**International Conference on the Development of Biomedical Engineering in Vietnam** Van Toi Vo,Thi-Hiep Nguyen,Binh Long Vong,Ngoc Bich Le,Thanh Qua Nguyen,2023-10-18 This book presents cutting edge research and developments in the field of biomedical engineering with a special emphasis on results achieved in Vietnam and neighboring low and middle income countries Covering both fundamental and applied research and focusing on the theme of Translational Healthcare Technology from Advanced to Low and Middle Income Countries in the Era of Covid and Digital Transformation it reports on the design fabrication and application of low cost and portable medical devices biosensors and microfluidic devices on improved methods for biological data acquisition and analysis on nanoparticles for biological applications and on new achievements in biomechanics tissue engineering and regeneration It describes the developments of molecular and cellular biology techniques neuroengineering techniques and statistical and computational methods including artificial intelligence for biomedical applications It also discusses strategies to address some relevant issues in biomedical education and entrepreneurship Gathering the proceedings of the 9th International Conference on The Development of Biomedical Engineering in Vietnam BME 9 held on December 27 29 2022 in Ho Chi Minh Vietnam the book offers important answers to current challenges in the field and a source of inspiration for scientists engineers and researchers with various backgrounds working in different research institutes companies and countries *Translation Technology in Accessible Health Communication* Meng Ji,Pierrette Bouillon,Mark Seligman,2023-09-21 Digital health translation is an important application of machine translation and multilingual technologies and there is a growing need for accessibility in digital health translation design for disadvantaged communities This book addresses that need by highlighting state of the art research on the design and evaluation of assistive translation tools along with systems to facilitate cross cultural and cross lingual communications in health and medical settings Using case studies as examples the principles of designing assistive health communication tools are illustrated These are 1 detectability of errors to boost user confidence by health professionals 2 customizability for health and medical domains 3 inclusivity of translation modalities to serve people with disabilities and 4 equality of accessibility standards for localised multilingual websites of health contents This book will appeal to readers from natural language processing computer science linguistics translation studies public health media and communication studies This title is available as open access on Cambridge Core [Future and Emerging Trends in Language Technology. Machine Learning and Big Data](#) José F Quesada,Francisco-Jesús Martín Mateos,Teresa López Soto,2017-10-28 This book constitutes revised selected papers from the Second International Workshop on Future and Emerging Trends in Language Technology FETLT 2016 which took place in Seville Spain in November 2016 The 10 full papers and 5 position papers presented in this volume were carefully reviewed and selected from 18 submissions In 2016 the conference focused on Machine Learning and Big Data *Translation Quality Assessment* Joss Moorkens,Sheila Castilho,Federico Gaspari,Stephen Doherty,2018-07-13 This is the first volume that brings together research and practice from academic and industry settings and a combination of

human and machine translation evaluation Its comprehensive collection of papers by leading experts in human and machine translation quality and evaluation who situate current developments and chart future trends fills a clear gap in the literature This is critical to the successful integration of translation technologies in the industry today where the lines between human and machine are becoming increasingly blurred by technology this affects the whole translation landscape from students and trainers to project managers and professionals including in house and freelance translators as well as of course translation scholars and researchers The editors have broad experience in translation quality evaluation research including investigations into professional practice with qualitative and quantitative studies and the contributors are leading experts in their respective fields providing a unique set of complementary perspectives on human and machine translation quality and evaluation combining theoretical and applied approaches

**The Routledge Handbook of Sign Language Translation and Interpreting** Christopher Stone, Robert Adam, Ronice Müller de Quadros, Christian Rathmann, 2022-07-18 This Handbook provides the first comprehensive overview of sign language translation and interpretation from around the globe and looks ahead to future directions of research Divided into eight parts the book covers foundational skills the working context of both the sign language translator and interpreter their education the sociological context work settings diverse service users and a regional review of developments The chapters are authored by a range of contributors both deaf and hearing from the Global North and South diverse in ethnicity language background and academic discipline Topics include the history of the profession the provision of translation and interpreting in different domains and to different populations the politics of provision and the state of play of sign language translation and interpreting professions across the globe Edited and authored by established and new voices in the field this is the essential guide for advanced students and researchers of translation and interpretation studies and sign language

[Analysing English-Arabic Machine Translation](#) Zakaryia Almahasees, 2021-11-29 Machine Translation MT has become widely used throughout the world as a medium of communication between those who live in different countries and speak different languages However translation between distant languages constitutes a challenge for machines Therefore translation evaluation is poised to play a significant role in the process of designing and developing effective MT systems This book evaluates three prominent MT systems including Google Translate Microsoft Translator and Sakhr each of which provides translation between English and Arabic In the book Almahasees scrutinizes the capacity of the three systems in dealing with translation between English and Arabic in a large corpus taken from various domains including the United Nation UN the World Health Organization WHO the Arab League Petra News Agency reports and two literary texts The Old Man and the Sea and The Prophet The evaluation covers holistic analysis to assess the output of the three systems in terms of Translation Automation User Society TAUS adequacy and fluency scales The text also looks at error analysis to evaluate the systems output in terms of orthography lexis grammar and semantics at the entire text level and in terms of lexis grammar and semantics at the collocation level The research findings

contained within this volume provide important feedback about the capabilities of the three MT systems with respect to EnglishArabic translation and paves the way for further research on such an important topic This book will be of interest to scholars and students of translation studies and translation technology
