Portals Andrew Cox, 2006 First applied to internet gateways such as Yahoo the concept of the portal has evolved in a bewildering number of directions Different themes of personalization aggregation or integration seem to have dominated our understanding of what a portal should be at different times Many organizations and institutions have borrowed the idea from the net to address local problems of integrating and presenting information sources to users yet they have developed the concept in different ways Meanwhile new models seem to be constantly emerging from the internet Tracking this evolving concept is clearly of particular concern for information services How can they best take advantage of internet portals to improve access to resources What are the requirements for delivery of diverse content through a local portal And how do portals run by libraries relate to wider organizational initiatives This edited collection seeks answers to these questions providing the library and broader information community with an overview of how portals are currently being used Leading edge researchers and practitioners explore the variety of ways in which the aspiration to portalize information is currently being realized and offer several views on likely future trends The book is divided into five sections Section 1 discusses generic aspects of portals such as questions of definition as well as exploring the underlying technologies and overarching management issues and the concepts of personalization and user needs analysis Section 2 focuses on the role of information services in developing portals Sections 3 and 4 analyse the current experience of portals within the corporate public and academic sectors with case studies and reviews of sector trends Section 5 offers various perspectives on the future development of the concept of the portal Readership This is an invaluable book for the growing numbers of information practitioners interested in developing or contributing to a portal and those supporting users of portals It will also be useful to students of information management seeking to increase their understanding of how the concept of the portal is being realized in the information world

International Handbook of Research in History, Philosophy and Science Teaching Michael R. Matthews, 2014-07-03 This inaugural handbook documents the distinctive research field that utilizes history and philosophy in investigation of theoretical curricular and pedagogical issues in the teaching of science and mathematics It is contributed to by 130 researchers from 30 countries it provides a logically structured fully referenced guide to the ways in which science and mathematics education is informed by the history and philosophy of these disciplines as well as by the philosophy of education more generally The first handbook to cover the field it lays down a much needed marker of progress to date and provides a platform for informed and coherent future analysis and research of the subject The publication comes at a time of heightened worldwide concern over the standard of science and mathematics education attended by fierce debate over how best to reform curricula and enliven student engagement in the subjects There is a growing recognition among educators and policy makers that the learning of science must dovetail with learning about science this handbook is uniquely positioned as a locus for the discussion The handbook features sections on pedagogical theoretical national and

biographical research setting the literature of each tradition in its historical context It reminds readers at a crucial juncture that there has been a long and rich tradition of historical and philosophical engagements with science and mathematics teaching and that lessons can be learnt from these engagements for the resolution of current theoretical curricular and pedagogical questions that face teachers and administrators Science educators will be grateful for this unique encyclopaedic handbook Gerald Holton Physics Department Harvard University This handbook gathers the fruits of over thirty years research by a growing international and cosmopolitan community Fabio Bevilacqua Physics Department University of Pavia
