an acknowledgement of the built in negativity bias of the brain and how certain beliefs and theological views may inadvertently reinforce the bias to the detriment of individuals and faith communities Once necessary for human survival the ingrained bias can often be excessive for today s world resulting in negatively disproportionate assessments of life events and human relationships To balance the neural predisposition toward negativity and anxious awareness it is necessary for pastoral and spiritual caregivers and those in their care to cultivate a regular contemplative meditational practice The Power of Neuroplasticity for Pastoral and Spiritual Care focuses on the groundbreaking finding of contemporary neuroscience that the brain is built for change across the entire lifespan It is designed to make the research accessible to and relevant for those engaged in the work of pastoral and spiritual care in order to help clients and congregants effect lasting and transformative changes in the mind and brain Through the regular practice of contemplative prayer and meditation we can literally calm the stress region of the brain in order to live less anxiously and experience more fully the peace and joy of the present moment The introduction of mindfulness and acceptance based counseling approaches will provide pastoral and spiritual practitioners with an important therapeutic framework to situate their work from which they can make more informed and effective interventions geared toward using the mind to change the brain

Jordan, 2013-09-13 This book explores the wise and conscious use of spiritual resources within counselling and psychotherapy Written by veteran clinicians from different spiritual perspectives and from various therapeutic schools of thought this book provides a broad view of how the spiritual is present within therapeutic practice The work of counselling and psychotherapy is increasingly seeking to ground its efforts within the richness of spiritual traditions One of the surprising developments of the contemporary psychotherapeutic scene is a growing reliance on both hard objective sciences such as for example neurology or Genetics whilst at the same time engaging very subjective soft sciences such as states of consciousness studies psychology of religion clinical or Pastoral Theology and the over arching tasks of meaning making Written by and for
