Sport Loving Society Victorian And Edwardian Middle Class England At Play:

A Sport-loving Society J. A. Mangan, 2006 A selection of essays exploring the role of social institutions and political economic and technological change in shaping the sport of middle class Victorians and Edwardians **Religion and the Rise of Sport in England** Hugh Mcleod, 2022 Both religion and sport can inspire great loyalty and shape identities They have often been in competition for people's time and money but can also be mutually supportive This book follows the changing nature of their relationship in England from 1800 to the present day with a focus on Christianity but also considering Judaism and Islam **The New Geopolitics of Sport in East Asia** William Kelly, J.A. Mangan, 2015-09-07 The global geopolitics of sport is being transformed in and by East Asia Sport in recent decades has been avidly embraced by East Asian nations with implications both for their image on the international stage and their domestic national identities The three post war East Asian Olympic Games the glittering Guangzhou Asian Games in 2010 and the march of Asia into the global sport market illustrate the fact that a new global sports order has emerged This collection uniquely discerns the tectonic shift of global power in the geopolitical economic cultural and social dynamics of sport from West to East It also reveals that the global empire of commerce is similarly shifting eastwards The chapters written by leading authorities on East Asia widens the focus advances the knowledge and sharpens the appreciation of both global sport and regional current transformation in the making and in doing so contributes to an understanding of profound changes in global sport This book was originally published as a special issue of The International Journal of the History of Sport *The Greening of London, 1920-2000* Matti O. Hannikainen, 2017-05-15 The long term development of public green spaces such as parks public gardens and recreation grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable cities *The Beijing Olympics: Promoting China* Kevin Caffrey, 2013-09-13 The Beijing 2008 Olympic ceremonies were spectacular performances and technological accomplishments by the People's Republic of China However the audience in Beijing was only the most overt element of a global audience receiving the message of the Games For this global audience the Beijing performances were a harbinger of wider regional and international ambitions a message of intent that pointed to a larger Chinese plan to a degree not seen since the Ming dynasty New Chinese ambitions embrace

both soft power and hard power The actor in this political drama of international scope is the Chinese state and its political ambitions on the world stage The Beijing Olympics can be seen as its opening act and the audience as global Rather than the kind of morality play that is typically used in China to educate the people in politics this new production a production on many levels was one aimed at audiences all around the world and one that was a calculated expression of realpolitik This book was previously published as a special issue of the International Journal of the History of Sport **Emigrant Players** Paul Darby, David Hassan, 2013-10-18 Ireland and its inhabitants have often been described as being sports mad As a relatively small geographical entity Ireland north and south has produced a disproportionately high number of world class sports men and women who have excelled at the highest levels of their chosen sport The significance of sport in Ireland though extends far beyond the achievements of such individuals Sport has historically assumed a centrality in the lives of the island's inhabitants a fact that can be measured by the numbers and commitment of participants as well as the emotional and financial investment of fans This book seeks to address the ways in which Irish aptitude and ebullience for sport has manifested itself in those parts of the world that have or have had relatively large Irish communities The first part of the book explores the diffusion of Gaelic games to a number of centres of Irish immigration and examines the social economic political and psychological impact that these games had in helping the Diaspora adjust to life in what were often inhospitable environs The second part of the book extends the analysis by examining the contribution of Irish sports men and women to the sports culture that they encountered in their new homes and assessing the ways in which their involvement in these sports allowed them to come to terms with and make their way in their new locales This book was previously published as a special issue of the journal Sport in Society **Sport and Democracy in the Ancient and Modern Worlds** Paul Christesen, 2012-10-15 This book explores the relationship between sport and democratization Drawing on sociological and historical methodologies it provides a framework for understanding how sport affects the level of egalitarianism in the society in which it is played The author distinguishes between horizontal sport which embodies and fosters egalitarian relations and vertical sport which embodies and fosters hierarchical relations Christesen also differentiates between societies in which sport is played and watched on a mass scale and those in which it is an ancillary activity Using ancient Greece and nineteenth century Britain as case studies Christesen analyzes how these variables interact and finds that horizontal mass sport has the capacity to both promote and inhibit democratization at a societal level He concludes that horizontal mass sport tends to reinforce and extend democratization **The Visual in Sport** Mike Huggins, Mike O'Mahony, 2013-10-18 This comprehensive novel and exciting interdisciplinary collection brings together leading international authorities from the history of sport social history art history film history design history cultural studies and related fields to explore the ways in which visual culture has shaped and continues to impact upon our understanding of sport as an integral element within popular culture Visual representations of sport have previously been little examined and under exploited by historians with little focused and rigorous scrutiny of these

vital historical documents This study seeks to redress this balance by engaging with a wide variety of cultural products ranging from sports stadia and monuments in the public arena to paintings prints photographs posters stamps design artefacts films and political cartoons By examining the contexts of both the production and reception of this historical evidence and highlighting the multiple meanings and social significance of this body of work the collection provides original powerful and stimulating insights into the ways in which visual material assists our knowledge and understanding of sport This collection will facilitate researchers publishers and others with an interest in sport to move beyond traditional text based scholarship and appreciate the powerful imagery of sport in new ways This book was previously published as a special issue of the International Journal of the History of Sport Sport and Nationalism in Asia Fan Hong,Zhouxiang Lu,2016-04-14 Written by a team of international scholars Sport and Nationalism in Asia Power Politics and Identity is a collection of original research which addresses a number of issues central to notions of nationalism and identity in sport including how the Olympics and other international and regional sports events have fostered an active interweaving of sport politics and nationalism the role of traditional sport in the building of national consciousness and national identity the way modern sport creates and reflects nationalism thereby giving it a voice and a focus The book covers eight case studies on countries regions across West Asia Central Asia and East Asia It is one of the few works that examines the relationships between sport politics and nationalism from Asian perspective This book was published as a special issue of the International Journal of the History of Sport *The History of Motor Sport* David Hassan,2014-01-02 First published in 2012 This book examines the evolution of motor sport from its creation in central Europe throughout the rest of the continent and elsewhere including in both North and South America It was published as a special issue of the International Journal of the History of Sport Sport, Militarism and the Great War Thierry Terret,J. A. Mangan,2013-09-13 The Great War has been largely ignored by historians of sport However sport was an integral part of cultural conditioning into both physiological and psychological military efficiency in the decades leading up to it It is time to acknowledge that the Great War also had an influence on sport in post war European culture Both are neglected topics Sport Militarism and the Great War deals with four significant aspects of the relationship between sport and war before during and immediately after the 1914 1918 conflict First it explores the creation and consolidation of the cult of martial heroism and chivalric self sacrifice in the pre war era Second it examines the consequences of the mingling of soldiers from various nations on later sport Third it considers the role of the Great War in the transformation of the leisure of the masses Finally it examines the links between war sport and male socialisation The Great War contributed to a redefinition of European masculinity in the post war period The part sport played in this redefinition receives attention Sport Militarism and the Great War is in two parts the Continental Part I and the Anglo Saxon Part II No study has adopted this bilateral approach to date Thus in conception and execution it is original With its originality of content and the approaching centenary of the advent of the Great War in 2014 it is anticipated that the book

will capture a wide audience This book was originally published as a special issue of The International Journal of the History of Sport *The Politicisation of Sport in Modern China* Fan Hong,Lu Zhouxiang,2015-07-16 The Politicisation of Sport in Modern China Communist and Champions is the first book in English which examines in chronological order key issues in sport in the People s Republic of China from 1949 to 2012 in the context of Chinese history politics and society It explores the complexity of Chinese sport including the sovietisation of Chinese sports policy and practice the emergence of the two Chinas issue the Cold War the Cultural Revolution sports diplomacy and sports militarism China s turbulent journey of participation in the Asian Games and in the Olympics the politics and policy of doping and anti doping in Chinese sport and China s sport in the post Beijing Olympics era By analysing the relationships between sport diplomacy politics and social transformation in China the book examines how sport has played an important role in China s rise in the 20th and 21st centuries and how China embraced the Olympic Movement and also influenced the world through the Olympic Games Featuring major events original documents and interviews with a wide breadth of insiders from sports policy makers Olympic medallists and ordinary Chinese this book for the first time provides a comprehensive guide to the history of sport in the People s Republic of China It is a fascinating book for academic researchers general readers and students This book was published as a special issue of the International Journal of the History of Sport Sport and the Emancipation of European Women Gigliola Gori,J.A.

Stadiums in the Modern United States Mark Dyreson,Robert Trumpbour,2013-09-13 Many Americans know more about the stadiums that loom over their cityscapes or college campuses than they do about any other aspect of the nation s geography Stadiums serve as iconic monuments of urban and university identities Indeed the power of sport in modern American culture has produced sportscapes landscapes literally shaped by their devotion to athletic competition Curiously given the importance of the secular cathedrals in American culture historians have paid little attention to these edifices The

Rise of Stadiums in the Modern United States Cathedrals of Sport seeks to remedy that oversight This book will analyze stadiums from a variety of perspectives paying special attention to the links between the built environment in which Americans watch and play games and the larger social environments that the nation's sporting practices inhabit The Rise of Stadiums in the Modern United States Cathedrals of Sport explores the role of stadiums in shaping urban identities determining the economics of intercollegiate athletics influencing local and national politics This book was previously published as a special issue of the International Journal of the History of Sport

The Balkan Games and Balkan Politics in the Interwar Years 1929 - 1939 Penelope Kissoudi, 2013-10-18 The Balkan Games resulted on the one hand from the growth of modern European sport and the unsatisfactory performances of the Balkan athletes at national and international level and on the other hand from a desire to bring the Balkan peoples together in peace and concord The Games were initiated in Athens in 1929 and increasingly became an integral part of the political cultural and social life of the area The common global reality is that when an athletic event is staged attempted friendship seldom receives priority In the 1930s however the Balkan Games provided a rare example of an international athletic event bringing antagonistic states together in friendship This consideration of the significance of the Balkan Games as an instrument of political optimism provides clear evidence of the occasional positive influence of sport in politics The work is a case study of interest to political and social scientists and to historians of Europe and sport This book was previously published as a special issue of the International Journal of the History of Sport

Beijing 2008: Preparing for Glory J.A. Mangan, Dong Jinxia, 2013-09-13 Beijing 2008 Preparing for Glory Chinese Challenge in the Chinese Century brings together international scholars with an interest in sport and politics and sinologists with an interest in China past present and future to explore global reaction to the Beijing Olympics China's anticipated moment of glory on the world stage The Beijing Olympics was first and foremost a political act of assertion It was also a statement of national intent the culmination of ideological effort going back to 1949 and the outcome of political social cultural and economic change From

the moment of the birth of the New China sport has been viewed as a means of internal and external projection illustrating the capacity of the system and people to more than hold their own with those of other nations In short sport has been the chosen stage on which the Chinese perform in pursuit of world recognition respect and esteem This assertion is not hard to understand China s century of humiliation at the hands of first the West and then Japan remains a traumatic experience Beijing 2008 was to assist the restoration of China s national self esteem He Zhenliang Chairman of the IOC Commission for the Culture of Olympic Education has remarked pointedly that the most significant outcome of the Beijing Games will be the elevation of the self confidence and sense of pride of the Chinese people Beijing 2008 was an act of political self renewal on the world stage This Collection demonstrates that sport is inseparable from politics This book was previously published as a special issue of the International Journal of the History of Sport

Sport, Bodily Culture and Classical Antiquity in Modern Greece Eleni Fournaraki,Zinon Papakonstantinou,2014-06-03 Ancient Greece was the model that guided the emergence of many facets of the modern sports movement including most notably the Olympics Yet the process whereby aspects of the ancient world were appropriated and manipulated by sport authorities of nation states athletic organizations and their leaders as well as by sports enthusiasts is only very partially understood This volume takes modern Greece as a case study and explores in depth issues related to the reception and use of classical antiquity in modern sport spectacle and bodily culture For citizens of the Greek nation state classical antiquity is not merely a vague legacy but the cornerstone of their national identity In the field of sport and bodily culture since the 1830s there had been persistent attempts to establish firm and direct links between ancient Greek athletics and modern sport through the incorporation of sport in school curricula the emergence of national sport historiographies as well as the initiatives to revive in the 19th century or appropriate in the 20th the modern Olympics Based on fieldwork and unpublished material sources this book dissects the use and abuse of classical antiquity and sport in constructing national gender and class identities and illuminate aspects of the complex modern perceptions of classicism sport and the body This book was previously published as a special issue of the International Journal of the History of Sport

Post-Beijing 2008: Geopolitics, Sport and the Pacific Rim J. A. Mangan,Fan Hong,2013-10-18 In 2008 as few in the world are unaware China was host to the world via the Beijing Olympics The world watched the metamorphosis of Beijing from insecure capital to confident metropolis but aware of it or not the world was also watching the symbolic assertion via the Games of a rising superpower The Pacific Rim will be the stage on which China initially displays its new hegemonic intentions aspirations and ambitions Thus in Post Beijing 2008 the political economic and cultural impact of Beijing 2008 on the geopolitical future of the Pacific Rim will be discussed This perspective analysed by some of the most distinguished academic commentators from some of the world s leading universities who are closely associated with the Pacific Rim East and West is original in focus and the analysis is pregnant with political possibilities This book was previously published as a special issue of the International Journal of the History of Sport

The

Politics of the Male Body in Global Sport Hans Bonde, 2013-10-18 Danish sport has been associated with Europe and the World not least through I P Muller and Niels Bukh and the Danish Gymnastics revolution with its emphasis on male aesthetics and hygiene in the first half of the twentieth century At the same time Denmark has stood apart from Europe in the early moments of its history of sport with the rural revolution of the farming communities as a statement of political independence and assertion However during the German occupation of Denmark Danish sport was part of a European collaboration which characterized a number of the occupied countries not least in the Nordic area After the Second World War Denmark embraced international body cultures with other European nations in particular Eastern martial arts Denmark too as part of trends in the European region and the world became caught up in sport as a powerful contemporary political statement This book was previously published as a special issue of the International Journal of the History of Sport
