Sport in Cuba Paula J. Pettavino, GERALYN PYE, 1994-09-15 No aspect of Cuban life more clearly epitomizes their government's emphasis on image building and individual participation than the system of physical culture and competitive athletics Indeed the Cuban record in international athletics is the most universally recognized success of the communist revolution as indicated by the Cuban arrival in the 1972 Olympics and the 1991 Pan American Games when Cuba beat the United States in the gold medal tally dominating boxing baseball and winning the marathon The fruits of the Cuban sports system were again in evidence at the Barcelona Olympics of 1992 despite the severe deprivation caused by the collapse of the island's socialist allies In spite of the obvious success and political importance of sport in Cuba very little has been written on the subject Sport in Cuba closes this gap In the first major study on the Cuban system of sports and physical culture Paula J Pettvino and GERALYN PYE analyze how sports was given such a high priority in Cuba how the country became a world power by the mid 1970s and the impact of sports on Cuban society Moving from the early days when the government's approach to sports was loosely defined through the construction of a complex system of physical culture to the current years of uncertainty Sport in Cuba utilizes both archival sources and personal interviews It will be of interest to Latin Americanists and students of sports

Media, Sport, Nationalism

Tianwei Ren, Keiko Ikeda, Chang Wan Woo, 2019-03-01 East Asia is increasingly prominent within global sport. In the short period between 2018 and 2022 it will have held two Winter and one Summer Olympics and the Rugby World Cup for good measure. This is not a sudden development. It has been in train for some time although many scholars especially in Europe and North America have been focussed primarily on sport in their own countries and regions. J. A. Mangan, who for decades has been looking closely at sport in East Asia while encouraging others to do likewise, has made a major contribution to knowledge and understanding of a once under-appreciated subject. This excellent collection in his honour analyses the key interwoven elements of sport, media and nation in China, Japan and South Korea. It demonstrates how the structure and practice of sport connects in myriad ways with its representation, not least with regard to national narratives, international rivalries and transnational trends. It is a book that does signal justice both to East Asian Studies and to the academic who recognised the importance of sport to that field and who has done so much to ensure that the region is centrally placed within any contemporary analysis of the world of sport. David Rowe, Emeritus Professor of Cultural Research Institute for Culture and Society, Western Sydney University. Professor Mangan is the master dissector of the connections between sport and politics, geopolitics and nationalism across multiple Asian contexts. A collection of essays in honour of his long service to academic understandings of these fields is well deserved and the editors and contributors to this volume have served up a worthy tribute. Showcasing new work by a stellar cast of China, Japan and Korea experts in combination, the papers collected here yield valuable insights into the issues of nation building, identity, media representation and sport which have been the subject of Professor Mangan's pioneering work over the past several decades. No one has done more to put East Asia on the map in terms of academic research on the manifold socio-political dimensions of sport and this superbly constructed volume, orchestrated by rising Tianwei Ren, confirms that we neglect this fascinating complex region at our peril. Jonathan Sullivan, Director of China Policy Institute and China Soccer Observatory, Associate Professor, School of Politics and IR, University of Nottingham.

Europe, Sport, World J. A. Mangan, 2013-07-04 The sports of Europe and the United States were imitated and assimilated and became symbols of national and cosmopolitan identity. This work examines the national and international importance of sport and its role in shaping post-millennium global culture. *The Palgrave Handbook of Paralympic Studies* Ian Brittain, Aaron Beacom, 2018-02-15 This handbook provides a critical assessment of contemporary issues that define the contours of the Paralympic Movement generally and the Paralympic Games more specifically. It addresses conceptualisations of disability sport, explores the structure of the Paralympic Movement and considers key political, strategic and governance issues which have shaped its development. *The Palgrave Handbook of Paralympic Studies* is written by a range of international authors, a number of whom are senior strategists as well as academics and explores legacy themes through case studies of recent Paralympic games. Written in the wake of the 2016 Rio Paralympic Games, it provides an assessment of contemporary challenges faced by the International Paralympic Committee and other key stakeholders in the Paralympic

Movement Its critical assessment of approaches to branding classification social inclusion and technological advances makes this handbook a valuable resource for undergraduate study across a range of sport and disability related programmes as well as a point of reference for researchers and policy makers International Books in Print, 1995 Barbara
