Sport First Aid:

Sport First Aid Melinda J. Flegel, 2013-10-01 Nearly half of all injuries in high school sports occur during practice when no athletic trainer or emergency medical personnel are present. In these instances, coaches are the first responders. As a coach, are you prepared to take action in a medical emergency? **Sport First Aid** provides high school and club sport coaches with detailed action steps for the care and prevention of more than 110 sport-related injuries and illnesses. Organized for quick reference, **Sport First Aid** covers procedures for conducting emergency action steps, performing the physical assessment, administering first aid for bleeding, tissue damage, and unstable injuries, moving an injured athlete, and returning athletes to play. The new edition features the latest CPR guidelines from the American Heart Association, guidelines for the prevention, recognition, and treatment of concussion from the Centers for Disease Control and Prevention, and guidelines for the prevention of dehydration and heat illness from the National Athletic Trainers Association. Beyond simply treating injuries and illnesses, **Sport First Aid** seeks to prevent them from occurring in the first place. Included are strategies for reducing athletes' risk of injury or illness, such as establishing a school-based medical team, implementing preseason conditioning programs, creating safe playing environments, planning for weather emergencies, ensuring proper fit and use of protective equipment, enforcing sport skills and safety rules, and developing a medical emergency plan. Sample forms, checklists, and plans take the work out of developing these documents from scratch. With **Sport First Aid**, you and your coaching staff will be prepared to make critical decisions and respond appropriately when faced with athletes' injuries and illnesses. Produced by the American Sport Education Program (ASEP), **Sport First Aid** is the text for the ASEP **Sport First Aid** course, which, along with **Coaching Principles** and **Coaching Technical and Tactical Skills** courses, makes up the curriculum for the ASEP Bronze Level coaching certification program. For more information on ASEP courses and resources, call 800 747 5698 or visit www.asep.com.

Sport First Aid Robb S. Rehberg, 2025-06-02 Approximately 90 percent of high school student athletes report sustaining an injury while participating in sports. With only about one third of high schools in the United States having full-time athletic trainers and another third lacking any athletic trainer services, you, the coach, are often the first responder when an injury occurs. This reality underscores the importance of providing you with proper training in first aid and injury prevention. Such training prepares you to act quickly and appropriately when an athlete is injured or becomes ill, ensuring the safety and well-being of your student athletes. As a current or aspiring high school or club coach, you can rely on **Sport First Aid**, Sixth Edition, for the information you need to be a capable and confident first responder. The sixth edition has been revised and restructured. It features an unparalleled author team of experts in athletic training, sports medicine, exercise science, and physiology, strength and conditioning, and sport coaching. It reflects the leading health organizations' latest emergency guidelines, including those for CPR, concussion, dehydration, and heat illness. Tailored specifically to your needs as a coach, the text covers causes, symptoms, and action steps for more than 100 injuries and illnesses. In this sixth edition, the

most common injuries and illnesses are described in greater detail and prioritized so they are easier to reference. Additionally, flowcharts for over 40 specific injuries and illnesses offer step by step visuals to guide you through the decision making and response process. Beyond specific first aid procedures, the text provides guidance on understanding your legal duties as a coach assembling an athletic health care team and collaborating with other team members, minimizing the risk of injury, planning for medical emergencies, administering the plan during emergency situations, and assessing when and how to move injured and sick athletes. An athletic trainer may not always be present at every practice and game. As a coach, it's crucial to have a basic understanding of first aid and injury prevention. **Sport First Aid** is the most authoritative source for this potentially life saving information. It will prepare you to respond appropriately in emergency situations, meet your legal obligations as a coach, and foster a safe environment for your athletes. **Sport First Aid** Robb S.
