*Language, Corpora, and Technology in Applied Linguistics* Muhammad Afzaal, Swaleha Bano Naqvi, Geng Qiang, 2023-11-27 As culture and society has become more digitalized especially when computer science and digital technologies have entered a new era in the twenty first century translation studies began to utilize a wide range of tools to enhance its reading of texts and contexts without which translation both as a practice and as a theorization could barely persist It has become more apparent that two extreme poles between macro and micro visions have formed the diversified terrains of translation studies On the one hand technologies like NLP topic modeling network analysis and data visualization make distant reading become possible thus

allowing us to have a paradigmatic view of how human s ideas beliefs values knowledge and even emotions have spread in some patterns across cultural geographical and language divides in world history On the other hand corpus methods such as the use of keywords collocates and concordance lines changed the way by which texts were closely read from linear to vertical With microscope like corpus tools we could go deeper into the texture for perception of nuanced meaning While considering a fact that translation is seldom mono modal in conveying meaning we have to reconceptualize context as a multimodal environment where audio visual and other resources interact to convey and make meaning With regard to the fast development of digital technology translation studies take an active role in gaining an enhanced capability in promoting transformation Complexity has been favored in terms of theoretical framework and methodology New questions are asked old ones revisited with novel tools but more areas wait to be cultivated and more questions to be approached by combining quantitative and qualitative methods We could ask if digital technologies would bring new innovation to study of translation history a heavily walled land for traditional humanists who tend to repeat so what to question the less significance of data driven studies The idea of high quality machine translation has become so realistic in today s market that translation educators have to face the shock wave it brought to translation learners and practitioners and rethink the relation between human translators and algorithms Machine translation assisted communication could help remove boundaries for better communication but at the same time it also creates conflicts and leads to confrontation Thus understood it is imperative to give a concerned attention to digital translation studies that is to study translation by resorting to and drawing on the digital technologies This Research Topic is intended to promote current directions and new developments in cross disciplinary critical discourse research We welcome papers which from a critical analytical perspective deal with contemporary social scientific political economic or professional discourses and genres Papers addressing the highlighted topics are especially welcome In giving weight to these topics we wish to call to attention some of the most pressing problems currently facing the world

**History, Features, and Typology of Language Corpora** Niladri Sekhar Dash, S. Arulmozi, 2018-02-01 This book discusses key issues of corpus linguistics like the definition of the corpus primary features of a corpus and utilization and limitations of corpora It presents a unique classification scheme of language corpora to show how they can be studied from the perspective of genre nature text type purpose and application A reference to parallel translation corpus is mandatory in the discussion of corpus generation which the authors thoroughly address here with a focus on Indian language corpora and English Web text corpus a new development in corpus linguistics is also discussed with elaborate reference to Indian web text corpora The book also presents a short history of corpus generation and provides scenarios before and after the advent of computer generated digital corpora This book has several important features it discusses many technical issues of the field in a lucid manner contains extensive new diagrams and charts for easy comprehension and presents discussions in simplified English to cater to the needs of non native English readers This is an important resource authored by academics who have many years of experience teaching and researching corpus linguistics Its focus on Indian languages and on English corpora makes it applicable to students of graduate and postgraduate courses in applied linguistics computational linguistics and language processing in South Asia and across countries where English is spoken as a first or second language **Corpus**

**Linguistics: An Introduction** Dash, Niladri Sekhar, 2008 Corpus Linguistics An Introduction will appeal to a wide spectrum of scholars researchers and particularly to students of linguistics It offers guidelines for the creation and usage of corpora in the form of empirical language databases with direct functional and theoretical interpretation of a natural language Drawn from original research and written in an accessible language and style this book will create avenues for further advancements in mainstream and applied linguistics and language technology **English Texts & Contexts 1** F. Pollock, L.

Dippel,2003 This book includes chapters dealing with the relationships between composers and responders how to use technology to make texts and how to effectively compose and respond to different types of text There is a wide range of texts presented including film visual and electronic texts Students will learn how to increase their understanding of language features structures the perspectives of composers and responders and the way that context can affect a text **Words and Phrases** Michael Stubbs,2001-10-08 This book fills a gap in studies of meaning by providing detailed case studies of attested corpus data on the meanings of words and phrases **Understanding L2 Proficiency** Eun Hee Jeon,Yo In'nami,2022-08-04 This edited volume is a collection of theoretical and empirical overviews of second language L2 proficiency based on four skills reading writing listening and speaking Each skill is reviewed in terms of how it has been conceptualized measured and studied over the years in relation to relevant sub constructs of the language skill under discussion This is followed by meta analyses of correlation coefficients that examine the relationship between the L2 skill in question and its component variables Unlike most meta analyses that have a limited range of variables under investigation our meta analyses are much larger in scope to better clarify such relationships By combining theoretical and empirical approaches the book is helpful in deepening the understanding of how subcomponents or various variables are related to a particular L2 skill

**Contemporary Second Language Assessment** Jayanti Veronique Banerjee,Dina Tsagari,2016-06-30 Includes chapters on key aspects of second language assessment such as test construct diagnosis exam design and the growing range of public policy social and ethical issues Each of the contributors is an expert in their area some are established names while others are talented newcomers to the field The chapters present new research or perspectives on traditional concerns such as test quality fairness and bias the testing of different language skills the needs of different groups of examinees including English language learners who need to take content tests in English and the use of language assessments for gate keeping purposes The volume demonstrates how language assessment is informed by and engages with neighbouring areas of applied linguistics such as technology and language corpora The book represents the best of current practice in second language assessment and as a one volume reference will be invaluable to students and researchers looking for material that extends their understanding of the field **Learning, Keeping, and Using Language** M.A.K. Halliday,John Gibbons,Howard Nicholas,1990-01-01 This volume contains selected papers from the Eight World Congress of Applied Linguistics held in Sydney in 1987 Volume I starts off with an overview of the field by G Richard Tucker in which he identifies two areas innovative language education and language education policy The overall focus of the papers to follow focus on the individual language learner how that individual in given contexts or in interaction with specific others develops a command of a first language of two or more first languages or of a second language in home and in classroom settings At the same time cutting across these variables there is a gradual shifting of attention from investigations of the language learning process to proposals for language teaching curricula and syllabuses The Cambridge Companion to Benjamin Britten Mervyn

Cooke,1999-06-28 The Cambridge Companion to Benjamin Britten is a comprehensive guide to the composer's work aimed both at the non specialist and music student. It sheds light on both the composer's stylistic and personal development offering new interpretations of his operatic works and discussing his characteristic working methods. Topics treated here in detail for the first time include Britten's work in the cinema in the 1930s, his lifelong pacifism and his strong interest in the music of the Far East. Other chapters include reassessments of his relationship with W. H. Auden and his attitude towards childhood, comprehensive analyses of major works and a concise history of the Aldeburgh Festival. A distinguished team of contributors include some who worked with the composer during his lifetime as well as leading representatives of the younger generation of Britten scholars on both sides of the Atlantic.

**Comparing Reading and Speaking Intonation** Jürgen Esser, Andrzej Polomski, 2023-07-17 *Stability and Variation in Hopi Song* George List, 1993 The Hopi are the westernmost group of the Pueblo Indians of the southwestern U.S. They live on a high dry plateau in northern Arizona and have been a sedentary agricultural people. This study establishes the stylistic parameters of song in a particular culture. Author List determines what is meant when a Hopi person states that two or more performances are those of the same song. To what extent can speech sounds, pitches and durational values or the forms of which they are the constituents differ and the performances still be considered to be those of the same song? List transcribed and compared 8 recordings of performances of a particular kachina dance song and 11 recordings of performance of a particular lullaby made from 1903 to 1984. Illus. Assessing L2 Listening

Gary J. Ockey, Elvis Wagner, 2018-08-08 This book is relevant for language testers, listening researchers and oral proficiency teachers in that it explores four broad themes related to the assessment of L2 listening ability: the use of authentic real world spoken texts; the effects of different speech varieties; of listening inputs; the use of audio-visual texts; and assessing listening as part of an interactive speaking-listening construct. Each theme is introduced with a review of the relevant literature and then is examined through either two or three empirical studies. The notion of authenticity underlies each of these four themes. By creating more authentic test tasks that are similar to real world language tasks, test developers can create listening assessments that not only more effectively assess test takers' communicative competence but can also have a positive washback effect on educational systems.

**Animacy and Reference** Mutsumi Yamamoto, 1999-01-01 The concept of animacy concerns the fundamental and cognitive question of the extent to which we recognize and express living things as saliently human-like or animal-like. In *Animacy and Reference* Mutsumi Yamamoto pursues two main objectives. First, to establish a conceptual framework of animacy; and secondly, to explain how the concept of animacy can be reflected in the use of referential expressions. Unlike previous studies on the subject focussing on grammatical manifestations, *Animacy and Reference* sheds light upon the conceptual properties of animacy itself and its reflection in referential processes. For the research of this study, the author focussed on languages that show completely different tendencies. As a result, English and Japanese parallel corpora are analysed, yielding salient observations and opening intriguing discussions.
