Spoils Of Progress Environmental Pollution In The Soviet Union:

The Spoils of Progress Marshall I. Goldman, 1972 An analysis of the forces that have been brought about the abuses of water air land and raw material in Russia examining both the drawbacks and advantages of state control and conservation Because industrialism had its beginnings in capitalist countries the existence of environmental disruption in socialist and communist societies has been largely ignored The truth is that pollution of natural resources plagues the planned economy and free enterprise system alike Rapid industrial growth rather than form of government is the prime agent causing environmental havoc and where socialist reality diverges from socialist theory the ecological balance of nature suffers as in any major industrial country Marshall I Goldman whose articles on the subject have appeared in Science The New York Times and The New Yorker brings this point home as she describes abuses of water air land and raw materials in Russia analyzing the forces that have been brought about the current situation and describing both the drawbacks and advantages of state control and conservation He devotes chapters to the pollution of Lake Baikal in Siberia remarking that Baikal is a unique lake in the world and all mankind will suffer from its desecration and to the Aral and Caspian seas which is literally in danger of drying up as a result and the construction of hydroelectric stations Proposals to restore the seas by building dams and reversing the flow of major rivers from north to south Reshaping the Earth may have equally profound and undesirable results The book concludes by pointing out that the Soviet state is both manufacturer and polluter and its priorities lie with the increased production rather than conservation with progress rather than restraint Yet hopefully Goldman points to a number of beneficial state controls which if enlarged in the direction of restoring and protecting natural resources could have made Russia the most powerful and efficient of conservationists Appendixes contain selected laws on the environment the Conservation Law of the Russian Republic 1960 and the Water Law 1970

An Environmental History of the World J. Donald Hughes, 2002-09-26 An Environmental History of the World is a concise history from Ancient to Modern times of the interaction between human societies and the other forms of life that inhabit our planet This original work follows a chronological path through the history of mankind in relationship to ecosystems around the world Each chapter concentrates on a general period in human history which has been characterised by large scale changes in the relationship of human societies to the biosphere and gives three case studies that illustrate the significant patterns occurring at that time Little environmental or historical knowledge is assumed from the reader in this introduction to environmental history

The Nature of Soviet Power Andy Bruno, 2016-04-11 During the twentieth century the Soviet Union turned the Kola Peninsula in the northwest corner of the country into one of the most populated industrialized militarized and polluted parts of the Arctic This transformation suggests above all that environmental relations fundamentally shaped the Soviet experience Interactions with the natural world both enabled industrial livelihoods and curtailed socialist promises Nature itself was a participant in the communist project Taking a long term comparative perspective The Nature of Soviet Power sees Soviet environmental

history as part of the global pursuit for unending economic growth among modern states This in depth exploration of railroad construction the mining and processing of phosphorus rich apatite reindeer herding nickel and copper smelting and energy production in the region examines Soviet cultural perceptions of nature plans for development lived experiences and modifications to the physical world While Soviet power remade nature nature also remade Soviet power

legislation regulating fertility and the family sphere a study of the factors determining first and higher order births and an examination of population distribution across Russian regions The book also combines research tools from the social sciences with a medical approach to provide a study of mortality rates By bringing together approaches from several disciplines demography economics and sociology the authors of this book provide a comprehensive and detailed assessment of the historical roots of Russia's demographic development The Environment And Marxism-leninism Joan

Debardeleben,2019-07-11 In the past two decades environmental pollution and natural resource shortages have evoked increasing concern in the Soviet Union and Eastern Europe The emerging ecological crisis has challenged many common assumptions in the Soviet bloc as in the West This book provides for the first time a detailed and comprehensive analysis of the ecology debate in the USSR and its highly industrialized ally the German Democratic Republic GDR Based on a thorough examination of the Soviet and GDR sources Dr DeBardeleben explores the authorities attempts to explain the problem to their populations She also examines the viewpoints of scientists writers and scholars with special attention to economic dimensions of the ecology debate The study reveals the increasing sophistication of specialists in influencing public policy by adapting official values to support their positions Through comparison of the Soviet and East German cases the study clarifies the impact of natural resource endowment and legitimacy dilemmas on treatment of the ecology issue The book demonstrates that Marxist Leninist values subtly affect Soviet and GDR responses but at the same time the environmental crisis is forcing a reevaluation of some aspects of Marxist Leninist theory and ideology itself Eurasian Environments

Nicholas Breyfogle,2018-11-06 Through a series of essays Eurasian Environments prompts us to rethink our understanding of tsarist and Soviet history by placing the human experience within the larger environmental context of flora fauna geology and climate This book is a broad look at the environmental history of Eurasia specifically examining steppe environments hydraulic engineering soil and forestry water pollution fishing and the interaction of the environment and disease vectors Throughout the authors place the history of Imperial Russia and the Soviet Union in a trans chronological comparative context seamlessly linking the local and the global The chapters are rooted in the ecological and geological specificities of place and community while unveiling the broad patterns of human nature relationships across the planet Eurasian

Donald Treadgold,2018-05-04 Donald Treadgold was one of the most distinguished Russian historians of his generation His *Twentieth Century Russia* a standard text in colleges and universities for several decades has been regularly revised and expanded to reflect new events and scholarship The present revision by Professor Herbert Ellison contains a major chapter on the Yeltsin era and brings the Russian story to the final year of the century Twice in the twentieth century the collapse of the Russian state and empire has been followed by an effort to build a democracy on the Western model The first effort

succumbed within a few months to Lenin's communist revolution whose ideas and institutions dominated the history of Russia and eventually much of the world during the succeeding seventy four years In August 1991 an attempt by Soviet leaders to suppress democratic and nationalist movements unleashed by the Gorbachev reforms and already victorious in Eastern Europe precipitated instead an anti communist revolution under the leadership of Boris Yeltsin The revolution and the sweeping transformation that followed are treated in the new edition which assesses the aims and scope of the first decade of Russia's second revolution The transformation included a new constitutional structure two fully democratic parliamentary elections and a presidential election with another of each soon to come a vigorous revival of political parties and political debate and major questions about Russia's political future Against the broad background of the Russian experience over a turbulent century it raises the major questions What are the prospects for Russian democracy Why are the communists following an anti communist revolution the most powerful parliamentary party in Russia's new parliament and what is their impact Why has the conversion to a market economy proved so difficult and painful and what are its prospects How has Russia related to the new states that were once fellow republics of the USSR Why has the foreign policy of the new Russian democracy moved from a vision of partnership with the US to a reality of conflict and confrontation Twentieth Century Russia poses these questions and many more for the student and the general reader alike against the fascinating background of Russia's experience before during and since the era of communist rule exploring the roots of current developments in the communist and pre communist past

The Implementation and Effectiveness of International Environmental Commitments David G. Victor, Kal Raustiala, Eugene B. Skolnikoff, 1998 Because environmental problems do not respect borders their solutions often require international cooperation and agreements The contributors to this book examine how international environmental agreements are put into practice Their main concern is effectiveness the degree to which such agreements lead to changes in behavior that help to solve environmental problems Their focus is on implementation the process that turns commitments into action at both domestic and international levels Implementation is the key to effectiveness because these agreements aim to constrain not just governments but a wide array of actors including individuals firms and agencies whose behavior does not change simply because governments have made international commitments The book is divided into two parts Part I looks at international systems for implementation review through which parties share information review performance handle noncompliance and adjust commitments Part II looks at implementation at the national level with particular attention to participation by governmental and nongovernmental actors and to problems in states with economies in transition The book includes fourteen case studies that cover eight major areas of international environmental regulation conservation and preservation of fauna and flora stratospheric ozone depletion pollution in the Baltic Sea pollution in the North Sea trade in hazardous chemicals and pesticides air pollution in Europe whaling and marine dumping of nuclear waste Contributors Steinar Andresen Juan Carlos di Primio Owen Greene Ronnie

Environmentalism under Authoritarian Regimes Stephen Brain,Viktor Pál,2018-10-26 Since the early 2000s
authoritarianism has risen as an increasingly powerful global phenomenon This shift has not only social and political
implications but also environmental implications authoritarian leaders seek to recast the relationship between society and
the government in every aspect of public life including environmental policy When historians of technology or the
environment have investigated the environmental consequences of authoritarian regimes they have frequently argued that
authoritarian regimes have been unable to produce positive environmental results or adjust successfully to global structural
change if they have shown any concern for the environment at all Put another way the scholarly consensus holds that
authoritarian regimes on both the left and the right generally have demonstrated an anti environmentalist bias and when
opposed by environmentalist social movements have succeeded in silencing those voices This book explores the theme of
environmental politics and authoritarian regimes on both the right and the left The authors argue that in instances when
environmentalist policies offer the possibility of bolstering a country s domestic nationalist appeal or its international
prestige authoritarian regimes can endorse and have endorsed environmental protective measures The collection of essays
analyzes environmentalist initiatives pursued by authoritarian regimes and provides explanations for both the successes and
failures of such regimes looking at a range of case studies from a number of countries including Brazil China Poland and
Zimbabwe The volume contributes to the scholarly debate about the social and political preconditions necessary for effective
environmental protection This book will be of great interest to those studying environmental history and politics
environmental humanities ecology and geography
