teaching Using the Internet for Active Teaching and Learning combines both theory and practice to introduce you to the Internet's potential as a teaching tool in your classroom. With student learning as its goal, the book is organized by its functions in the classroom: from communication to locating and evaluating information, publishing information, information problem solving, cooperative problem solving, inquiry and discovery, and online collaborations. Artificial Intelligence, Medical Engineering and Education Qingying Zhang, Matthew He, Felix Yanovsky, 2024-02-15 Artificial Intelligence (AI) is a rapidly developing field of computer science which now plays an increasingly important role in many disciplines. A catalyst for significant change, research into AI is of particular importance in fields such as medicine and education, and as such has become an area to watch for many people worldwide. This book presents the proceedings of AIMEE 2023, the 7th International Conference on Artificial Intelligence, Medical Engineering and Education, held on 9 and 10 November 2023 in Guangzhou, China. The conference brought together top international researchers from around the world to exchange research results and address open issues in AI, medical engineering and education. A total of 238 submissions were received for AIMEE 2023, of which 89 papers were selected for presentation and publication after a rigorous international peer review process. The book is divided into 3 sections covering artificial intelligence and scientific methodology, systems engineering and analysis, concepts, methods and applications, and education reform and innovation. Presenting papers which explore and discuss many novel concepts and methodologies contributing to the rapid evolution of artificial intelligence and its applications, the book will be of interest to all those working in the relevant fields.
