Rayner-Hilles,2022-06-30 Since the 1960s the West has moved ever leftwards Equality and feelings are central to the New Religion that rejects all traditional values Yet beneath the institutionally dominant Left stews a growing and restless Right How has this fractured situation come about What will the future hold In *The Past is a Future Country* the authors trace it back to the Industrial Revolution Darwinian selection massively weakened meaning that for the first time in history the selfish sick and stupid could survive and reproduce undermining our religious group oriented culture Now the West is scourged by an epidemic of narcissists competing to signal their individuality and moral superiority But their fight for equality is really a fight for self promotion Reflecting this runaway individualism Westerners increasingly don't have children save for those who are genetically resistant to this onslaught the staunchly conservative and religious the eventual inheritors of the earth But there is a dark storm brewing in the demographic data that the authors have analysed There is a burgeoning growth in the population of exceptionally unintelligent and antisocial people that social welfare systems cannot sustain for much longer The developed world will pass away and the global population that depends on it will crash in the greatest Malthusian Collapse of all time Yet all is not lost The authors show how a resistant class of intelligent religious conservatives will band together to preserve enclaves of civilization that may survive most of the coming apocalypse and from its ashes rebuild a new world A Neo Byzantium **The Watershed Moment** Aniket Ghanashyam,2025-09-30 This book attempts to highlight the vital role water has played in creating consolidating protecting and preserving ancient and medieval global civilizations It explains how the modern world has been addressing the issue of water insecurity and learning lessons from its acts of commission and omission Water is a resource that nations have fought over both domestically and internationally The book lists selected water conflicts that have become severe and further exacerbated with populations growing rapidly and water demand rising exponentially while human beings continue to remain oblivious to the inevitable impending dangers of water insecurity It critically examines the disputes and conflicts over water resources in the Middle East Africa and Asia along with domestic disputes that have occurred in India It also examines the methods our forefathers used to meet their

water requirements Ancient water harvesting methods and structures are explored and their efficacy is evaluated This book serves as a reminder of the irrefutable fact that water is the world s most important resource and lists useful tips for investors and policymakers on water preservation It can also serve as a guide to anyone interested in this subject and hoping to learn more about the past present and future scenarios of the world s most important resource      **General Catalog**
